**TANAIS REGION**

Unit CIC N 12 is dedicated to the solution of problems of overcoming of crises in economics of Ukraine, which one scientists - economists of the Azov Region were aimed to decide on paths of increase of economic independence of existing administrative units and by creation new, historically and social economically justified administrative units of central subordination - the Mariupol-Berdyansk Locale (or PriAzov boundarouse - Azov Locale etc.). Just, the life practically of last professional economist of Donetsk, Vice-director of Institute of economical-legal researches NAS of Ukraine, academician of Academy of economic sciences of Ukraine, professor, Dr econ. scis. Valentin V. Finagin was dedicated to the scientific substantiation of the schedules of regional development. Therefore scientists of Poland in 2001 with the sincere condolence were withdrew on anticipatory maintenance(drift) from life of the scientist - economist V. Finagin and have routed this condolence to Presidium NAS of Ukraine (KIEV), and also colleagues and native of Finagin (in Donetsk). We have obtained in 2002 a capability to schedule and to initiate with preparation First scientific - theoretical of seminar of Memory of the Academician AES of Ukraine

Valentin V. Finagin «the Azov Region - on a fracture of technologies » (27.02.2003). The main outcomes of this seminar are adduced in this Unit of CIC, in which one the summary on cycle of activities on a subject « the Main theoretical-methodological problems of overcoming of system crises», introduced on the State Premium of Ukraine in 1999 and on a review to the experts of Commission of European Union in 2000, and also adopted to consideration under the indicating of the President of Commission of European Union of March 30, 2001 is adduced also. Without hard work of the scientist - economist V.Finagin in 70 and 80 years of past century would not be of the information base to preparation of cycle of activities on a subject « the Main theoretical-methodological problems of overcoming of system crises». And it all of us should remember.

The material on the statement of the chiefs of Civil International Committee will be interesting to the students and teachers of humanitarian disciplines.

We shall be grateful, if you will be acquainted with the main documents of Civil International Committee on web-page [www.cic-wsc.org](http://www.cic-wsc.org).

**CULTURE AGAINST a TERROR -**

**President USA George BUSH puts problems of a  
NATION**

FULFILMENT of the PROGRAM

**« the RED BOOK of CULTURES of EUROPE »**

TANAIS REGION

**THE CONTENTS**

In Unit № 18 we aim to show a role outstanding persons of a world, scientists and persons prominent in cultural matters in

creation of atmosphere of intolerance in relation to terrorism. Really - only CULTURE can conquer a TERROR. Also it is huge good luck for our all CIVILIZATION, that in a managers) of country executing the largest investments in science and culture, stands today Outstanding of Policies – George Bush. He perceives internal gears of development of human community and knows how to put the purposes before the people, which one carry away representatives of intellectual(intelligent) elite of all countries of a world. His report in January, 2003 in the Capitols has called sincere approval of the senators and Congressmen. Therefore in 2003 this document was estimated, as a sample of efficient control. And this estimation in due course will grow, stimulating interest the contemporaries on paths of efficient control the modern state. We at once have realized value made by the President of USA and legislators of USA of intellectual(intelligent) breakthrough and wanted to finish this document up to the item of information of think youth in 2003. Then planned(glided) it to make in 2004. But only in July, 2005 we manage to issue its in the report of our Civil International Committee and Azov Department of AES&E. The events of the end of 2004 and « orange revolution » were indispensable, that there were minimumly possible conditions for fissile creative activity, and not just for lazy, but extreme of aggressive internal opposition (you see « the cold wars » do not pass without leaving a trace, them aim to transfer in psychologic). But who are making of CULTURE against «of aggressive laziness»? Certainly, scientists, writers, artists and present policies. Therefore we aim of most worthy of them to recommend in the most prestigious biographic issuings of Europe, and also it is well-timed to give an estimation to their creative exploit. Specially, we were struck by outcomes of mastering by scientific USA of planets of a solar system - Mars and Mercury. But You can see in the document № 67 on pages of our electronic journal [www.cic-wsc.org](http://www.cic-wsc.org) , that in 2004 the colleagues neither in Europe, nor in America with the contents of our reference to be acquainted could not in a full volume. But ADVANCE to not stop - and in 2005 You can be acquainted with the contents of the reference to the BUILDERS of the BASE of the FUTURE WORLD of scientific advice of Institute of economical and socio-cultural researches (assignee DESMC DSC AS of Ukraine), and also to see, that

there is a searching youth and in Taganrog, which one have noted even in USA.

In Report 18 the sources Documents "Chiefs of public organizations of Serbia and Europe, Her Great Woman to the Queen of Great Britain, Him Great Man to the King of Belgium, Member of Civil International Committee, professor Miroslaw Demic - SINCERE CONDOLENCE about TRAGEDY in Kosovo", "Reference(reversal) to a NATION - report of the President of USA George BUSH 28.01.2003 in the Capitols", "to President of USA George BUSH from the Chairman of Civil International Committee, academician of the New York Academy of sciences, member of Company of 1817 "Heritage" of the New York Academy of sciences and Vice-chairman of Civil International Committee, academician of the New York Academy of sciences, member of Company of 1817 "Heritage" of the New York Academy of sciences - CULTURE AGAINST a TERROR", "Builders of the base of the Future World: to an implementation of a program of analysis of a Mercury and Mars (on English and Russian languages)", "Diploma of the member of the New York Academy of Sciences to the student of the Taganrog Institute of Management and Economics to the Roman Poyrkov" and The Letter from the President of a Cabinet «World Peace and Diplomacy Forum» Nicholas S. Law from 12.09.2003 to the chairman of Civil International Committee.

The material opening a features Revival of the natural death will be interesting also to the students and teachers of humanitarian disciplines.

We shall be grateful, if you will be acquainted with the main documents of Civil International Committee on web-page [www.cic-wsc.org](http://www.cic-wsc.org) .

**THE CONTENTS**

The Unit № 19 is dedicated to most relevant, in opinion of the economists of Academy of economic sciences and enterprise activity, to event in practice of the economic analysis with

usage of the detected social and economic legitimacies (to which one belongs to also of regularity on intellectualization of a Labour). Being rest on the Law of Preservation of a Labour, formulated by the Mariupol's academic school, the outcomes of operational use of techniques of the comparative social and economic analysis are adduced. The reduced material not only has confirmed a correctness of executed(made) methodological minings in 1997-1999, but also has confirmed apparent for each honest scientist the axiom - accountable and honest approach at realization of researches always gives unexpected positive takes. Designed techniques per 70 years XX centuries of definition of the prices on concrete kinds of production before mining the fabrication documentation were possible in engineering and the ferrous metallurgies managed in 80 and 90 years XX centuries to approve for a series of industrial firms. And they without change have allowed in 2003 to execute comparative cost analysis living and materialized labour on different flow technologies of manufacturing of production and rendering of services. This so severe for economic science achievement, that its completely is realized only after some by decades years, since the more relief and apparent proof of existence of a Law of Preservation of a Labour for the scientists and workers of plants simply cannot be given. We always underlined and we mark today what to reach(achieve) it it was possible only thanking moral supports of international institutes - to the New York Academy of Sciences, the publishing Houses «Who is Who» in USA, International Biographic Center in Cambridge, American Biographic Institute, American AAS.

And it not exaggeration, instead of absolutely pleasant(absolutely sweet) for state frames of East Europe a reality, when the scientists can not normally work and to provide the monogynopaediums, and are subjected to an actual terror and degrading because of reluctance to participate in political situations, specially, it concerns such over of an politics orb, as economics.

The material opening a features Revival of the natural death will be interesting also to the students and teachers of humanitarian disciplines.
