

END OF THIRD AND FOURTH DIMENSION

Departure of Many Souls

<https://www.youtube.com/watch?v=KIK4BbT20dE>

Many beings are worried because they are sensing the departure of a member of their family, friends, acquaintances and even beings who seemed to have a whole life ahead of them, although suddenly and without prior notice, a terminal illness, a last-minute complication, in some simple procedure, or a tragic accident, caused that being to quickly leave this plane. But why is this happening on this scale? Beloved being of Light, it has really been known for a long time that this is the last terrestrial incarnation for many, although upon hearing this you may wonder why?

As we have been announcing in many chapters of the channel, we are in a wonderful process on a personal and collective level, which leads us to take a quantum leap never before seen by Humanity. We transcend this era and move on to the next, but what does this mean?: It means that mother Gaia, along with

our entire Solar System, makes a complete journey in an ascending spiral to the place of origin, that is, to the starting point, but at a much higher stage.

According to the wise men, a Galactic era means seven spiral turns and has a certain time. Half of this time is night and the other half is day. This means that every time a change of Era occurs or a change from night to day or from day to night, a replacement is made of those involved in the work, that is, the group of souls that were carrying out the work of Light to the purpose agreed with the evolution that was expected from the Higher Planes. Then understanding the aforementioned and taking into account that we are in a change of Era, given that all the work of the third and fourth dimension ended, where we were in quarantine with the fateful program of eternal karma, feeling a sensation of not being able to evolve in most of the incarnations that we have experienced, many souls depart, although only those who agreed to do so by divine plan.

Although this occurred mainly due to the negative forces of the regressive beings that manipulated our System and this was happening, as we have mentioned in the chapter of the channel called Atlantis and Lemuria, a manifestation of the future in the past, where we told you that there existed at that time regressive beings that had entered when Atlantis became negative and the beings of light that at that time took care of the evolution of the race, that is, the Confederation, which did not know how to handle such a situation.

In reality, many of us have been at that moment although we do not remember it, but those of us who had the possibility of connecting with the memories of that time, as is my case, where I lived in Atlántida, we were able to remember vividly what happened in that wonderful civilization. These regressive beings had entered to end this experiment, never before carried out, but with the main objective of not losing the work that had been developed at the level of consciousness, given that this had been done thousands of years ago. From the higher planes they decided to quarantine the planet, this meant that nothing could enter and nothing could leave. Consequently, every being that was there was trapped until as long as it was necessary for Gaia's vibrations to be elevated again, which happened in 2016, when our planet became a confederate planet.

So, like most beings who find themselves incarnated, we already finish the experience in the maximum density of matter, at the culmination of what we call

Life. This is the last incarnation for many, especially for those of us who have been incarnating since Atlantis and Lemuria, because we are what is considered old souls.

Although in many cases the beings who are sharing the knowledge through our consciousness, guided by the loving beings of Light who accompany us, will have to stay an extra time to continue with this work until the energies and information packages are completely anchored. to the earth.

When this process culminates, the Earth, what we know as the Third and Fourth dimensions, completely disappear, then all those who have made their experiences, just as when we go from night to day, the change of the roster of Souls is carried out. As we had mentioned before, the contract for your services ends, consequently you have to leave, but where are we going? Even if you don't remember, this is how your soul's adventure began billions of eons ago.

You have emerged as a pure spark of light from the bowels of our Divine Father. When you were before the Creator, volunteer souls were asked to bring the Light through experimentation to a new planet. in this corner of the Galaxy, mother Earth, whose essence or planetary soul is known as Gaia. Later it was when you were told that on that school planet there were two rules that marked the game for the beings who came on that mission of service: the first was that there was free will and the second was that you would not remember who you are at the level of your divine essence, that is, a being of light disguised as a human.

After beautiful incarnations united to the Divine Father Creator with full consciousness with all your divine potentials activated in the times of Lemuria,

Atlantis and others, we wanted to experience the game and play gods disconnected from the Divine Source. That made us go from unity to duality and separation, forgetting for many thousands of years that we are divine beings and thus we experienced in each incarnation the most diverse learning that was recorded in our soul.

This painful separation in this third dimension is taking place as an experiment to understand how we, souls, would react once we had disconnected, although only in appearance from our true Creator Father. And this is what is now happening since the end of the last century in the elliptical and spiral movement of infinite stars and planets of the Cosmos that bring us inexorably closer to the Central Sun of the Galaxy. And it began to reveal and awaken us to who we really are, including what our true purpose and commitment was, the one we had made eons of time before the Divine Father, newly launched into the Universe.

Dear soul, there is only one way to return home, to return to the home from which we came. It is the surrender of the human self to the divine Soul that we are, so that it is the one who guides us through its love back to our origin, our home, the Father of our soul. In the origin we were given to Light without consciousness so that the father could experience himself through us and now in this return to the Source/Father Creator, we will surrender united within the infinite to his essence: Love.

So we souls are the extension and the same divine Father. We are never alone, never, it is impossible. And now that you understand that we are in the Ascension to the unity of the fifth dimension, the question comes, what is the fifth dimension that is talked about so much but that no one knows about?: The fifth dimension is the beginning of divine alchemy, the fusion of your human self with your divine Self, the Soul. This is surrender and when we talk about surrender we are talking about acceptance.

If you look at the changes and situations you are experiencing in your life, they do not happen automatically. You have created them, first in your consciousness through the perception of your own reality, whether through your deepest love longings, or fears, or beliefs, consciously or unconsciously.

The perception of what is happening in your life in that apparent quote-unquote outside of you is a mirror of what is happening inside of you. The only thing that

is truly real are your feelings and based on the vibration of your consciousness, from which you perceive reality. Do not identify with the character you represent in this play and remember that you, as the divine being that you are, are experiencing as a human.

Thus the process will reveal itself to you not as what you are, a mistake, but as an explorer of your shadows and lights from love, from surrender without fighting and with great tenderness for your being, at your own pace. We have to be very careful with our ego. Everything is being magnified by the Light. Wherever you put your attention, that grows. Energy follows thought.

As you remove the many layers of wounds and trauma from past lives, you will discover that for so long disconnected from your inner God and the Father spirit, you may feel that the proposal of surrender to the Divine Will creates fear in you, but soon you will begin to know and feel, while you reaffirm yourself on the path of your total surrender that, we have nothing to fear.

That fear is not real, because we live in the same breath of life as the divine Father, who envelops from the divine Love of your heart the fear that the mind may project, delivers the command of your life to your presence I am soul, for thus fulfilling your divine purpose, anchoring on earth the Light of the Father that is yourself, your eternal soul.

Our essence came out of the Father's own womb. We are your own seemingly separate experiences in physical bodies. Your divine presence is now like the loving father who opens his heart to that human personality, tired of guiding so many lives from duality, confusion and fear to merge it with the essence of love that is your raw material, your Light.

The Divine Will does not come from a God outside of us, it is simply the goddess or god that we have always been, although when we are in a physical Incarnation we tend to temporarily forget it. Surrendering to divine will is a grace you give to yourself. The goddess or god that you are is calling you to surrender to the path that is placed before you day by day with love and trust, open the eyes of your heart to perceive its whisper.

The closer you get to your divine presence, the effect of the communicating energies takes place, the more you surrender. God guides your life and you feel that it flows with deep peace and inner joy along the path of Ascension and remember, beloved soul, the inner journey plus the friction with the outside

produces the spark of experience and the reflection is the friction of the soul with the matter.

You have incarnated on Earth because this is the plane of demonstration and self-knowledge of the Divine Father, through you, your soul. Interact with your divine Self, the soul that is you, you will feel how your frequency of Light will increase to fully resurrect the immortal being that you are. Trust your intuition, since our guides, our teachers and our loved ones accompany and protect us from the higher planes.

Our Guides are those evolved souls who helped us carry out the traces of our prenatal planning, to achieve the evolution that our soul had yet to experience. Our Teachers are those souls that help us transcend specific events in a loving way and our loved ones are those beings who shared with us in this or another incarnation, a journey of what we call Life on this plane.

But the most important thing is not to forget that they can only respect our free will so we must pay close attention to the signs and especially to intuition, since it is through it that these Beings can guide and orient us to fulfill the purpose for which we find ourselves in this wonderful place. So when leaving in this last incarnation, most souls return to their original bodies, those that they left in suspension eons ago when they decided to undertake this wonderful adventure. Although they have completely forgotten it, since many of us belong to different places in the Cosmos and have our star system of origin, where we continue to evolve at the level of consciousness, but in very high vibrations beyond the limits of human thought.

In some cases the souls may decide to continue their experience on other planets, because evolution itself is a necessity, although this only depends on the soul's requirements at that precise moment. Although some souls will continue incarnating on this beautiful planet, but already in the fifth dimension, transcending to much higher levels because the third and fourth dimensions will completely disappear. For that reason we find ourselves in a unique and extremely important moment within the wonderful experience that we manifest here on Earth. Remember then that this will be your last experience. IF this will be your last incarnation, enjoy every moment to the fullest of this sacred and delicate balm that we call Life, in Humanity.
