LISTENED: the professors TIE&M, Dr econ. scis. Alexander V.  
Vasiljkev,

Which one informed collected about participation in International scientific  
Conference in Warsaw organized by Center of Researches of East Europe of the  
Warsaw University « of the STATE CENTRAL and East Europe IN RELATIONSHIPS  
East - West ». He has paid attention, that the conference was held in Warsaw and  
Plotsk (where works very wise Bishop) and on its there were scientifics of USA,  
Denmark, Germanium, Russian Federation, Poland and Ukraine. From 36 offered  
reports the greatest concern was called by the reports of the professor from Florida  
Jeffry Stegal, diplomaed policy Christina Meyer from Germanium, professor, dr-hab.  
Tomash Mihalka from school Gluvna Handlova, and also for us the messages of the  
professor C. Kara-Murza from MGU and professor V.Starodubcev from Moscow were  
interesting.

Tomash Mihalka spoke that today Poland does not have program of signing on  
European Union. By the way, on scientific conference in 2000 we spoke about  
expediency to pay attention to the proposal of the scientists Francium about  
expediency of work on by association of the Central European states and about  
their further interaction with European Union. This report today is published in  
Poland and very well, that the Polish scientists to these proposals start to listen.  
Jeffry Stegal spoke about the oversea investments in Central and Eastern To  
Europe and this protrusion has mirrored a position of the professor Alloiz Novak, we  
were familiar with which one in 2000 (balanced position). The christians Meyer  
spoke about exclusive hope for cooperation with By Russian Federation and that to  
this cooperation of Germanium is off-the shelf. C. Kara-Murza has stayed on « to  
the historical trap » for Russia, and V.Starodubcev - that « is difficult to be stolen  
behind statistical bodies(organs) correcting earlier published statistics ». Our report  
« the Future of agricultural technologies in Poland and in Ukraine» Was made by  
October 20 and has affected a number(series) of all methodological problems.

At first, have marked that large activity, have conducted the professors of Poland,  
by supplying(ensuring) Successful training in the field of agricultural technologies of  
the scientist from Ukraine recommended by Institute of economical and  
sociocultural researches in IBMER in Warsaw on training. The thanks on behalf of  
Presidium of Azov Department of AES&E 19.10.2001 is transferred(handed)  
through Office in Warsaw to the President of Poland Alexander Kwasnevsky. In its  
the role of the professor Kshushtof Wezgbitsky, Michael Dobrochinsky, Vladimir  
Kaminsky, Augustine Vosh, Barbara Trufan, Mary Veryshevskaya, Vladimir Dzun,  
Tadeush Olshevsky, Tadeush Karvovsky, dr-hab. Jozef Nemchik, dr-ing. Alexander  
Sheptycky, Vice-minister Karol Hilka and his employees is underscored in  
implementation of fruitful cooperation. But the close attention was conversion on  
issuing of the monography by results of training « Substantive Provisions of the  
NEW APPROACH » and on creation of a capability for habilitation to its writer in  
IBMER in Warsaw. As outcome of training it is possible to consider(count) both

preservation of Azov Department of AES&E and the letters from 11 locales of Ukraine.

In the report was spoken: « All materials managed to be published in prepared the monography and, published in Warsaw, «Substantive Provisions of the NEW APPROACH » (Warsaw -Chihanow, 2001). Certainly, Poland has reached(achieved) in the field of development of agricultural technologies of very large successes (activity of dr Mychko and dr Stengalo) and it is necessary to do the utmost to keep generated(set up) in Poland by centuries frame of accountable attitude(relation) to ground. However, all this remain by good wishes, if not will be decided cardinal of the all-methodological problem of preservation of a resource potential of a planet. Just, the book of the professor Amory and etc. «a Factor Four » is dedicated to this also. Actually this book was by one of the methodological basis of our activity and it was possible to schedule all seven main(basic) steps indispensable for preservation all 2000000 agriculture in Poland. But the « Revolution of Efficiency », which one everyone wait, will not come of itself, specially, when all of us more than 50 years are tramped in place . And all events in a world uniquely speak, that it is impossible to hope for something and on someone - the stagnation always terminates TRAGEDY. By the way, we about it persistently speak with 1999, and all period of training in Poland was used the best efforts to advocate and to bring to notice publics industrially of developed countries idea of realization of the Second World Congress of the Spiritual Consent on the American continent. It and is understandable, in Europe and in Asia there are enough of ancient and operational spiritual centers, and in USA them practically no, and the actual history of the natives of America does not dispose to highly moral estimations of available heritage (immolation till 20000 persons speak for itself).

Therefore in 1999 we have offered to conduct the Second World Congress of spiritual Consent in Habana, but the solution of Commission of the United Nations on human rights concerning Republic Cubes, Iraq, Yugoslavia and Iran has put under doubt a capability of discussion by an international public of the initiative of realization of severe international Forums in one of these countries. In updating(adjusting) the report « Returning to sources - potential of culture » (Vasiljev A.V., Tuzovskaya M.G.) on the Second International Occurring of the Economists « a Globalization and problems of development » (24-29.01.2000) in HABANA the president - chairman of the Azov Department of AES&E, the academician AES of Ukraine V.A. Vasiljev 25.04.2000 legibly has justified necessity of carry of a site of negotiations of a Forum. He in updating(adjusting) materials of Report N3 of Azov Department of AES&E wrote: «We want to offer to consider a capability of realization of the Second Congress of the Spiritual Consent in Brazilia in the first year XXI of century ... Selection for realization of the 2-nd World Congress of the Spiritual Consent of capital of the largest country in the south of Latin America is connected to successful overcoming by its of financial crisis and definite successes in economic development, in particular(personally), in metallurgy. In Brasil Europe inserted extremely a lot of intellectual(intelligent) and spiritual capital. Even the monument to a Rescuer formed by the best representatives of creative elite Francium (as well as monument to «Freedom» in USA). Therefore realization of a Forum on the American continent is stipulated by the history of scrambling of christian church for steady development of a modern civilization. And also those by victims, which one were born by the missionarays in Asia, Africa, Australia, specially, in America, bearing saving optimism of a faith in throttle(douche) having seek to the best, conscientious life of the people, which one by miscellaneous paths, but want to go to one purpose.»

This idea we persistently brought to notice as the public figures, and to Leders of countries of America, but us have not heard. Have not heard ideas about expediency of revival ICONOMIA - which had realezed by the life of the doctrine

(two centuries Byzantium avoided on its basis(fundamentals) of a confrontation with Rome). And then it was finished we have seen September 11, 2001. It was not necessary to be the prophet to anticipate something similar. If have begun preparation, actual preparation, to such relevant Forum, that, probably, and tragedy was not.

But it already falls into areas of overlooked capabilities. Most important - not to repeat an error of 1992, when the Forum in Rio de-Jeneiro was held before the First World Congress of the Spiritual Consent in Alma-Ata, i.e. all has taken place « hill up by legs » - about a methodology spoke after real recommendations. All of you here science officers also perceive, that it is necessary to decide methodological problems first of all. Therefore after Tragedy in USA we at once have expressed on behalf of the Azov (Ukrainian) Department of AES&E the sincere CONDOLENCE to the people of USA (not all public organizations so have acted). And after obtaining responses from outstanding representatives of world(global) elite - send with the proposal of organization of a world Congress of a Spiritual Unification in New York, which one should be held before a Forum in the Sud-African Republic in 2002. Would be even it desirable conduct the first stage(phase) of a Forum on a Spiritual Unification in New York, second - in Moscow, third - in Pekin, fourth - in Paris, fifth - in Rome, sixth - in Tokyo, seventh - in Sydney. Yes, it is possible to see at our proposal to the very stooped person with a smile, but you see there is no today other alternative is conscientious, using all stored it is intelligently - spiritual a potential of mankind, to begin a decrease of actual strength in a world.

Therefore civil initiative should make to itself a road, and already then and All new agricultural technologies will manage to be inserted. Thanks for attention.»

HAVE ACTED: the academician AES of Ukraine Valery A. Vasiljev

Has underlined, that « in Poland Alexander Vasiljev was aimed to pay attention the government officials industrially of developed countries to necessity of realization of a Congress of a Spiritual directivity on the American continent and actively was aimed to share in a Briefing of the members of Company of 1817 « Heritage » of the New York Academy of Sciences, which one should be held on April 11, 2001 in New York (prompt was obtained in Warsaw), but him have hindered. However, it is very good, that it was possible to promulgate idea of a world Congress of a Spiritual Unification in New York on international scientific conference in Warsaw in 2001.»

The scientific secretary IESCR M.G.Tuzovskaya, marked - "That fact of training the chairman of scientific advice of Institute of economical and sociocultural researches in institutes of Warsaw for the score of the Polish party expensive(dear) costs(stands) and should be by a sample of cooperation between official bodies (organozations).
