

**To Secretary General of the UN To Kofi Annan
To the Director-General IAEA to Mohammed Baradeh -Baradeh
The World Health Organization (WHO - WORLD HEALTH ORGANIZATION)
Food and Agriculture Organization of the United Nations (FAO)
To executive director of the program OF UNITED NATIONS on the
environment (YUNEP)
To Klaus Topfer to legal Adviser of UNITED NATIONS Hans Korelli**

Civil international committee completely shares the preoccupation of the council of the managers OF THE IAEA and his general director Of Mohammed Baradeh about the allowed by Iran in the long period breaches of the treaty on the non-proliferation on nuclear weapons, participant in which Iran is (in particular, the discussion deals with nepredstavlenii by Iran information with the attempts to produce enriched uranium, which potentially can be used as the component for the production of nuclear weapons). Us seriously disturb data of report on the execution of the united program of UNITED NATIONS on AIDS (YUNEP), which the World Health Organization (WHO - WORLD HEALTH ORGANIZATION) published in the new report about the development of global epidemic VICH/SPID into 2003, timed to the world day of fight with AIDS (it were noted on 1 December). According to the data of report in 2003. 5 mln. people infected themselves by the virus of immunodeficiency and 3 mln. it died as a result of the global epidemic Of VICH/SPID. This causes anxiety in all honest people on the Earth. We consider that the consequence of this depravity of the leaders of a number of the countries it is the fact that the global level of starvation again is located on the rise after a certain reduction, which was being observed in the beginning 1990- X it is annual (annual report "food instability in the world in 2003 g."). Today almost 850 mln. people in the world suffer from the malnutrition and with this course of events it will be impossible it is not possible to 2015 reduce doubly the number of people, which suffer from the malnutrition (purpose set at the world summit). Probably; therefore was slowed down the process of the ratification of the second additional protocol to the convention about prohibition or limitation of the application of concrete it was specific the conventional weapon (protocol it ratified 73 states). Against this background can seem the less than significant the problem, which raised the executive director of the program OF UNITED NATIONS on the environment (YUNEP) Of Klaus Topfer, but this is not so its report at the conference, organized under the aegis YUNEP and UNESCO, in which the representatives of 23 countries of Africa and southeastern Asia participated, it is exceptionally timely. We everything are obligated to save the gene pool of PLANET. Analyzing all outstanding events, which shake humanity, the management of civil international committee sequential time is convinced of the manifestation practically in each significant development of the law of CONSERVATION OF LABOR and law OF THE INDESTRUCTIBILITY of Intellectual- spiritual LABOR. Their realization gave the world community to the convention OF UNITED NATIONS against the corruption, which must be signed at the international conference in Merida (Mexico) of 9-11 December. And we are completely agreeable with the legal adviser of UNITED NATIONS Hans Korelli, that this convention is first required for the fulfillment by document in the region of struggle against corruption. But what extensive creative work of international institutes preceded this of convention! Without the convention against the transnational organized criminality (of 29 September) - this document there was b exceptionally complicated to assume. Step by step the world community solves the appearing problems. And despite the fact that last week in the main cities of seven provinces of Afghanistan within the framework of preparation for the national selections (namechenny for next year) of voters thus far zaregistrirova.yo only of 10 000 people (third which they live in the province okra), but this is only first and encouraging step. Us greatly it is desirable to make their contribution to the positive course of events in the world. Therefore we proposed a number of initiatives to the Supreme Soviet of the Ukraine. And simultaneously, we consider it necessary to discuss initiative on conducting of the all-Ukrainian congress of the spiritual unity of all peoples and ethnic groups of the populating the Ukraine with the participation representatives of the Ukrainian diasporas of near and far zarubezh'ya. The same initiative we propose to the Russian Federation relative to Azov region, which will be real step toward the execution of program "Red Book of the cultures of Europe". All these are first steps toward vyponeniyu of our central objective - organization first the World Congress of spiritual unity in New York, which is proposed to conduct in 2005-2006 (sm.INTERNET- page GMK). We request you to express our opinion relative to our initiatives and we with happiness will examine all concrete your proposals. Valerie Vasil'yev, The chairman Of civil International Committee, the President- chairman of Azov department AENPD Aleksandr Vasil'yev, Substitute predsedatel' Civil International Committee, Zam.predsdatel' of Azov department AENPD
