We sincerely wish Valery Alexandrovich long years active, creative life, HAPPINESS to relatives and Friends, light Gladness for successes of grand daughters, and the Main thing large human HAPPINESS and Health. From economic public Ukraine Dzis G.V.

I address. your attention that in Lusk in first in a world the attempt was attempted to decide in the Middle Ages the collected composite world(global) problems. And this congress of the governors of a world was held in the Lock Luberta. Lithuanian nobelman (kniaz) wanted all to reconcile, and itself wanted to become the king. Then to reconcile mankind has failed, but today we attempt to lower strength more deliberately - through creation intelligently - spiritual of communications(connections) between representatives of world(global) national elites, being rest. on modern technologies of an electron coupling, and also on the integration ideas, gained by mankind, and approaches. By the way, from all members of our Civil International Committee anybody to become the President the countries or to take a post(station) of the General Secretary of Integrated Nations (joke) does not plan, apparently. Therefore, we are convinced (it is already severe), that the qualitative intelligently spiritual growth(increase) in development(manufacture) of civilization and humanity the approaches is obvious. But it still to all of us should be to be proved and convince the people. Very much we hope, that we shall find the people, which one can say all these WORDS. You see at first there was a WORD (!).

The writers, in particular(personally), justify paths of perfecting of an impartial assessment of manpower s, as a fundamentals of an effective work created of over- boundary frames. The scientists have suspected a lot of the concepts tangent values European Regions in Crimea and Volynsk area, Mariupol. The cycle of activities covers economico - legal and ethnic socio-cultural and economic aspects of development of a social production. As to each many-sided research it is possible to make the remark concerning entirety, balance and expediency of consideration of those or diverse aspects of a problem.

For example, in activity $\text{I}\ddot{\text{A}}\text{I}\ddot{\text{D}}\text{O}\ddot{\text{A}}\times\ddot{\text{A}}\text{I}\ddot{\text{I}}\text{I}$ the problems of an estimation of a transactions in different branches of a national economy with reference to a problem of overcoming of crises are widely considered.
