On the basis of the basic purpose of the interregional practical-scientific teaching student conference of the Odessa Branch of University "Ukraine" and the Odessa national University name I.I.Mechnikova, after its conducting it is possible to make the following conclusions:

1. Even in the practice of conducting scientific research conferences and realization of humanitarian projects vividly is examined the observance of the law OF THE INDESTRUCTIBILITY of Intellectual- spiritual LABOR (!). this was expressed most vividly in the process of preparation and, especially, in the process of conducting 23.03.2006 practical-scientific interregional of the conference named above. 2. Methodology of synergetic approach justifies the most important special features of the contemporary transformation of our society into the more open and complexly organized social system. Therefore the fact of deep realization by each European pragmatic benefits from the active collaboration with the basic agents of international institutes, enters into the plane of the proved truths, which cannot be to anyone ignored. 3. Takeing into account the already created association of universities in the territory of Euro-region "lower Danube", to plan the complex of sociocultural programs and intsiativ both from the side of Rumania, and Moldovy and from the side of the Ukraine, after taking as the model the already realized kul'turologicheskuyu educational program "seven miracles of Odessa" (Odessa branch of the open international university of the development of man "Ukraine" and the Odessa national university name I.I. 5. We consider necessary to conduct the international scientific of conference from our analogous conference by thematics the "ideas of young people of Euro-region" lower Danube "to united Europe: the law of the indestructibility of intellectual- spiritual labor ".

6. Taking into account real support to the Odessa provincial state administration of all actions of Azov department Academy ES&E and of Civil International Committee "on the attraction of the scientific workers of Odessa region to the collaboration with the international and all-Ukrainian non-governmental scientific establishments" (1 02-038/567 from 10.03.2006), and also the promise of "information support" (S.P.Bilokonenko, D.M.Demchenko - the provincial administration of formation and scientific activity) the initiative of the academician of the Academy of economic Sciences of the Ukraine Valery Alexandrovich Vasiljev for the creation of the independent Academy of economic sciences and owner's activity of the Ukraine name W.W.
