Christ RESURRECTION

To the chiefs of the States of Europe, Asia, America, Africa and Australia

To managers of Non-State Public Organizations

To managers of creative associations and Unions

WORLD in CONDITIONS of SCRAMBLING With TERRORISM:
CULTURES of a WORLD AGAINST a TERROR // the Substantiation of
necessity of signing « of the Minutes of the United Nations on
preservation of cultural variety » //

Analyzing (analysing) the information from news agencies, and also message from battle areas in Iraq, in Short-range East and in Africa, all of us are inclined to perception of concrete and actual hazard, as most relevant threat in general. And the world aims to decide problems in an operating mode, i.e. in process of peaking this or that situation.

The problems with AIDS have become aggravated and we expedited reduce the cost of the indispensable diagnostic equipment and pharmaceuticals. So in the application UNISEF it is marked, that pursuant to the arrangement reached American non-governmental agency Fund of Clinton with five manufacturers of 'untiretrovirus' drugs and five manufacturers of the diagnostic equipment, the governments of less developed countries will have a capability to gain drugs against AIDS under lower price (DBP/1967/070404 on April 7, 2004). The necessary arrangement? Certainly, also there can not be an actual alternative to activity of this fund.

There were fears (info. 6/04/04), that the cultivation of a thebaic poppy will endanger to the supremacy of the law in Afghanistan - and Advice of Safety of the United Nations (presiding in April Gunter Ploger) hailed made by the international donors on the Berlin conference the declaration about the installments on recovery of Afghanistan on the sum in 8,2 mild. Dollars, which one will be given for period since March of a current years till March, 2007. Who can contest prospects of such solution? Wishing to criticize itself hardly will exhibit.

And so on tens problems in the most critical situations.

The world community aims to route financial flows for the solution of the really relevant and ripened problems. Certainly, it is far from being by all it is pleasant, since the authority of the irresponsible and reprobate chiefs is reduced(descended), which one and to supervise never on the present knew how. It will be difficult to the whole peoples to make a step in the future with such weight of obsolete traditions in a management(manual), as these "«pseudo-chiefs" perceive, that their time as a «shagrene's skin » is steadily reduced. They are glad to each new conflict, each new surge of strength, calculating to prolong the (same-self) existence. For them - than more problems, it is better. About what there national concerns or concerns of the people there can be a speech, when the own oversea business trip and own preferential visa burns. And they, deciding the petty problems, absolutely overlook(forget) about the future of that ground, where they have lived all conscientious life. By each solution they destroy culture, in which one they have grown. By each attempt to execute(come true) the wrongful share or to back up destructive forces they delete the moral base of normal life for children. But they do not see escaping of a self-contained criminal ring. In an orthodox temple it is not becomes easier, as well as in roman catholic and in any by others, since for many from them still there was a misunderstood true, that the largest Temple for each person is his inner life. There is no this inner life and any "«Mercedes" will not replace comprehension of moral values any substitute of culture will not replace present of spiritual life, but only will increase internal difficult problems.

They aim at an authority, but only with horror think of that moment, when them this authority will give even on time since to bear of the actual responsibility they can not any more. They would like to become any geopolitical center, only for them the world yet has not invented a line of business, in which one they could reach(achieve) success. Difficulty by him, but it is even more difficult to all of us, since the incompetence and idleness these "«bad-chiefs" aim to cover with a pseudo-competitiveness and present crimes.

And all of us observed a following picture, when the present chiefs and spiritual leaders together with intellectual (intelligent) elite of a world step-by-step load themselves ever more and more by solution of concrete and pressing problems, which one cannot be skipped. But in provoking of these "«pressing" questions and problems, their sparking the whole professional groups are engaged today in a world, which one integrate the efforts (« a criminal globalization »), increasing pressure on governments and on world community as a whole.

The world can appear on the verge of intelligently - spiritual stagnation, that achieve « for ever backward-men » and managing lazy persons in many angles of a planet.

What can we by him oppose? How can us not admit to stagnation and economic decay? What the way we to ensure development of high technologies and mastering of neighboring space with?

At first, it is possible if we will be to recess of economic integration on the basis of a severe further internationalization of the main's orbs of human activity. All this should rested on fundamental both methodological and methodical minings and on the experiment usage in practice of an economic management of the fundamental laws of social and economical development. To these laws it is possible to attribute(related) the law of PRESERVATION of a LABOUR (Mariupol's Academic School, 1999) and law of NON-DESTROY of an INTELLIGENTLY - SPIRITUAL LABOUR (Ukrainian Academic School, 2002), law of Synergy and law on instability of a CIVILIZATION in conditions, when restricted number of persons have a capability of intelligently - spiritual growth(increase) (P.Lavrov, 1870), law on sinusoidal character of all social and economic processes in a history of mankind (Platon, John. Vico, H.Ortega-and-Gasset, A.Veber, O.Shpengler, with IY up to AD on XX st.) both law of release of the person and growth(increase) of her value (P.Sorokin, 1920); and a lot

of legitimacy's about intellectualization of a Labour as a whole and on the main's social groups and layers (Mariupol's Academic School, 1997), and also number(series) of the most relevant social and economic legitimacies (law of an agglomeration – of A.Veber; the law of saturation of primary needs(requirements) etc.). It is necessary by all to begin to execute « the DECLARATION On SCIENCE And USAGE of SCIENTIFIC KNOWLEDGE », adopted 2000 scientific them 150 countries in Budapest in 1999, where was said: « we the participants of World-wide Conference « Science for XXI of century: the accrued obligations ».... Considering a role, which one the social sciences play problems of the analysis of public transformations(conversions), bound with technological development, and in a search of mutually solutions of problems generated by this process.. .. Underlining, that at realization of scientific researches and usage of scientific knowledge it is necessary to respect the human right and human advantage pursuant to the World-wide Declaration of human rights and General declaration on a genome of the person and customs of the person.... It is necessary to supply(ensure) a free dissemination of information about every possible kinds(views) of new discoveries and technologies, consequences of their usage, so that it was possible competently to discuss ethical problems. In each country it is necessary to accept appropriate measures for consideration of ethics of scientific activity and its applied aspects, which one would include procedures of fair and benevolent attitude(relation) to a dissent and dissident... ». Only on this path we can in the industrially developed states eliminate a situation, when the President is compelled to declare: «I have thousand experts, which one can construct a pyramid, but there is no, who, would say, whether it is necessary it to plot » (words of John a Kennedy).

Secondly, it is possible if we will be to implementation of the series antiterrorist programs. Very much encourage the solutions on completed December 12 the activity of political conference of a high level for signing of the Convention of the United Nations against corruption in Meride (Mexico), under which one the signatures already have put 94 states. This is the "tooths's" document (definition Antonio Mary Costa) requires(demands) of them to introduce corruption to category(discharge) of felonies, to create institutes for its preventing and to penalize the criminals. By the way, outgoing from the size of the gross world(global) product in 33 billions US dollars, at least annually sum of the wrongful bargains makes 1 billions Dollars, and it is the actual base "«globalization's" aims of the terrorists. Therefore within the framework of activation of efforts of the United Nations on scrambling with threat of terrorism Advice of Safety of the United Nations has made a decision about re-structuring Committee on scrambling with terrorism, which one will allow to consolidate its potential and to actuate activity in varied conditions. Pursuant to Safety, solidly adopted By advice, by the resolution, in new frame of Committee on scrambling with terrorism are stipulated Plenary group in a structure of all members of Advice of Safety, which one will be engaged in development(manufacture) of the strategic and political solutions, and the Against-Terror's executive directorate (CTED), which one will be headed by the director - initiator and two his assistants, and also to dispose integrated secretariat. In spite of the fact that term of existence of the Executive directorate is limited to December 31, 2007, it already concrete steps of association of efforts in scrambling with a terror. We hail them and we maintain. But it is impossible to overlook(forget), that the terror prospers in companies, where there are no highly moral traditions, where the human right is upset, where the beddarely and poverty is implanted, where do not give to develop and to save culture. Therefore all concrete shares on maintenance of original cultures in this or that locale of a planet delete a medium of terrorism. And this environment is necessary for deleting everywhere, specially, in developing poor Societies. And we are convinced, that the fulfillment of the program of the Azov Department of AES&E "the Red Book of Cultures of Europe " today practically does not have alternative in PriAzov Region (Ukraine and Russia). From top of civic Stands of 2004 in

comprehension of problems of preservation of cultural variety in Europe the share of the professors of the Warsaw University (Rech-Pospolita-Poland) on financing of fulfillment of the program «the Red Book of Cultures of Europe » (listing in 2000-2001 from Warsaw through New York in Mariupol) becomes even more significant and can be a vivid example for imitating.

And in third, it is possible if we will be to preservation and development of cultural variety by ours unique for all of us of a CIVILIZATION.

It is necessary to originate realization of joint seminars and conferences (look Document's NN 7,12 and 29 www.cic-wsc.org) to the spiritual leaders of all substantially working religions and motions together with representatives of science and art, transforming these occurring not only in cultural - intellectual event at a state level, but also in a forum on discussion of concrete paths of preservation of cultural variety of locales and whole states. Main is at all does not contradict a continuing globalization of a world(global) economic system, but only should promote its crisis-free realization. It is necessary to supply(ensure) intelligently - spiritual balanced development of the person within the framework of all cultures, generated(set up) on the Earth. It is all requires(demands) actual interest and living - absolutely informal activity of creative and scientific collectives. It is difficult(complex)? Certainly. But it is possible to execute even in the most composite conditions. The example of overcoming of artificial obstacles can be served by(with) conferences and scientific - theoretical seminars of Institute of economical and socio-cultural researches (IESCR), Azov Department of AES&E and stand of management MF IRAMS, inducted in Mariupol (Old Kremnes) in 2002-2003 .

The stored experience does not owe an abyss, since the institute of economical and socio-cultural researches (IESCR) since 1989 has conducted more 20 every possible conferences and seminars at inter-regional and international levels, and today makes dispositions to mark 15-years of the basis. Therefore it is expedient to connect IESCR to implementation of consultation of realization of the similar shares on preservation of a cultural heritage. Are sure, that the experts IESCR with pleasure will participate in activity of any state frames of countries of Europe, since well perceive importance of concrete steps on preservation of cultural variety of our CIVILIZATION.

Actually preservation and development of cultures is the most severe answer of intellectual - spiritual elite of the national states to all terrorists and their accomplices. Intelligently advanced, the moral person never will commit of act of terrorism especially depriving the people of life. In active(actively) creation human communities there is no place of inhumanity, animal envy and wrath.

Therefore CULTURES of a WORLD, eventually, will conquer of terrorism., behind them final victory above non-spiritual and criminality in our CIVILIZATION.

Vasiljev, Valery Alexandrovich, Chairman of Civil International Committee (CIC), President - chairman of the Azov Department of Academy of economic sciences and enterprise activity, academician of Academy of economic sciences of Ukraine, academician of Academy of economic sciences and enterprise activity of Russia, academician of the New York Academy of sciences, member of Society "«Heritage" of 1817 of the New York Academy of sciences, doctor of commerce AES&E of Russia, can.econ.scies, high scies empl.

(for № 3013/040-1.1), International scientific conferences « Problems of economic integration of Ukraine in European Union », which one organized the Ternopol academy of national economy (Ukraine) and University by name I.-V.Gete Frankfurt -on-Man (Germanium) with 1996-2002 in one Yalta - Foros, according to the Act(certificate) about usage of outcomes of research works from 17.06.2003 (for № 126-17/491), International technological conference « Engineering in agrorural technjlogye in the long term integrations of Poland with European Union » (7-8.03.2001, IBMER) in Kelce (Poland), International scientific conferences « Eastern Europe in light of integration and globalization » (October 19-20 2000-200., Warsaw University) in Warsaw, and also solutions of Presidium of the Azov Department of AES&E and management of Institute of economical and socio-culrural researches for period since 1999 for 2004 /

PREAMBLE

On International Forums and in fissile peace-making activity of the United Nations with consequences of a globalization of a world(global) economic system, take one their main places at discussion practically of all vital problems

exciting world community.

Yes, the world became unified, but not all administrative elites of the national states agree with that place, which one by him and their peoples were allocated(removed) by a history in the future changes of our CIVILIZATION. It is necessary to pay for all and for conjuncture of the fathers the descendants pay. It is necessary anything positive to do(make) during decades and to plan(glide) to use support of an international public at the expense of the next world outlook or information phantom.

The world has managed(consulted) with pseudo-revolutionary destroying of a credit and financial system per 20 years of the XX-th century and will manage agony of shadow and terrorist frames in XX1 century. Today according to the experts of the United Nations the shadow frames manage to conduct of operations on the sum not superior of 1-st billion of dollars. It is less than 4 % of operations of open economics (33 billion dollars). If a not holding globalization of a world(global) economic system, effect and the force of shadow frames would be much more and the stagnation of intelligently - spiritual growth(increase) of mankind would be foregone.

However, the world community could overcome all severe negative effects of the supporters of stagnation and moral degradation. The liberty of conscience today practically became property of all mankind. Therefore of optimism bears even there, where this mood should not appear some more decades on an intention of the no-realized dictators and leaders. The rate of positive changes steadily rises. Many unexpectedly for themselves see powerlessness of instigatings and terror, which one simple and not heroic warehouse(storage) the people suddenly cease to be afraid, exhibiting high samples of a civic courage and human advantage.

This deeply human scorn for immorality is one more component of the base of growth(increase) of SOLIDARITY of the peoples of the Earth in tendency to ADVANCE and HAPPINESS. Thousand missionarys, spiritual teachers, righteous men and men of faith built up during centuries that moral base, on which one all our successes in knowledge and perfecting are based.

Apparently, that the ex-potential growth(increase) of SOLIDARITY of mankind was prepared by a transactions of tens generations honest « of the citizens of a world » (with 1949 in Paris International registration of the citizens of a world works for installation of international institutes, letting out even the special visiting cards; the information a Lucis Trust, Inform. Unit. №1/2000), pulled out of their circle of daily occurrence to creation of the FUTURE. Always it was not simple, specially, when there was a realization of the responsibility before the descendants, for left heritage, when in a full voice started to speak with them their CONSCIENCE.

Sometimes it is necessary to watch (we hope, that with each year it will make all more difficultly and more difficultly) - how much efforts should be expended, frequently, dominating frames to muffle a voice of CONSCIENCE for this or that person. To cause(urge) completely to become silent does not receive any more, and to muffle while it is possible, but it only while. What powerful moral fundamentales are gobed up in each person! As it is heavy to destroy them!

Therefore all concrete shares and practical proposals, which one can render positive effect on life and Labour of the people the attentions merit. From them it is impossible to turn away neither business, nor public. The world should be colour

and much-fases. Ideas and proposals should be much and they owe awake up chain reaction of the initiative of thousand chiefs and creative workers (intelligences).

Therefore we carry out on Your Court a series of the guidelines and initiatives, which one were published by us in printing and are discussed on scientific conferences. We are sincerely grateful for cordiality and interest exhibited to our

minings, from the party: The professors Sorbone Michel Audouset (Paris), Former Congressman of USA Bill Green, professor of University of a Trento Bruno Dallago (Italy), President of a Piotr's Academy of sciences and arts, professor Leonid Majboroda (St.-Petersburg), President of the Crimean Academy of sciences, professor Valentin Rusiaev (Crimea), Chief of a Division of European Parliament Gullen Zanon (Strasbourg), Chief of Department of European Commission Giorgio Bonacci (Bruxelles), Chief of a Division of European Commission Luis Moreno (Luxembourg), Director of Institute of the Right NAS of Ukraine, professor Uriy Shemshuchenko (Kiev), Chief of the Program Tacis Valerie Braeken (Bruxelles), Director of Department of the Ministry of an agriculture of Poland, doctor - engineer Anatol Kalishiewicz (Warsaw), professor UPMF Ivan Samson (Paris), Chief of Department of science of Embassy Germanium Claus Brummer (Kiev), doctor - engineer Jozef Niemchuk (Poland), The chief of scientific department of the Taganrog Institute of control and economics, cand. scies. Boris Dolgopyatov (Russia), professor Jeffrey W. Steagall Quilted (USA), professor RAGS of Nickolai Volgin (Russia), professor Jan Toshenko (Russia), Director of Institute of Economics, professor Andjey Kowalski (Warsaw), professor of Zaporozhye University Ludmila Malenko (Ukraine), professor of Institute of Economics of Augustyn Wosh (Poland), professor of the Taganrog radio University Victor Kadachigov (Russia), chief Branch of the Taganrog Institute of Management and economics Tanjana Mordovceva (Russia), professor Fedot Tumusov (Yakutia), manager by stand of economics of the Odessa University Leonid Dolenko (Ukraine), doctor Tomas Pol Mondesir (Cuba), professor RAGS Valery Kushlin (Russia), Vice-rector RAGS, professor Vyacheslav Plaksy (Russia), Director of Institute of comparative sociological researches Larand Szalay (USA), professor of University Lumjer Laurent Guihery (Lyon, France), President - rector RAGS, professors Vladimir Egorov (Russia), vice-president of department of a Piotr's Academy of sciences and arts, professor George Shukin (St.-Petersburg), Vice-president of a Piotr's Academy of sciences and arts, professor Alexander Subbeto (St.-Petersburg), Vice-chief of Branch of RAGS, professor Anatoly Spicyn (Russia), professor Janusz Siatkowski (Poland), professor Danuta Kolosun-Kraevskaya (Poland), academician of Academy of economic sciences of Ukraine Eduard Reyzvig (Kirovograd, Ukraine), Vice-rector of the Ternopol Academy of national economy, professor Evgeniush Savelev (Ternopol, Ukraine), Doyen of the Volynsk State University, professor of Peter Lucishun (Lusk, Ukraine), Doyen of the Kirovograd institute, professor Leonid Filshteyn (Kirovograd, Ukraine), Vice-rector Berdyansk teach-University, senior lecturer Alexander Hristianinov (Ukraine), President of Academy of economic sciences of Ukraine, professor of Nickolai Chumachenko (Kiev), professors Lesly Kish (USA), professor Wilburg Jimenes-Castro (Costa Rica), doctor of the Stefan Miedzinski (Poland), Second Secretary of Embassy of USA Bruse Hudspeth (Kiev), doctor - engineer of Andrew Mychko (Poznan, Poland), Director IBMER, doctor - engineer Alexander Sheptycki (Warsaw), Vice-director IBMER, professor Ksushtof Vejbicky (Warsaw), professor of Institute a PAN Marina Verushevskaya (Warsaw), professor of Institute a PAN Vladimir Dzun (Warsaw), professor of the Warsaw University Michal Dobroczyński (Poland), Doctor Ernesto Garcia (Spain), Professor, dr Miroslav Demic (Serbia), Professor, dr Goutam Dutta (Indium), Writer - pilot Clayton Devic (USA) and many experts participating in

discussion of the initiatives. The special thanks we express to the cognates of the people, which one already no with us, but them we never shall forget for their steep and interested attitude(relation) to our researches and ideas. Namely, cognates and close: Larisa Mihaylovna Guly, first accountant IESCR; Peter Semenovich Golik, member of the first academic scientific advice of Mariupol; Igor Karimovich Karimov, one of

the pioneers of creation of the academic division in Mariupol; Anatoly Vasiljevich Shtepa, vice-president of the Azov Department of AES&E; Miroslav Mossakovski, President of a Polish Academy of sciences; Vadim Nikitovich Kirichenko, President of AES&E of Russia and AES&E; Victor Georgievich Lebedev, professor RAGS and scientific adviser of the scientists - economists of Mariupol.

THE REGISTRY of IDEAS And INITIATIVES

It is necessary to put the LARGE PURPOSES

Presentation we shall begin from the all-European level and step-by-step we shall reach in concretization branches and firms. We pay attention, that all minings are oriented predominantly on Europe, since the researches were conducted on firms of Central Europe (Ukraine, Poland, States PriBaltika, Russian Federation). However, some ideas will affect Republic of Kazakhstan, Georgia and Latin American countries (by results of the comparative analysis). We also accept responsibility for a number(series) of the proposals of all metodological character, which one are the basis of the initiatives for discussion in establishments of the United Nations.

AT the ALL-EUROPEAN LEVEL

Realizing, that the main(basic) source of development of our CIVILIZATION is the composite interaction existing of different - level's cultures and cultural phenomena, for activation of processes of preservat ion of cultures of Europe is considered(counted) expedient to act with the following initiatives:

1. To appeal for(ask) Parliament of European Union to permit to conduct elections of the deputies in European Palament from the population most original and ethnic-socio-cultural locales follow-up to an established quota. // In the monography « Substantive provisions and substantiation of the NEW APPROACH » (Warsaw, 2001) was offered only in locales « of Poland and Ukraine ».
2. To appeal for(ask) Advice of Europe to permit to participate in meetings to a full representative mains or main(basic) of ethnic-socio-cultural locale of the states of the members of European Union (for example, on one from bascov of Spain, from provansalers of France etc.), and also mains or main(basic) of ethnic-socio-cultural locale of Rechipospolitoy-Poland and Ukraine (for example, on one from Rusinov of Poland, from the tartar of Crimea, from the Greeks of PriAzov, from the

Armenians of PriAzov, from bulgar of PriAzov and from the Cossacks of PriAzov). // In the monography « Substantive provisions and substantiation of the NEW APPROACH » (Warsaw, 2001) was offered only from locales of Poland and Ukraine.

3. To offer Commissions of European Union to create workgroup from representatives of all states of Europe with the purpose of mining « of the Minutes (Protocol) on preservation of cultural variety » (by analogy with the minutes on "«Preservation of species"), since even the first steps on an implementation of a program « the Red book of cultures of Europe » and search of sources of its financing (first 70 dollars were enumerated by the professor of the Warsaw University 29.12.2000r., which one have received in Mariupol 5.01.2001r,) have shown necessity of such Protocol. // Is asked to acquaint with a material " Textes of Web Page in English " in DOCUMENTATION'S on Web-Page " CIVIL INTERNATIONAL COMMITTEE » www.CIC-WSC.org .
4. To give financial gift for fulfilment by the experts of Institute of economical and socio-cultural researches (IESCR) of alternate calculations of balanced budgets for countries of European Union on the basis of introduction to a taxable potential of a national wealth of the states and installation of the differentiated tax rates depending on a yield rate of a labour and bond yield of the members of monogynopaediums. The package(packet) of several versions of alternate calculations will allow to develop normative base, appropriate to modern realities, for branches which are generatrix the budgets, and for implementation of actual steps on conditioning for steady development at a regional level at the expense of essential increase of the investments. And it also will give the basis(fundamentals) for a subject controversy of groups of the scientific advisers of Commission of European Union. // We ask to acquaint with a material Document 15 in DOCUMENTATION'S on Web-Page " CIVIL INTERNATIONAL COMMITTEE » www.CIC-WSC.org and with the article « To european integration by creation of the sufficient budgets (Memory of the Outstanding Economist of America and Russia, Winner of the Nobel Premium of Wasil Wasilewich Leontj) » /in book « Eastern Europe before a face of integration and globalization ». - Warsaw, University, 2001. - pp.155-166.
5. For a partial solution of a problem of seizure in agricultural regions it is expedient to discuss in Commission European Union a capability of creation macro-technology of space safety of the Earth. « Of Space waste » has collected on an earth orbit so many that in 1999 International Astronomical Union and COSPAR have organized on the subject of « Safety of an astronomical palate » a workshop. So, that it is necessary already us to look at stars, and the particular on «acts of our arms(hand) » are more valid, it to prevent losses and not only loss. You see each inhabitant of the Earth of time per one week is endangered «to "meet" on ground such dropping "«pieces", according to statistics. As you can see, "the «abstract" hazard already became a reality. // In the monography « Substantive provisions and substantiation of the NEW APPROACH » (Warsaw, 2001)

see section 5.6. « the Sixth step – macro-technology for all » (p. 97).

6. To discuss in Commission European Union a capability of optimization of quantity of man-made objects in a near space, that, probably, owes will be by a subject of international occurrences and Minutes offered to world community for signing on behalf of the United Nations. For Europe with much people it becomes true by a problem as soon as possible. // In the monography «Substantive provisions and substantiation of the NEW APPROACH » (Warsaw, 2001) see section 5.6. « the Sixth step – macro-technology for all » (p. 98).

7. To discuss in Commission European Union of a perspective of implementation of the marketing-educational european program «Your Position », in which one it is desirable, that all farmer population and all elderly population of Europe has shared. All-European INTRNET allows on definite time and date to receive legible performance about judgement of the people on this or that problem and even to receive by the whole packages(packets) of the proposal, awaking interest in those or diverse layers of the population. But main - INTERNET-PROGRAM «Your Position» will allow effectively to use an intellectual (intelligent) potential of Persons of elderly age, and for this purpose it is necessary even to provide listing of the main problems on printers of the participants of the project by a font 14-16, that not tired of the participants reading from a screen of the screen monitor (much from them will be for 60 years and it is necessary for taking into account). It is necessary to provide a floppy system of moral and material incentives which are taking into account mentality and age of the participants. Apart we shall underline, that the information units and interactive exchange of opinions are necessary for constructing so that to render positive orientating effect. // In the monography « Substantive provisions and substantiation of the NEW APPROACH » (Warsaw, 2001) the similar program was offered for the farmers of Poland (pp.85-90).

The note: Let in the beginning will be one or two deputies, but the process of realization in practice in conditions of the solution of concrete problems of development of European Union of actual propulsions of democratic development in XX1 century will begin. And let in 2004 the project « of the Minutes(Protocol) on preservation of cultural variety » will be discussed only, but the actual value of all complex of activities and programs on preservation of all cultural phenomena will be realized by absolute majority of the chiefs of all levels and much will manage be to be salvaged and to be kept for the future generations.

ON CENTRAL EUROPEAN LEVEL

8. With the purpose of implementation of a system effective of social – status's inducing of the experts of top skills in Poland, Ukraine and Lithuania to create new public frame a Azov-Baltic Academy of sciences and arts, having placed its secretariat& in Gdansk. This frame grows from organizational frame of Club of the members of the New York Academy of Sciences in Central Europe (The CENTRAL EUROPEAN INITIATIVE «SPRING "- 2000") and pioneer of its creation is the Azov (Ukrainian) Department of Academy of economic sciences and enterprise activity. // In the article « The CENTRAL EUROPEAN INITIATIVE « SPRING - 2000 ». - Mariupol, Report № 7 of Azov Department of AES&E, 2000. - cc.3-14; and in the monography « Substantive provisions and substantiation of the NEW APPROACH » (Warsaw, 2001) see section « Problems of systems of inducing for an agriculture » (pp.67-75).

9. To appeal for(ask) European Parliament to supported, prepared by Urban Duma of Taganrog and Taganrog State Literary Historical-archeological Museum-reservation organized « the Reference in UNESCO » about the recognition of a Tana-Rog (Hupache) by one of most ancient cities of Europe (of 2700), which one was based as urban colony Mileta. And the urban life, in which one was revived after returning of the native born urban Greek population in 1780 under spiritual leadership of the Sacred Ignatius, Metropolitan Gotey and Cafa. Even 40 -minute expeditions(dispatches) on coast in center of Taganrog has allowed to find seven pieces Greek Amphor. // Materials of Expedition(dispatch) № 1 students TIM&E and employees of a museum from 29.04.2002 in the Report № 9 of Azov Department of AES&E (Mariupol, 2002). - pp .47-56; and in the article « a Forgot card: than Taganrog are much older official version » in newspaper of TIM&E "«Almamer" №4 (25) 2002. – p. 2.

10. To appeal for(ask) European Parliament to supported, prepared by Urban Advice of the People's Deputies of Mariupol and Mariupol Local lore Museum organized « the Reference in UNESCO » about the recognition of Mariupol, Old Kremnes, one of most ancient cities of Europe (2700), which one was based as urban colony Mileta. And the urban life, in which one was revived after returning of the native born urban Greek population in 1777-80 under spiritual leadership of the Sacred Ignatius, Metropolitan Gotey and Cafa. // In the newspaper of TIM&E "«Almamer" №№ 2-3, 2002; in the monography « a Transactions of millenaries » (Mariupol, 1998) is present in the Library of a Congress of USA; and in the article « Mariupol - Kremnes - new date and new ideas » in the Report № 1 Azov Department of AES&E (Mariupol, 1999). -pp.61-63 (it is present in the Library of a Congress of USA).

11. To the ministries of an agriculture together with branch institutes of central european countries to execute(come true) mining of a comprehensive programme on development in Central Europe « of Companies of shared use of agricultural machines » on period till 2010. The program will promote intellectualization of a labour in agro-handicraft ethnic-

social layers of central european countries (Poland, Ukraine, Belorussia, Russian Federation, Slovakia, Slovenia, Serbia etc.). By the way, it is necessary to us in Ukraine to recollect period from 1917 g up to 1930, when in 1926 third farmers itself has come to practice of shared use of permanent assets at processing of ground (!). // In the report « Shared use of machines - unique direction of reforms in an agriculture of countries of Eastern Europe » (Kelce, 2001); And in the monography « Substantive provisions and substantiation of the NEW APPROACH » (Warsaw, 2001) in the chapter 6 "«From" abnormal » businesses and myth about Power of the property to reallocation of the responsibility » (pp.102-116).

12. In composite period of implementation of the integration

programs in Central Europe it is necessary to not lose a ethnic-socio-cultural potential of a agricultural-handicraft layer in the independent european states. There is a unique actual path - mining and implementation of special purpose-oriented programmes. We offered such program for Poland in 2001, that has found support in Institutes of a Polish Academy of sciences, and a rod of an implementation of a program should become creative groups of the professors, teachers, teachers and businessmen fixed behind each agricultural region. Thus it will be possible to overcome a phase of destruction and "«immorality" in conditions present of ethnic-socio-cultural cycle not only in Poland, but also in Ukraine, Slovakia and other states with vast agrarian sector. // In the monography « Substantive provisions and substantiation of the NEW APPROACH » (Warsaw, 2001) in section 5.5 « the Fifth step – ethnic-socio-cultural «renewal» (pp.94-96).

13. It is concrete for Poland have offered following main additions(appendices) to «to the Pact about development of an agriculture and agricultural regions »:

1. To supply(ensure) by 2010 at the expense of means of the program SAPARD financing of an ecological agriculture on 2500 farms;
2. To pay the special attention to financing of researches and production a vegetative squirrel (tendency of the global market), organizing international cooperation (Ukraine, Byelorussia, Slovakia, USA etc.);
3. Emergency to conduct researches about capabilities of the expanded production flax, hemp, specially, in facilities(economy) up to 7 ga. Having studied all possible(probable) development trends of these productions;
4. To put into production a pilot batch of plants on bio-fuel, using a scientific potential of Institute of a biotechnology of a food-processing industry and IBMER, having studied the programs of appropriate technological and raw maintenance at the expense of financing under the program SAPARD (reallocation isolated of means);
5. To initiate with implementation of concrete measures on creation of alternate power sources in facilities(economy) up to 15 ga.;
6. To put as primary goal before administrations of agricultural regions a decrease of contamination of drains on 50 % by 2010 (mining IBMER etc.);
7. To create at the expense of means of the

international help the all-Poland of farmer's INTERNET - NETWORK, having enveloped it practically all 2 million. Facilities(economy). // In the monography « Substantive provisions and substantiation of the NEW APPROACH » (Warsaw, 2001) see « instead of an epilogue » (pp.143-148).

14. To execute(come true) presentation on international economic Forums (in Davos) and in working Committees of Commission of European Union the control circuit complex IER "«Crimea" and «subjects "(component it), and as an information material to present a package(packet) of the legislative documents regulating creation, control and development of an infrastructure IEER «Sivash". The authors consider(count), that the system of flecsibil's interaction, both with bodies of state power and control, and with the subjects of enterprise activity, allows adequately to react(respond) to changes in market environment. // the Certificate on state registration for № 947 from 5.02.98r. «the Programs of re-structuring of economics of Independent(autonomous) Republic with allowance for world economy of processes by a complex(integrated) branch and territorial zoning »; SHEET - RECOMMENDATION in Committee under the State Premiums of Ukraine in the field of science and engineering on cycle of activities on a subject « the Main theoretical and methodological problems of overcoming of system crises» (Gov. reg. № 47). - Crimea-Mariupol-Lysk, 1999;
15. To distribute in working Committees of Commission of European Union as an information material a package(packet) of the legislative documents regulating creation, control and development of a Volynsk-Sociaty-territorial complex (projects « Pure Bug », IER "«Svityaz", IER "«Novovolynsk", Interport «Kovel"). // Euro Region «BUG": foreign trade activities of a Volynsk-Sociaty-territorial complex. - Lusk, VGU, 1998r. (208 p.); a SHEET -Recommendation in Committee under the State Premiums of Ukraine in the field of science and engineering on cycle of activities on a subject « the Main Theoretical and methodological problems of overcoming of system crises » (Gov.reg. № 47). - Crimea - Mariupol-Lusk, 1999;
16. To distribute in working Committees of Commission of European Union as an information material a package(packet) about creation of between frontiers of territorial-production association « the Azov Region (Euro-region)» with the appendix of the report « Development of scientific directions of the Academic Mariupol school (report to general meeting of Department of economics NAS of Ukraine) » (Mariupol, 1997). To pay the special attention, that many in Francium and in Germanium "«drave" to European Union on rails « of Russian Providans» (Chairmen Mr Darcy abandoned Mariupol by last in 1920 with the documentation). // In the article « Azov Euro-region is a step in actual structural modification of economics of Ukraine » (Yalta - Фopoc, 1998); a SHEET - Recommendation in Committee under the State Premiums of Ukraine in the field of science and engineering on cycle of activities on a subject « the Main Theoretical and methodological problems of

overcoming of system crises » (Gov.reg. № 47). -
Crimea - Mariupol-Lusk, 1999;

17. To distribute as an information material for the deputies of European Parliament of the substantiation of scientific directions « Effect of Greek-meoty culture on the civilization's processes in the states of Western and Eastern Europe » and «Historical and cultural sources of social and economic development PriAzov (retrospective analysis of effect of tatar's cultures) ». // In the Report №5 of Azov Department of AES&E, 2000 look page 29-47; in the Report №3 of Azov Department of AES&E, 1999 see page 29-55; and in preprint of the report « TRADITIONS of MILLENARIES: From the Athenian Academy to the Academic scientific advice of Mariupol - Kremnes (activation from 1470 of search of paths of intelligently - spiritual growth(increase) by the descendants of Greek on ashore of Ancient Pont) » (Mariupol - Kremnes, 1999, page 19-56), which one is in funds of the Library of a Congress of USA.
18. To recommend to Committees on education and culture in the european states to execute mandatory teaching of dialects, as the minimum up to the fourth class of a comprehensive school (outcomes conducted in PriAzov of researches can confidently be distributed to all countries of Europe), organizing then courses, which one to enter and in higher educational establishments. // In the article « Forgot renewal» in the Report №5 of Azov Department of AES&E, 2000.- pp.18-28; in section « From shores Ancient Pont – the Mariupol's Greek company supports fundamental science » (engl.) in the Report № 7 of Azov Department of AES&E, 2000.- pp.41-46.
19. For preservation of historical MEMORY about a famous history of Cossacks to prolong creation of a Historical and cultural complex «Farm "Catholic » (in 25 kms. from Mariupol). Resting on support First Getman Ukrainian Cossacks Vyacheslav Maximovich Chernjvil on a World-wide Forum Ukrainians (1997) and on the solutions of international conferences to recommend the following text on the Memorable Sign « to the COSSACKS and to the OFFICERS-«the ATAMEN» a TROOPS AZOV (1828-1866) from THANKFULL and INDEPENDENT UKRAINE. The descendants never will forget of YOUR EXPLOIT! » //In section «To the COSSACKS and OFFICERS- «the ATAMEN" a TROOPS AZOV (1828-1866) from THANKFULL and INDEPENDENT UKRAINE. » In the Report №7 of Azov Department of AES&E, 2000.- pp.37-40; the solution of the Topolinsky's agricultural advice from 20.04.2000 (№ XX111-13/73) about granting of the sanction on selection of ground for creation of a Historical and cultural complex «Farm "Catholic », supported by Most Great Army by the Don, Rostov-on-Don (Agreement №4 from 29.03.2002., Signed Vice-chairman Regional Administration, Army Ataman V.P. Vodolacky).
20. To appeal for(ask) Supreme Advices (Rads, Duma) states of Eastern Europe to consider a capability of financing at a state level of the program « MINING of the MAIN(BASIC) METHODOLOGICAL And METHODICAL RULES of an OUTPUT(EXIT) of UKRAINE And STATES of

EASTERN EUROPE` FROM SYSTEM CRISIS», executing(designing) the guidelines of Maximum economic advice of Independent(autonomous) Republic of Crimea from 17.11.1997 (Minutes № 42). // the SUMMARY on cycle of activities on a subject «the Main theoretical and methodological problems of overcoming of system crises » (Gog. reg. № 47), Ukraine, put forward on The state Premium, of 1999 - Crimea - Marupol-Lusk, 1999.

21. In connection with ratification by Supreme Advice of Ukraine of the Kiot's Minutes to offer the deputies Supreme Rads of Ukraine to acquaint with outcomes of ecxology-social simulation in PriAzov (period since 1958 for 1990), so-called by transformation of the approaches of group of Meadows to PriAzov. It will allow

to see, that the Sociaty «on manual handling » and in full relation to scheduling of this or that power structures with a large difficult transactions can execute(design) Protocol. // In the monography « substantive Provisions and substantiation of the NEW APPROACH » (Warsaw, 2001) in section 7.1. « of Destiny of a World - eyes of the writers of models and books «Boundaries of Growth» (Meadows, Dennis H., Donella L. Meadows, Jyrgen Randers, William W.Behrens, 1972) and « New Boundaries of Growth» (Meadows, Donella, Dennis Meadows, Jyrgen Randers, 1992) » (pp.120-142).

The note: we do not carry out on discussion the initiative of realization of Sovetkin-Taylor Readings (Heritage D. Sovetkin and F. Taylor), realization of theoretical and methodological seminar of MEMORY of Vice-director of Institute of экономико-legal researches NAS of Ukraine, academician of Academy of economic sciences of Ukraine Valentin Victorovich Finagin «the Azov Region - on a fracture of technologies » and the scientific - practical conferences of MEMORY of the professor RAGS Victor George Lebedev, President AES&E, professor Vadim Nikitovich Kirichenko and President of a Polish Academy of sciences Miroslaw Mossakowsky, since these international measures already were held in 2003 and it is necessary only to support of the pioneers, and it already completely lies on CONSCIENCE of a managers of Inter-regional Academy of Management of Staff, NAS of Ukraine and AES&E.

AT a LEVEL of FIRMS And ORGANIZATIONS

We would not justify the scientific activity in industrially an industrial centre of Eastern Europe -Mariupol, Old Kremnes, if have not the registry of perspective new technical INITIATIVES for firms of industrial branches, which one were developed by us since 1977.

22. Is offered special high corbon's and chrome's materials 300X30MFD (Auth. Cert. № 722347), 300X30MFDU (Auth. Cert.. № 722348), 300X30MFDUCH (Auth. Cert. № 797155) for the tool of manipulators of robots removing fuel containing weights on 1Y the Unit Chernobl's AES. Outcomes of researches on stand of physics of PriAzov's University on a subject with Ministry of USSR «Research both intrusion of the cast tool and parts of the metallurgical equipment from completely alloyed materials » (agreement № 22/03). // In the monography « Cast high-chromium materials for the

tool » (Mariupol, IESCR, 1993); in the article «Wear-and-tear and heat-and-tear of the carbon's and chrome's ALLOYS » (УДК.621.78:535.211) /in book. MIS&S, Moscow, 1991. - pp.115-121.

23. For firms of metallurgy and machine plants is offered by production of large castings some designs of internal chills. The designs have passed experimental check and their effect on process of a crystallization of metal and transfer's mass is studied on models. // Auth. Cert. № 706191; Auth. Cert. № 761136; in the monography « Cast high-chromium materials for the tool » (Mariupol, IESCR, 1993). - pp.91-117.
24. For firms of metallurgy and machine plants is offered by production of accountable castings to execute general(common) and local alloying of metal in the form by special designs of internal chills and fluxed inserts in feed systems. The designs have passed experimental check, and effect on transfer's mass is studied on models. // In « the quick Reference of a foundry hand » (Donetsk, 1983) on page 102-104; in the monography « Cast high-chromium materials for the tool » (Mariupol, IESCR, 1993). - pp.117-121.
25. Is offered for firms of metallurgy and machine plants designed technologies of a casting of large parts from of complex alloying alloys. There is a unique experience of a casting of such parts under production conditions in weight up to two tons. // Auth. Cert. № 808199; in the monography « Cast high-chromium materials for the tool » (Mariupol, IESCR, 1993). - pp.88-105.
26. The methodical approach of obtaining of complex alloyed materials with previously given properties is offered for usage. The technique wastes on high-carbon's materials (a series of the copyright certificates on designed alloys is obtained) and is protected at a level of a candidate design in 1982 (HAC USSR). // in the monography « Cast high-chromium materials for the tool » (Mariupol, IESCR, 1993). - pp.33-87.
27. For industrial and scientific laboratories a series of techniques of accelerated definition of the physical-mechanical characteristics of materials is offered, which one have passed experimental check and have shown safety. // In « the quick Reference of a foundry hand » (Donetsk, 1983) on page 7-19, 61-62; in the article «Wear-and-tear and heat-and-tear of the carbon's and chrome's ALLOYS » (УДК.621.78:535.211) /in book. MIS&S, Moscow, 1991. - pp.115-121.
28. For mechanical engineering firms the design and material of an insert of a combined title block of hot-working of materials is offered. Are available experimental facts. // In « the quick Reference of a foundry hand » (Donetsk, 1983) on page 135-137.
29. For model's segments of plant and department of plants the design of units of model complete sets is developed and intrusion, that increases productivity(output) of

division in some times. There are outcomes of an intrusion in industry. // In « the quick Reference of a foundry hand » (Donetsk, 1983) on page 54-61.

30. For all firms of an industry is offered intrusion normative base for implementation of cost-accounting relations,, the retrieved relations are most powerful for the engineer by the proof of availability of the Law of PRESERVATION of a LABOUR. // In the monography « Labour fundamentals of a methodology of pricing (methodical minings for an industry) » (Moscow - Mariupol, 1992); in the Report №1 of Azov Department of AES&E, 1999.- pp.70-74.

The note: we do not carry out for discussion of a problem of creation of stand of biotechnology in PriAzo's State technical University (for the first time problem was put in 1987. By the Mariupol division of SRILabour GovLabour of USSR), since the times «zgezelenkovshina" have passed also new rector PGTU, academician, the professor Vyacheslav Stepanovich Voloshyn already has accepted a positive solution in 2003.

AT a LEVEL of WORLD (GLOBAL) SOCIATY

Just, such scope of a problematics has allowed us, eventually, to leave on a level of the methodological initiatives distributed for limits of Europe.

31. To pay attention a public the Latin American States to expediency to return to consideration of idea about creation of the Latin American Association of social integration (LAASI), which one was discussed under our initiative in 1997 on Y1 a Congress of Association of the economists of countries of Latin America and Caribbean Basin and 10-m congress of the professional scientific economists of countries of Central America and Caribbean Basin in Habana. LAASI at the expense of formation of a supranational ethnic-social administrative layer on the Latin American continent should intensify integration process. // a Sheet - Rercommendation in Committee under the State Premiums of Ukraine in the field of science and engineering on cycle of activities on a subject « the Main theoretical and methodological problems of overcoming of system crises » (Gov. Reg. № 47). - Creame-Mariupol-Lusk, 1999; In preprint of the report «We should recognize that us integrates» (fulfilment of the guidelines Y1 of Congress of Association of the economists of countries of Latin America and Caribbean Basin and 10-th Congress of the professional scientific economists of Central America and Caribbean Basin).- Mariupol (Old Kremnes), IESCR, 1999. - pp.7-18, 30-37, 73-78.

32. To offer to the professors of carrying on Universities of Europe, America, Japan, Indium, China and Australia to use in practice of teaching modern intellectual(intelligent) achievement of economic thought - Law of PRESERVATION of a LABOUR and Law NO-DESTROY intelligently - spiritual of LABOUR. The economic science is obliged to these achievements of activity of international public organizations: the New York Academy of Sciences, Publishing House «Who is Who» (USA), American Biographic Institute,

International Biographic Center of Cambridge, International Biographic Association BC of Cambridge. // In Publishing House «Who is Who in America» and To Board of Advisors: Mr. Mindy Aloff, Freelance Writer; Mr. William C. Anderson, Executive Director American Academy of Environmental Engineers; Mr. Steven C. Beering, President Emeritus Purdue University; Mr. Willard L. Boyd, President Emeritus Field Museum of Natural History; Dr. Thomas C. Dolan, President and CEO American College of Healthcare Executives; Mr. Charles C. Eldredge, Hall Distinguished Professor of American Art University of Kansas; Ms. Barbara Haskell, Curator Whitney Museum of America Art; Mr. Thomas R. Horton, Former Chairman American Management Association; Mr. Jill Krementz, Author and Photographer; Mr. Charles F. Larson, President Industrial Research Institute, Inc.; Mr. Andrew Leckey, Syndicated Investment Columnist The Chicago Tribune; Mr. Judith P.
