7. «For MEMORY on many years about The honorary fellow of the scientist of the advice of Academy ES&E in Ukraine, grand-grand-granddaughter Officer Azov's Troops - Descendant Ataman of Zaporozhskoi Sechi Moiseya Grigorevicha Catholic, Olga Wladimirovne Wasilievoj studying for many years in Institute - TO APPROPRIATE its name to Institute ESCR which with 26.07.2005 yr. will be nominated of «Institute of economical and socio-cultural researches named Olga Wasilieva-Catholic» (The order of director IESCR from 26.07.2005 yr.).

Instead concluding - «**This was very proud flower ...**» (Antuan De Sent-Ekzupery, «Small prince» - 31 July 1944 yr. his airplane did not return on basis which Devis Clayton searched all life ...)

## The destruction of gender's conservatism.

As-that is not accepted to speak of Wives the life of known practitioner of science, as about rare and bright interesting persons. Generally these women as-that are dissolved in their husbands; In their work; In their interests. About them mention insignificant and to word. The nobody of them The days of birth, general, does not note. And the ambassador of them appearances «in the best World» - does not note of round dates such modest, but in most, as to-insisting, of unordinary Keeper family warmth and comfort, and on historic turnarounds, often, of alone true spiritual holder «belligerent with its thinks» spouse. It is all the more, as-that even «Is fashionable » in achievement by the husband of fame, where-that on 45-th or 50-th year lives to change to doctor to-academician its “Second Half” and already with young wife to continue, and or rather, to use the fruits of the active creative work of the first self intensive period Entries by profession.

Not wanted to manifest of cant condemning such practice. But something in these «Natural the turns of life» national intellectual persons causes misunderstanding and melancholy. As-that not wanted to think of motives and the peculiarities of moral installations this being able to live «talented man ». It is general, when shall learn about such fact that simply wanted him to overlook, To try do not discuss «inconvenient» topic.

That is why let us to find those gifted by superior forces the families of scientists, on way of life which, real, can be seen with admiration. Let us to infringe tradition forgetting true Wives lives. It is all the more, what today in “dynamics” turns in East Europe very bright manifest the most abyssal strata of spiritual culture and traditional for The east Europe of intellectual flows practically in every independent person. But especial, this manifests in people who sincerely love its earth, its region. And will not shout with the scenes of various levies about its love to “native earth” and nation, and modestly each day working, “bring in sacrifice” frequently all in behalf of conservation all kind and eternal on this Earth. And they this make not only in behalf of its native, and it is knowing in behalf of all us, because such actions accord positive influence on the stretch of decades on hundreds of, and today already and on millions people.

In this Bulletin 2012 yr., just like into all for 2007-2010 yryr. we try to give to more complete insight into the processes of formation and the developments of social academic patterns and real democratic traditions in one of the most interesting regions of Eurasia in Priazove which, as to - to opinion, Olgi Wladimirovny Wasilevoj (Uukhno-Catholic) - **impossible to dislike.**

### 1. Studies – Entrepreneur – Farm “Catholic”.

Was given birth to Olenka in 1932 year in Mariupol in home along the street Kirova 120 in the family of Vladimir Grigorevicha Ukhno, Master as to tree and carpenter, as well as best player on manual organ on entire Nikolsk's farms and superior son in large family Grigoriya Ukhno, like, of self active and industrious family on Farm Catholic. Yes and not surprising, because Grigorij Ukhno was alone employee at Ivana Moiseevicha (Evseevicha) Catholic, elder son celebrated in Zadunaiskoj-Zaporozhskoj Sechi hereditary Ataman Cossacks-Gothas who so brightly managed to arrange the migration of is unresigned Rytsarskogo Ordena Europe –ZAPOROZH's Cossacks in Calmous's Palanka in villages Starodubovku and Petrovskuiu, what only today through 200 years old opens before us depth of the creation aim of the protectors of the Cristian World of Eurasia (Timuchina-Subedeja-Ploskyni-Burundaja-Bajdy).

Four year already was Nine and three year Ivan, but Vladimir Grigorevich waited else son. However necessary was be given birth to in 1939 yr. another daughter Walia, in order in 1941 yr. Evdokiya Timofeevna Ukhno (Chernyavskaya) gave birth to long awaited Zheniu (Evgenij). On Evgeniya was then all hope at father, because in 1940 yr. Vanya (Ivan) went away from life. Though this occurred due to disease, but name, in this not vital fortitude the male line of Chernyavskikh-Catholics (line came from Evdokiej Timofeevnoj), apparent, very bright was manifested Aristocracy (the hereditary reduction of the viability of boys due to the consequences of accelerated the intellectual-spiritual growth) of two ancient act of delivery of Europe.

But what does not manage to carry out to strong sex - manages to mothers and wives who not only preserve life on earth but also actually preserve the tempo of the development of our civilization.

That is why from the position of the today's understanding of influence «clever» genetics does not cause surprise what Olga actively aimed to study and at it this well was gained. It is certain, family practically robbed by power rural employee, lived poor, but in school children forwarded. Lack money on text-books to all children. That is why the most capable studied as to books which took on a few clock and by night standing under self bulbs on butter aimed to read all what gave to learn at home. AND Olga aimed to help parents and earned its small money on bazaar (small traditional market) selling summer to trading old women water. We today with humor can about it speak, but because this was entire technology. Necessary was to take cubic content and for cent to go and to fill it by water, and then to buy on cent ice and to dip ice in water in cubic content, and only next with by glass cup and cubic content to go as to rows and to offer trading old women to buy waters - «Is cold water!» (cent by glass cup). And such business initiative in 8 years old (!), and main - absolutely successful «business project», because practically all text-books Olga subsequently bought, name, on these money and even any things. It is interesting, what behind this project lay LABOR; Not speculative combination, and designed aspiration to render real and necessary service.

But for us was small opening what bazaar (small traditional market) was on the spot modern DOSAFA (of the altitudinal building of in the end avenue Lenina) in traditional historic downtown else till war (till 1941 yr.). And about it the arrangement of the center of commerce in historic place Olga Wladimirovna spoke, as about something usual and trivial, to and me all at once were recalled archival lines about Pravoslavnykh Church row. And main – bazaar (small traditional market), as alive and intensive center European Greek police (till 1859 yr. to become inhabitant in Mariupol not Greek was practically impossible), occupying on Sobornoj Square, working more 150 years old (!). What deep and good traditions for the development of creation business initiative which meanwhile so and did not disclose itself in complete volume.

Us in 70 years of XX st. actively studied that rich dislike nation, but Grigorii Ukhno, Grandfather Olga, told her so much good about Catholics which even till us send family narratives about honesty and bowel hereditary Atamen of Zadunaiskoj-Zaporozhskoj Sechi. It is name, Grandfather Urka (so Greeks named that, who had name Grigorij) told, as him «old Catholic-woman», the mother of the son of Ivana Catholic, gave to debt 40 roubles for the purchase of two cows, and self Catholic about the terms of returning of debt said simply - «will return, when will have». Let to us, somebody today will tell Fantasy, what someone occupied of 5-six 1000s of dollars and him did not establish of the term of the return of debt ... Like, will be not found such «air-monger» nowhere on the territories of Europe.

Реконструкция «Хутора Католик»  
по картинам А.И. Купинки 03.05.2012 г.

Yes, other was real history in Priazove, absolutely other. And certain, not only everything was otherwise in Priazove but also on all Ukraine ... Are reading of unmuch yellow certificate and the extract of orders and do not understand, absolutely do not understand of the disposition of documents which as to what those «for cloudy» reasons emphasize the voluntary disposition of every serious deciding which accepted citizen USSR (USSR) at the time. Why was this to emphasize? What for all this «fixing behavior to state» bureaucracy aim?

For reading this Bulletin, possible, something will brighten. It is all the more, what exist much interesting even in фрагментарных pre-war recollections retained in family Evdokii Timofeevny Ukhno (Chernyavskoj) of and Wladimir Grigorevicha Ukhno. Olga Wladimirovna, Nina Wladimirovna Walentina Wladimirovna as that time recalled that native their aunt Anna who was married for engineer Pavlovym and lived in Mariupol in «elected» area, not one time asked Evdokiia Timofeevnu to give her on upbringing one of daughters (at Anny was not its children). Evdokiya Timofeevna went to them «as to affinal, but, certain, for money» to fulfill homework. It is general, such approach is characteristic for Asia and in it no nothing adversarial. But, certain, Evdokiya Timofeevna and Vladimir Grigorevich disagree on entirely alluring as to modern yardsticks proposal. It is by the way, engineer Pavlov was by urban deputy, in other words had that status, to which so unsuccessfully aimed Ivan Moiseevich (Evseevich) Catholic, desperately working on earth and buying lands for possibility to fulfill property condition on urban deputy. And this too retained family history, and or rather, the explanation of the real fact of selling 21 decimal size imparted by sister to Pelagei Kamaevoj its brother to Ivanu Catholic. And nevertheless influence the family of Catholics on urban deputies trunk rendered, but already through urban deputy Pavlova, got married on Anne Matveevne Kamaevoj. As see, “empire’s wise persons” hypothesize creating irresistible barriers various conditions, and God situates finding the simple and efficient ways of rendering of positive influence on the dynamics of social processes in the same area and in too time.

But came unexpected, for Priazovia war ambassador all arranged hungry years, in which family lost the most dear - mother, Tatianu Matveevnu Chernyavskuiu (Kamaevu), of and father Timofeya Grigorevicha Chernyavskogo, highly professional sew-man Pole, but inclined to truely Russian «diseases» (at the time drinking - dranked practically everything). It is however, who by summer of 1920-th year could hypothesize that are developed the plans of creation the first and self frightful hungry year. Nothing distrusting, family all bread sold and bought home in Mariupol which after the death of father and mothers, Tatiany Matveevny, children all at once abandoned and already never in it did not return (generally even did not recall, as if and was not this large, of but really very tragic purchase). All family went on Farm Catholic and Wasilij Catholic allowed by him, to as dependents, to build home on its earth which was retained up to the present time.

The entry of German troops in Mariupol was remembered Ole what the mother of two day constantly cried and «pulsated head about door» (she should be to give birth to Zheniu/Evgenia, and husband retracted on «butchery»). Because Wladimir Grigorevich received invitation in army from Military committee and him should be to forward on front. This was not the first mobilization who with standed Wladimir Grigorevich. The first conducted «it is of one's own accord» Nestor Ivanovich Makhno who round Farm Catholic on hills set machine-guns, and then began to ask, who wants «own accord be written down in him army». It is certain, in such «motivating influence» were written down all men and all they send in the rows of army N.I.MAKHNO aside Perekopa (Creamy), but not send. Without them took Perekop. Too occurred of and 8 October 1941yr., when Wladimir Grigorevich by sack with things went as to railway station in search for its train, and German army (SS) on the new motor cycles to come in city through Novoselovku along the street his home demonstrating technology and good form. When Wladimir Grigorevich, having not found nobody, returned home from railway station - already all shops were robbed. But in Mariupol was not what withstanded Odessa during «the power absence» before entry of Italian and German troops. There “transformed in beasts” from large hate to former chiefs neighbors cut and killed «its enemies», not seeing, neither on what. Violence never and neither for whom did not pass by gift. In these else time all in East Europe

were sure. It is that is why, the first - what made German Administration - this exhibited on show everything corpses from Prisons NKVD which did not have time to bury (many of which resided in old katakombes), and caused all population of city to pass close and to see. Seen - shook all citizens. And this was conducted German Administrations on all occupied territory. It is like, that is why nobody, who was in occupation, after war in leadership never set forth.

«New Order» promised everything in Germany good life and in the locations of recruiting were built in queue Mariupol's Greeks, for which German Administration retained under Mariupol collective economies (farm turned out to be efficient); and all offspring's Cossacks enabled to return on its lands and farms. Aunt Pasha, the sister of Wladimir Grigorevicha unreflecting went on «Native earth», and Evdokiya Timofeevna feared even think about its rights, because its brother Kuzma Timofeevich Chernyavskij was one of active rural communist (he alone with farm ended Gimnaziya and to remain outside party him would not gave to). He was till that «supporter to ideas» (about it Walentina Timofeevnapotom spoke to humor), what barely not carried ante mortem by famine its own family, during all the selections of bread. Him specially on by home horses sent, in order at least on Oves survived. It is real, was high education man whom valued (for its life three shining of library gathered). That is why him one of the first after the war onset forwarded on Altai. Olga Wladimirovna on all life remembered address - where Evdokiya Timofeevna wrote letters.

And self Olga its mother on summer gave Aunt Pashe on farm Catholic, where the child mouths of cows and horses, as well as and Gusi. Very heavy recollections at Olga Wladimirovny remained from farm that time, because she twice on farm drowned in river, when did not manage to stop «Disbanded bestial». As she spoke - «horses went at mountain, of and cow at valley, and I cost middle and cry», and Gusi generally float out and to stop them was to child impossible. Here is then being tortured to stop float out Gusi, she in the first time and drowned - «Majka have rescued», and second time have rescued familiar from farm («had time to grasp for hand») which said Evdokii Timofeevne, what «girl necessary to retract with farm». It is certain, Evdokiya Timofeevna this made, but farm much gave to family, because «beside river everything grew» and Olga with mother not one time returned by morning with farm, transporting crop passing from 3 clock till 8 clock of all 25 kilometers till Mariupol. In one of such «auroral promenade» Evdokiya Timofeevna turned around to daughter, showed on the Messr's home of Catholics and said with pride - «this lives my natural uncle». Also seriously she showed Olga «two graves» (the academic science of them names by mounds, and nation «grave» - what scientists did not understand?!) who in 1997 yr. to us showed Olga Wladimirovna Wasileva (Ukhno), when with all the employees of Mariupol's Museum went after meeting in chiefs of city on farm Catholic. And this was said to so, what, real, was not forgotten. And today about «graves» at farm Catholic already till the latest days of our civilization will remember all Christian Europe owing to labor such sincere workers, as Dmitrii Eremenko, Liudmila Malenko, Arkhip Kuinji, Lel Kuzminkov, Valentin Konstantinov, Valerii Vasilev, Irina Khilobok (Chernyavskaya), Zenovij Sokolovskii et al.

Much worked family Ukhno on farm Catholic helping aunt Pashe to conduct economy. Evdokiya Timofeevna along with Wladimir Grigorevichem and children completely renewed adobe cabin (made new all walls and to make warm him, covered walls by blanket). Wladimir Grigorevich made all windows and doors - retained till 1996 yr. Restored «distinguished» cellar, where stored before by trip on bazaar in Mariupol Dairy which did opulent family Ukhno before 1917 year (everything began with that two bought at Greek on the money of Catholic of cows).

But to live necessary was in city and to nourish Romanian officer with Soldier-adjutant whom determined on stand in the home of Wladimir Grigorevicha Ukhno. Anecdote, but German Administration took off with guarantees Romanian parts. Rumynam gave city, but do not give products reckoning, like, on them alive-resourceful ... That is why, in order do not

provoke of plundering, Evdokiya Timofeevna beginnings to nourish self them. As was grateful Romanian officer Evdokii Timofeevne (!). He even warned its relatively necessity to hide all gold things (two bridal rings and chain, theres seem) which as generally lay under images which can «take Soldier-adjutant». He showed its favorite photographs, among which was photograph Love Orlovoi (this actress till war knew all World) etc etc .

Fortunately laws of war many were not understood. And after the reception of letters from Germany from arrived on work (in Germany) the first Greek osterbaters queues in the locations of recruiting on work westward disappeared. Sly Greeks managed to cheat straightforward German censoring and transmited real information on the difficulties of work and lives in Europe osterbaters from East. They simply in letter wrote that live «it is also as aunt Sima», and everything in them Native knew that aunt Sima already long ago in best of worlds etc. That is why began “to catch people” and the compulsory dispatch of labor resources westward. It is in these circumstances startling, but Evdokiya Timofeevna manifested rare bravery and such qualities which subsequently not time manifested Olga Wladimirovna.

Rescuing neighbors youth from recruiting in Germany, Evdokiya Timofeevna made her acid wounds on body which commission German medicine accepted for pest and did not recommend «Patient» for work in Germany (what and aimed to attain). Such behavior on occupied territory required larger spiritual forces and real (not advertising and single) permanent audacity of insisting bravery.

Also German Administration could not forgive of artificial famine Cossack-Gothas' settlements in East Europe (Cossacks they validly considered by Germans as to blood), that is why, like, so rigidly related to captives Soldiers-USSR, for which in the downtown of Mariupol (where today central park) made camp, encircled territory barbed-wire. And people for barbed-wire nothing did not nourish (generally nothing!). Survived they only for the account of help citizen. AND Evdokiya Timofeevna speaking by everything, what likely among captives exist and its dependents, boiled bucket kashi from “the grains of American bread”, connected in larger bunches onion and other vitamin vegetation. And forwarded Aunt Plough with Olga to nourish prisoners. Aunt Pasha carried bucket, and Olga bunches green. When approached barbed-wire that German sentry launched Olga under wire (by adult to camp to be right for Germans forbade) with complete bucket kashi on the territory of camp and furnished to automaton on Made which became in queue, and Olga by large spoon each in Cap poured welded grains. Bunches green simply threw through barbed-wire. People were to such an extent are impoverished, what command of German sentry furnished to in queue was not spare; In camp was not neither one bunch of grass and on trees was not of bark ... everything ate; And from camp transported «no corpses, and bones». Insisting horror ... (where there all modern «to the films of horrors» ...).

This real nightmare withstanded by girl Olga in 9-10 years old (!). And we and today with labor present, as this could be in real life.

It is especial, all on farm Catholic was remembered exemption, because German officer warned Evdokiya Timofeevna, in order she rescued from the detachments of SS children (felt respectable German something close and native in robust figure Cossack-woman from under Mariupol). That is why Evdokiya Timofeevna took all her children and they were hid in maize between hills on farm Catholic. It is by the way, in this time, as told Alexandra Spiridonovna Klimovicheva in 1996 yr., immediately on farm Wasilij Catholic tried as-that to hide horses, and self about itself and did not think. When him spoke, in order thought about itself, it is proud of spoke - «to me nothing will, I am Catholic». And real, his Germans not touched, but horses took away. Olga Wladimirovna told that was interesting sensation, when they everything lay in maize, and over them quickly flew the bullets of automat's queues, but neither Germans, neither red they did not see, and fight as-that began to move and over Head the azure of sky ... Sensation no real arising ... and any Eternity ... (the very ancient earth of battles on Kalke, withstand epoch-making events, like, admonished of itself). And then everything as-that quietened down, but

when already send in village that saw killed who were already all undressed ... (prowlers all outstriped, as by him this managed?).

War was completed. Youth which danced with Germans quickly forgot about its «Europeans admirers». Wasiliya Konstantinovicha Mulykha serving during occupation in orthodox temple and having time to save in Mariupolskom Temple мощи Metropolitan Gothas and Cafa, Holy Ignatius, quickly forwarded in Jambulskuiu area «on the reverse educate». He ambassador of Kazakhstan already never no longer worked in The Christian Temples of native Mariupol, and only came and struggled for revival

Christian Svyatyn (Temples).

AND Olya, successfully ended school (on photo Ole 14 years old).

In 1948 yr. she behaved in Technical school, in distinguished Metallurgical Technical school The ministry of Ship-building industry USSR which also successfully ended in 1952 yr. As to specialty «Manufacturing welding» having received expertise technology-master.

Within that time its father, Wladimir Grigorevich Ukhno, built kiss the street of houses with team, directed to him of pupils, for which very out-live. This experiences subsequently and shortened the years of life to this professional of its matter which simply could not make bad, because really and very much sensed responsibility (not in example to modern heads).

2. Izhorskij factory - Tselina (Kuragatinskii grain- State economy) – Kirovograd

In Technical school Olga studied well and so much, what her furnished to on Izhorskij factory in Leningrad (modern is Sent. Petersburg).

Interesting was Olge in Sent. Petersburg. She behaved to study in Institute as to its specialty and everywhere had time (on photographs this especially eminently).

It is certain, Olenka was else very young, but even her constantly astonished that justifiable quotient which to it manifested fundamental inhabitants of city.

The they all at once of her «Lent secret passes» having lent all necessary passes (like, all those songs which she sang in kitchen garden in Germans «about Great and Always Conquering country», heard; Yes and not only of song ...), and her friend-women-«Greek» gave only copying not of very necessary technologies and in shops of factory not furnished to - Izhorskij factory always was serious defense factory. In 2004 year Olga Wladimirovna spoke that her then astonished - of «why very much bombs they manufactured ...? Yes and not only bombs ...». Namely on the production of caponiers for coastal guns and were manifested the rare acquaintances of technology and peculiarities casting which mastered Valery Alexandrovich Vasijlev else in Odessa's Polytechnic which headed no-party Prof., Dt techn. scis V.A. Dobrovolskij. But do not use authority «Great Wide World» in mechanics superior leadership could not. Not draw attention which Viktor Afanasevich disagree with two locations of Statute, Moscow give consent and last war youth accepted on one party meeting Old-scientist and Valery Alexandrovicha in its rows (this was interesting ...).

From the first its steps on Izhorsk's factory Olga Wladimirovna was accepted on the appointment of engineer-technology (the first record in «book labour» from 31/07/1952 yr.), and with 1/04/1954 yr. already was translated in the department of welding engineer. Pitter's men that alone business trip in Mariupol, as to which wanted to go great deal old employees «Izhorsk's factory» on the south of country, gave young girl, in order she could meeting parents. Virtual, «Izhorsk's men» made to Olga two-weeks leave of absence. In this arrival Olga in Mariupol Wladimir Grigorevich danced with daughter «distinguished» krakoviak. Yes so, what recalled and in decades ...

AND Olga, just like is put in youth, loved in very intelligent and oldly behold chief the technological bureau of casting shop Valery Alexandrovich Vasiljev. Aside of them everything seemed her «no very clever (mildly speaking)». So this sensation and the quotient of admiration by husband and carried Olga Wladimirovna through all its life.

But such harmonious and serious quotient formed not right away - building of relations was built in struggle with very larger difficulties. «By generator» all difficulties, certain, was Valery Alexandrovich Vasiljev. This He was too correct and honest, and main - and knowing. It is so much qualities for one man, and else and right after war - not many encircling withstanded.

**To and young engineer, thered seem that in the leadership of country everything think only about the interests of state.** Naive? It is certain, but nobody not revision and did not aim to lend mind «young state-man». This naive very costly cost «Bruiser for justice», but tt is surprising all what never, even understanding practical devoted such position, of Valery Alexandrovich this «errors young» did not betray. And maybe this and not error? Maybe we meanwhile else not everything доросли, name, till such as to-insisting civilization positions? It is like, It is like, namely so.

AND by Olga heart understood and accepted these talented, naive, exclusively respectable and industrious man. She refused, all at once from all its admirers, and actually battled out its «Valerika» - in the first instance in purely «женском сражении», and then and in struggle with pitiless system, constantly rescuing and maintaining talented and unprotected from scoundrels and heading dregs (which in the echelons of power always snatched) **favorite man**. You will say that must mild in «Definitions». No no need mild, because human intellect very dear costs and this resource no-recovery. It instantly is destroyed in no-think and no-spit to him to quotient. And here is executive, on all ready and aimed in leadership insignificant-men - these kind more than fair. It is especial, we this sense at the beginning XXI centuries on all territory of Eurasia.

Nobody did not prompt in 1953 yr. to young engineer, to pupil prof. Dobrovolskogo who proposed military institute to make candidate thesis, to take seriously for science. Too is far

from St. Petersburg was then Kirovograd and Alexandr Pavlovich could not give counsel to its most's son, all the more, what self he not very-that believed in the outlooks of research career for normal life. And on this at Alexandra Pavlovicha Vasiljev, the son of book-keeper «Tereshenko's sugary factory», the chairman of Kiev office Moscow stock work-men's association responsible serving and book-keepers «SouzBank» Pavla Antonovicha Vasiljev; Projecting and with teodolite in hands through constipation laying passing by Nikolaevki railway track «Track win» from Moscow till Stalingrad in December 1942 yr. and January 1943 yr., and the ambassador of conversation with Nikitoi Sergeevichem Khrushchev going for troops and heading Kirovogradskoe earth construction control in 1943 yr.- was fairly of grounds. He even did not want institute to finish, and only «played» учебы having prevented this, by the way, and

its spouse Olge Andreevne to receive superior medical education ... But, as neither odd, and where that it was of rights ... to Be clever in USSR - signifies very difficultly live ...

*Hereto, young engineer Valery Alexandrovich Vasiljev decided to participate in modernisation as a minimum all Izhory (such most is possible only till 30 years old). But judging by what on tcilina Valery Alexandrovicha, virtual, forwarded Leonid Ilich Brezhnev which from 500 man at meeting lifted only Valery Alexandrovicha and asked about it is of one's own accord decisions to go in Kazakhstan that evidently - all ideas enounced to leadership Valery Alexandrovichem Vasiljev, were as to main parameters correct and perspective. **Clever think and reasonable proposals not profoundness.** It is certain, them often implement already other people, but, name, **they accelerate the development of all our civil technologies and create the real phenomenons of culture preserving and developping spiritual.** It is so*

*complex, like, Valery Alexandrovich then did not dissert. He simply wanted actively and unequivocal to build Great State which ambassador of war recieved new breath, as seemed to youth. But, name, same state wanted to build and Olga.*

It is that is why, when Valery Alexandrovich with the suit-cases of books as to rural economy of and agricultural technology left on tcilina, for Olga in St. Petersburg everything became arid. She actually on all its career set cross and went to rescue its «Valerika», because by female heart felt that on tcilina he without it simply profoundness.

*We much speak of December-men and about their wives, but for this country «Decembering» this permanent state for every new generation of honest people.*

*In order to throw St. Petersburg and to go in steppe in organizing, where director next «Cad-man», necessary to be very bravely man.*

*But what is necessary to be woman, in order of one's own accord to go there where actually only for very serious acts against existing system furnished to on couple of years (and not above!). Yes, by much even will not understand today that inner Spirit the youth 50 years of XX st., when such impulse was possible, of that highest level spiritual which lived the most sincere and high moral persons. **It is real, war and the tests of hardened people. Best of them in***

behalf of its convictions were able on much and not teetering committed act of braveries. Such act of bravery by the winter 1 December 1954 yr. year committed Olga Wladimirovna Ukhno which was calculated from work, left education in institute and went in «Primary Savage Tartaria». But hit not to normal Steppe-men, and in organising, where director, real, was real Cad-man (Khaimovich), of signed a few cables of-calls (only in «book labour» exist two reference toes cables from 12/11/1954 yr. and from 27/11/1954 yr. who Khaimovich called Olga Wladimirovnu in built-up area Kuragata Jambulskoi area!), all at once as to arrival refused in employment technology-master as to «welding manufacturing» Olga Wladimirovne Ukhno (what «Cad-man CAD»!). This in the presence of the large park of tractors T80 not necessary-masters welders!? Difficultly be rid of sensation which such CAD simply tried to annihilate young by seven hands of immoral and boneless caitiff Khaimovicha, as aiming to forward «from Kuragaty and Kazakhstana» do not “wait rescue-woman”.

And this «beastliness» on Russian even to write normally did not can - «is not accepted on work in Grain economy «Kuragata's» in connection with **not-having** works as to specialty. Director Grain economy «Kuragata's»/signature/Khaimovich- Cad-man» (02/01/1995 г.). In what book

and in what dictionary he subtracted word «**not-having**»? It is real insisting «CAD» ... And someone speaks that surnames are given accidentally and they do not reflect the man's essence.

**But because grand-granddaughter Moiseya Grigorevicha Catholic, last Hereditary Ataman Zadunaiskoj-Zaporozskoj Sechi, struggled for her favourite MAN.** That is why neither «CAD and Khaimovich» her to prevent could not. She all at once to make better “hole’s house” in housing and already by evening Valery Alexandrovich could normal to have a rest, and through a few days made entire economy. «Chushka cet! Chushka cet!» - shouted neighbour-woman Olga Wladimirovny being tortured to catch grown on will pig which carefully grew the young wife of engineer in chief Grain economy «Kuragata's» Olga Wladimirovna Vasiljev. Loved Kazakhstan-women young and industrious «wife chief», and she did not stop to wonder to their customs, especial, when young and beautiful Kazakhstan-woman gladding, what her takes in wife by fourth wife seventy old Shepherd. Yes, officially many-wife’s was forbidden, but Kazakhstan-men-Shepherd «for statistic» divorced in Office Government (ZAGSE) with its wives, and continued traditional to live by large Asian family. All leadership this knew, but to fracture formed by eyelids build lives did not consider possible, because only such «brigades» could not on survive in steppes and mountains but also to give larger volumes animal breeding production. In self Grain economy already were cases, when even respected Kazakh had one wife whom sincerely loved. Actually heads of Kazakhstan at the time turned out to be more and away wise «Moscow’s chiefs». And this, real, was truth. As you consider can be considered clever to cause have laughing on the wilderness half by unmooring plough? This till what degree administrative savage necessary was let down (!); If practically everything

Kazakhs who did not finish of universities and did not study abroad in agro-technical academies, but confidently spoke of what their fathers always had laughing something on similarity saha these lands, but drilled only year-two, and then on decades left earth, in order she was restored, and their nobody even to listen did not want. Than all this was ended? And what just like spoke Kazakhs, in the first year gathered large crop which even not all exported and it in throngs «burn out» (grain because necessary to ventilate and to give no him be heated of refused admittance air), and on second year wind two thirds of fields blown way. But otherwise and to be could not, because by unmooring plough lifted on surface sand, cut on shallow morsels all fertile stratum (!). If manage «to cancel wind», then such «wide unmooring folly» have no consequences, but wind nobody not «cancel» - consequences did not cause itself to wait. *Grain economy «Kuragata's»* to departure Valery Alexandrovicha from Kazakhstan turned into *Animals to perform*; though partial, especially in before-mountains, continued to plough and drill. And our tcilina's men else managed drilled square-nest's method which actually was else «more wise», than to plough sand. But, if commission from Region saw that have drilled not square-nest's method that prison to leadership of Grain economy «Kuragata's» was provided. And here Kazakhs, with which Valery Alexandrovich found understanding, again saved position. The fact is that in commission was representative main nation, name, Kossack which is decided was as it should be to accept, and with this end in view invited deserved Shepherd, at which was four wives, to be host, because the banquet ambassador exists interesting and very nice for guests custom ... In too time in submission at Valery Alexandrovicha was very knowing mechanic who previously served on military ships, and technology knew well, so he nevertheless could one field with brim toing thank stiff as to his proposal to wires (machines for drilling square-nest's method do not give, and commission sent! To comment no earthly use ...) have drilled by square-nest's method. Here is to this field of the member of commission and brought and he

with easy soil reported subsequent, what everything was drilled square-nest's method. It is especial, sincerely sounded of it word after holyday (of admittance) next day. Joke and anecdotes, but mastered tcilina's land youth from Ukraine and anticipatorily exempt. It is certain, youth hit right away under influence this «anticipatorily exempt» and situation was valid criminal. Chauffeurs often were drunk and scuffled. So here is everything this scuffles ceased went engineer-chief Valery Alexandrovich Vasiljev. What sensed Olga Wladimirovna for all these months better do not speak, and because she already waited child ... To the end its days Valery Alexandrovich during edibles used fork which he dragged out from its hand after one of such «scuffles». He even of caitiff Khaimovicha (Cad) saved who took due to fear before chauffeurs in militias pistol, and when employees Grain economy this learnt (and learnt right away through a few clock) that sat on tractors - «he in us will shoot» - and went to press Khaimovicha (certain, they were prodded, but ... why was to take weapon; because offered by everything, but nobody from leadership, except Khaimovicha, of this did not make). Only by miracle toing thank what found quickly Valery Alexandrovicha, managed to stop tractors practically at self home (have pressed ...). On following day Khaimovichu said that him more to rescue will not, and he quickly have surrendered weapon in militia.

Such extremum's events could not pass by gift and Olga Wladimirovna greatly have ached, but nevertheless could to give birth to son and on the grounds of her disease young family dismissed with Tcilina Land. But till his departure Valery Alexandrovich had time to save by winter in snows sheep having arranged three shock's brigades and these brigades on T80, and owing to adroitness to and acquaintances «Mariner» the they of steel T100 (transposed batten), have breached in snows highway to provenders and saved from hungry death sheep's herds. One of brigades conducted personally engineer-chief Valery Vasiljev. For this rescue of the several 1000s of sheep Valery Alexandrovich received Medal All-Union Exhibition (VDNKH) (because of neither extraordinary events could not arise in USSR and about rescue sheep nobody and nowhere did not speak). Except Medal, he «earned» and revmocardet ... And all life with him struggled and practically conquered, was said to blood Artemiya Vasiljev (Kumpan).

But the most interesting what to Olga Wladimirovne on Tcilina-Land came Evdokiya Timofeevna Ukhno (Chernyavskaya), in order moral to support daughter (!). Her support great deal signified for young family and took off of all tension, because Evdokiya Timofeevna said simply and confident, what everything normally and without difficulties life is generally arid.

Evdokiya Timofeevna and Galina (the sister of husband); Olga Wladimirovna

Subsequently was trip from Dzhambul with small son Alexander through all country in Mariupol (like, that is why Sasha on all life loved trains), and from Mariupol in Kirovograd. Valery Alexandrovich actively searched work as to specialty and him helped the friend of father Alexander Pavlovicha Vasiljev, at the time the employee of central apparatus, Koshuba having arranged direction in Latvia. But Latvia did not like Valery Alexandrovichu (very was there humidity, and at he already was revmocardet). That is why have to were to stop on Kirovograd which in times of Russian Empire was called Elizavetgrad and retained grand caserns Cadet's School opposite boarding-house Noble Girls (its were retained till now).

The most interesting and happy time in youth Olga Wladimirovna connected with Kirovograd, where owing to her family (and this three men) managed Alexander Pavlovichu Vasiljev to receive larger apartment in downtown (the quantity of square meters then even for leadership was dependent on quantity residing). For She was everything well. She lived in the center of good regional city in family one of regional heads. Husband worked in the first instance in Institute, and then on factory. Everything was normal. Son grew and even was bungalow. Truth, minuscule, in which to reside was impossible, because was little air and hot, but round everything grew very violent. Nobody then did not ask from what such violent growth (subsequently already said about nuclear ore under city).

In city it was interesting, though even tiresomely, but Olga Wladimirovna understood that to saturate "vital room" and save time necessary self. It is especial, was spiritual raise after Gagarin's flight in space. In that day everything looked at sky searching satellite. And it is said, found. Appeared familiar, principally from work Valery Alexandrovicha and Alexander Pavlovicha. Women, and this and Olga Andreevna, mother Valery

Alexandrovicha, and the wives of familiar husband, aimed life to make merry and active on how many let family budget. Even sister Valentinu Wladimirovnu from Mariupol Olga Wladimirovna invited in Kirovograd and she studied in Institute, blessing was to whom to help, because Valery Alexandrovich always knew more provincial teachers ... (because him in graduate center wanted to leave prof. Viktor Afanasevich Dobrovolskii ... this about much speaks).

IN Kirovograd of many technical ideas could to put forward on discussion on in Specialized Institutes Valery Alexandrovich, one of which as to creation Konvertor in “steel to pour ladle” used even in Japan (ours to this idea were attributed as generally...). Olga Wladimirovna always maintained husband in his permanent creative search. At the time someone «dream» by machine or what that earnings or bungalow, and Valery Alexandrovich draw and wrote ... Difficultly was in agro-city (was such idea of Nikita Sergeevich Khrushchev about the creation of agro-cities) which actually at the time was Kirovograd, familiar Valery

Alexandrovicha to understand purposes youthful engineer. And this engineer struggled for the optimization of cut out metal in clichéd, what sharply raised exit fit in the scales of everything UEH (so was called integration the associations of the European socialist countries) of. LOGIKA correspondence, especial, when go of proposal turning higher the effectiveness of manufacturing, consists in what answers come through months and years. It is general, at first gains man not real answers, how many nothing signifying letters, and only subsequent, when is furnished to several times specification relatively of made proposal, it is possible of waited the high-skill consideration of substantiated innovation. This is tracked of and relatively proposal as to shall disclose of metal and creations compound-clichés. Else on Tcilina Land in 1955 yr. Valery Alexandrovich received the first answers from departmental ministry. But only in 1965 yr. working on metallurgical integrated plant named Ilicha, managed actual to interest in this proposal of not only domestic specialists but also specialists in Czechoslovakia.

All this time wife «Don-Kihot» must create what society makes with very larger lateness, name, the sensation of significance fulfilled the husband of work carrying out the constantly moral support of him researchers. This, virtual, all these years and tackled Olga Wladimirovna, when encircling practically did not understand why and to whom all this «work» her husband necessary. Only Sergei Ivanovich Plis (the mother of him was German), talented engineer and scientist-casting (studied at school with Borisom Evgenevichem Patonom, and families lived in home «PolitKatorzan»), with which Valery Alexandrovich as to-insisting was friends and worked already in Mariupol, with sincere respect related to what made this thinking and creative man. For this Olga Wladimirovna was sincerely grateful Sergei Ivanovichu. Him with wife always waited and Olga Wladimirovna and Valery Alexandrovich.

### 3. Mariupol - the Crimea - Liverovskie - Cooperative «Drapery»

It is certain, Kirovograd turned out to be small and very really agricultural city for Valery Alexandrovicha, that is why travel in Mariupol in 1962 yr. was predetermined. Nevertheless in this city were the largest allied enterprises, and it unregional disposition of recompense by submission direct industrial giants to

Moscow. New stage in life Valery Alexandrovicha coincided and with new tasks which set lives before Olga Wladimirovnoi. Her is necessary was to learn and to grow son which she always considered by its primary mission, but all along aimed to work. And that level of quotient which was set the department of frames and the

leadership of Izhorsk's factory (Leningrad) actually accompanied Olga Vladimirovnu all life. Her practically always took on engineering appointments, despite what was have to constantly be dismissed due to necessity to arrange the normal conditions of life to son and husband (to principally son).

Yes and on work Olga Wladimirovne managed itself quickly well to show. And she gained acknowledgments of and brevet which to never and nobody did not show, because considered all this usual and not deserving large attention. For Her main always stayed to create warm atmosphere in family and psychological to support «its man».

Her this so much managed that follows on this to stop particular. Such great - and this not more increasing - work managed to carry out to very a few women,

and all the more over decades.

This today in the epoch of

Internet and 1000 television channels, it is as, does not appear of problems with organizing of free time,

and in those years these questions were decided far and away more difficult. That is why so importantly was to arrange that month of leisure which yearly was put to the chief of model shop, and Valery Alexandrovich very quickly became such chief, because that level of activity and payoff which he manifested on manufacturing could not be on dynamic developed integrated plant is not noticed. Director MMC named Ilich Kulikov managed to appreciate knowing and cogitative man, but he could not, yes and this was not his duty, to arrange the life of employees outside manufacturing. This should be to make trade-unions and families. At the time nevertheless trade union system worked and many could afford to have a rest on Black Sea, at least time in two year, but with all family always was difficultly even for the heads of shops and manufacturing subdivisions. Was come to manifest «adroitness», because to ride to immediate family «savage way» and to search housing in private sector, but also this managed even in the Crimea. Several times managed Olga Wladimirovne to arrange such trips to the Crimea for all family.

Managed even one time travel by all family on Caucasus in Kislovodsk and Zheleznovodsk,

as well as to visit Pyatigorsk and Dombai which remained in memory at all, like, as the most beautiful areas in USSR. But scientific charges far and away exceed manufacturing and time at Valery Alexandrovicha on leisure

already practically did not stay, that is why he of beginnings all leave of absences to conduct, virtual, for desk, but coaxed wife independently travelig in the leisure home under Moscow. And this trip on all life left trace in fate Olga Wladimirovny which in this trip met family professors, doctor of engineering and the member of The union of Writers USSR Alexeya Alexeevicha Liverovskogo which with its wife Bianki traditionally had a rest in this region insisting Russian culture. Very how many subsequently told Olga Wladimirovna about this marvelous family, like,

tell only professional writers. She, real, learnt much new about the modern life of the intelligentsia of Sent Petersburg, about those difficulties which feeling clever honest and formed people in country which everything «collects live», but by no means not collects. All this arose in complex years before «reforms» and till «Parade Sovereignties», that is why every such get-together great deal signified for clever and thinking people. For people who wanted be determined with willing its children understanding, what everything will soon change and turns will be nonreversible.

ВИДОМОСТИ				ПРО РАБОТУ	
№ документа	Дата	Инициалы	Подпись	Содержание	Подпись
31	1989.10.28			Принят на работу на должность «инженер-конструктор» в завод № 100.	
32	1994.12.31			Принят на работу на должность «инженер-конструктор» в завод № 100.	

But

everything did not change, and professionals are necessary always, that is why that labor which Valery Alexandrovich constantly enclosed in inventions, technology and research did not only allowed to receive the scientists of degree, but main - became necessary manufacturing. It is that is why, when were given to elementary freedoms that became possible even creation of scientific cooperative termed with romantic's «**Drapery (Manufactura)**». What only was not written down in the statute of this organizing as to line of activities (traditional «UNIVERSUM» the kit of that time), but tackled cooperative by only investigation as to economic questions, in which Valery Alexandrovich to 1989 yr. became acknowledged in East Europe by specialist. In this cooperative Olga Wladimirovna studied seven years old with 1989 yr. as to 1996 yr. It is possible dared to speak, of that number's Mariupol's Metallurgical School of The Ministry of Ship-building industry USSR accepted the most active participation in the formation of cooperative motion in Ukraine. And its participation in this large and necessary economics of East Europe to research was, real, timely and necessary, taking into account her technical and humanitarian preparation as to main teams fulfilled researches as to improving of normative basis on industrial organizations. Manufacturing, as specially prepare Olga Wladimirovnu to this work, because in 1971 yr. and in 1972 yr. she past twice with disconnection from manufacturing tuition in Dnepropetrovsk's metallurgical institute as to «Technical have nor med and SOL» and her senior lecturers and professors read as to seven ad hoc courses: «Technical have nor med and SOL» (50 clock), «Organising and planning Manufacturing» (24 clocks), «Basis physiology and psychology labour» (10 cl.), «Material Stimulation» (8 cl.), «Networked planning» (12 cl.), «Scientific organizing labour» (10 cl.), «Legislation of labour» (16 clocks).

Was and eighth course - «Civil defense» (16), but, fortunate, the acquaintances of him in arranging of research not need (as nevertheless well, what we everything live in pacific time). As see, not on empty basement began the country modernization. **To it qualified.**

Namely for these years became specialist and her son, and at Olga Wladimirovna appeared two granddaughters whom too is necessary was to study and to educate. But reefs of life's problems «ship of family» under leadership Olga Wladimirovny successfully bided pass. And even managed Valery Alexandrovichu to study not only her grandsons but also dependents, and because he was usual senior lecturer in university. Here is what signifies real authority (!) and insisting acquaintances. AND Olga Vladimirovna, with its side, did not stop to astonish the wife of son Marinu Gennadijevnu what in exit on bazaar always bought all, as a minimum on 30-40 per cent cheaper. To this art neither in one university will not teach. This insisting business talent which in all world is considered by exclusively rare and valuable resource. Ours only today him begin unmuch to value ...

4. Ivan Moiseevich Catholic - «Ukrainian night on farm Catholic» - Civil international  
Committee Spiritual Unity

Yes much of life's problems will it was necessary to take on itself Olga Wladimirovne. In large family Ukhno she became the center of attraction and give no nobody even to think about possibility go out from Mariupol. «**If I already brought in this city on its earth of husband from Kazakhstan, those nowhere neither Him neither children not shall dismiss**» - so or approximately so, apparent, thought grand-granddaughter Moiseya Grigorevicha Catholic. Maybe this and correct, because made for 90 years «her men», real, earns respect. But not less, and maybe and more important, turns out to be, was made and self Olga Wladimirovnoi.

And began everything from conversation Evdokii Timofeevny Ukhno (Chernyavskoi) with her son Alexander, when Evdokiya Timofeevna where-that in 84 year seriously in presence Olga Wladimirovny said: «We are grandson from noblemen. My uncle was Catholic». «Grandmother so, because catholic this not surname, and religion» - to mistrust the words of elderly woman, said Alexander. «We are from Catholic and farm so named» - continued to insist Evdokiya Timofeevna. «Grandmother, and where you were given birth to?» - decided to verify on reliability of information Sasha. «In Nikolskomu in 1906» - all at once and distinctly replied Evdokiya Timofeevna. Olga Wladimirovna supported mother and Alexander nothing other did not stay, how to verify received information.

IN Mariupol's museum said that about farm Catholic nothing by him unknown, and all Church's books necessary to search in Donetsk's archive, because from Mariupol everything was exported in Donetsk. And couple of years in succession every trip in Donetsk began for Alexander from Donetsk's archive, in which studded by phrase employment reported that nothing was retained. But «Water grinds stone». And occurred nevertheless small miracle - in one of the trips of instead old employment archive turned out to be new and she fetched Church's books village Nikolskoe (modern Volodarsk).

*And in records for 1906 yr. it is impossible was to overlook record about baptism newborn Evdokii Timofeevny Chernyavskoi, because by this record were interested right after revolution and after war (were two marks on fields). Who could be interested Evdokiei Timofeevnoi? Answer is evident, if to take into account that to archival documents assumed only employees of policy structures. But true sense interest in person Evdokii Timofeevny brightened only in 2010 year, but about it a few later. Main - Alexander felt that any very serious information about it dependents as to line Evdokii Timofeevny hides and well «hidden». Follows to say that ambassador of every unfortunate trip in Donetsk Olga Wladimirovna recalled, as accidental, what that detail of its childhood. And already to moment, of discovering of record about birth Evdokii Timofeevny, Alexander thered seem that he absolutely lately lived on farm Catholic. He already knew that Vanya, the first son Evdokii Timofeevny (1929-1940), constantly repeated - «Kobanj, Kobanj», because could not said word Kubanj, of where have acrossed all native Evdokii Timofeevny and Wladimir Grigorevicha Ukhno with farm Catholic. He already knew that on farm was great pear's garden and apiary, as well as in the large family of Wladimir Grigorevicha Ukhno was 19 children. It is by the way, Wladimir after the dispatch of elder brother to study to music headed family and only him was got of daily glass milk, and because traded by dairy in city (rigidly pertained Ukhno to itself - spared and reached). All this information Olga Wladimirovna gave to as to droplets, in order at son to support interest to family history. And such her politics, certain, poured out in the searches of documents about that time which as and was not, but someone something heard or saw and ect. Obstacle only disentangled interest Alexander and he suddenly found testimonies about Mennonites, about Greek settlements, references about Kalmiusskoi Palanke and ect. Suddenly before next trip in Donetsk called from Mariupol's museum and said that found something interesting (this year Alexander defended doctoral and only returned from Alma-Ata from The first World Congress of Spiritual Consent). And found the map 30 years, on which was distinctly marked farm Catholic. It is so, signifies, Evdokiya Timofeevna spoke TRUTH! Olga Wladimirovna a few offended emphasized that mummy always only and spoke TRUTH. Here is from this moment interest to history farm Catholic acquired absolutely another aspect - extremely aspiration to purpose the search of historic documents. But these documents to find in Mariupol managed little, even very little. People as-that feared recalling ... If at Greek artist Valentina Konstantinovicha Konstantinova before war killed 34 relations, and last - his uncle already of deceased drawn in sledge as to village ... (that's why many Greeks the first tried go out in Germany, as soon as send German troops). About than can be spoken. More documents will it turned out in Central Public library in Moscow, where of publication ones history Kalmiusskoj Palanki and as to history Troops Azovs' will it turned out fair; in order even to receive insight into economic successes of Azov's men and inhabitants distinguished farm. Historical evidence from publications very during were complemented by recollections Olga Wladimirovny and Alexander could to make the first sketch of the history of migration Cossack-*

Gothas due to Danube in Kalmiusskuiu Palanku and to see the role of nobleman last Ataman-officer Troops Azovs' Moiseya (Evseya) Grigorevicha Catholic in all historic events those years old. In these years arises very great event for family Olga Wladimirovny. In apartment appears picture «Ukrainian night» A.I. Kuinji, but she comes as-that very symbol, as, actually alone picture and valuable thing stayed from grandmother Valery Alexandrovicha Vasiljev and somehow in three places punished by bullets, but holes from bullets neatly glued.

Last as-that attracted on itself larger attention, than all what was portrayed on picture. And all family discussed that such occurred and in what adaptations spent time this artistic canvas. Alexander was Greek painters why-that coaxed to give this unlarger picture by him on restoration **which continued eight years old** ... But was finished what picture covered by domarnyj varnish which, they say specialists, brought down its value and tried to make less noticeable openings from bullets in canvas. **But on picture returning in the year flow insisted Olga**

**Wladimirovna and its having attained set Her on cupboard in large room.** Whichly was the surprise of all immediate family, as in one of solar days in 2004 yr., when sun illuminated the even dark places of **picture**, suddenly **she** by everything reminded farm Catholic, and Olga Wladimirovna said that she sensed this always. Yes, **this picture is written was Arkhipom Ivanovichem Kuinji with farm Catholic and her is necessary to name «Ukrainian night on Farm Catholic».** This small opening made Olga Wladimirovnoi, has exceptional significance for all history of Pri-Azov Land, and possibly and all Europe which became evidently in 2012 yr. after more detailed acquaintance with art of Arkhipa Ivanovicha and history self farm. But in 2004 yr. this caused us several times to face Greek painters and to verify our assumption which in them did not only did not cause of objections, but they confidently spoke that this, name, so, because Arkhip Ivanovich went near Farm in Greek's village Cherdakli to its dependents. To us suddenly became very closely time 1876yr., when was created this **picture**. Wanted prompt to make updating, at least schematic, farm's houses directly on farm Catholic and to show its to Greek painters. Prepared battens and fifty metres of subtle rope ... But problems, problems, «very unclever problems» caused to interrupt the normal life of family which compeled Alexandra to leave to Odessa and all searches of evidences were interrupted ... Only in 2005 yr. for a few weeks before death Olga Wladimirovny returned to this topic, when retracted her from hospital, where her did not cure (it is said, what from her disease of drugs was not ... though something in all this was not so ...). We then, even built any plans ..., but was very heavily ... and not till pictures ... When after three days of shower on requiem having buried Olga Wladimirovnu, recalled about it her biggest opening ... became so bitter, to that many unworthy people in Pri-Azov Land on this small and wounding earth, apparent, already will be not found places ...

But disclosure «Secret Picture» went to parallelly other very significant work which will it was necessary to fulfil Olga Wladimirovne, name, to maintain the work of The Institute of economical and socio-cultural researches (SCE, assignee DESMC The Academy of Science of Ukraine). To this

large work attracted her, as ever, Valery Alexandrovich who in the first instance accepted Olga Wladimirovnu by assistant research worker with payment as to the actually fulfilled volume of researches in his Institute. Here is only of research managed to conduct as to economic contracts only till 2001 yr.

This already subsequently she really was responsible for the output of all scientific output of organizing financing all editions, as this was and in 2005yr. Working in this organizing, Olga Wladimirovna received the status of the Participant of War which raised the authority (SCE) of Institute ESCR. It is especial, **this created fitting image of organizing, when 12 November 2001 yr. was created Civil International Committee as to the preparation of World climate of opinion to arranging of The First World Congress Spiritual Unity in New York** the common deciding of the Azov's Department of The Academy of economic sciences and business activity and The Institute of Economical and Socio-Cultural Researches from members international publication «Who is Who in the World» (USA) from Spain, Australia, Indies, Serbia, of Canada and Ukraine. **This constituent document was signed Olga Wladimirovnoi, as assistant director of The Institute of Economical and Socio-Cultural Researches (SCE).** Till latest day Olga Wladimirovna constantly maintained this international public Committee. She always constantly emphasized that this organizing is created «Unamendable Novelmen» and must active work.

It is certain, all this work Olga Wladimirovna fulfilled, by aiming all forces to support «its men». Ounly she the first lent impulse to that sincere spiritual search which they conducted all last twenty five years old. In 80 years the she of them self led to Christian Temple in the Crimea which only through many years old visited protoierej Wasilij Multykh along with паломниками, and then Olga Wladimirovna with deep feeling explained its unmuch «much studied men» the necessity of sincere faith in superior forces. Passed years of and her word were understood Valery Alexandrovichem which in 70 years old had christened at Wasiliya Konstantinovicha Multykha in village Usatovo under Odessa. Protoierei Vasilii Konstantinovich Multykh became godfather Valery Alexandrovicha and on four year lived more his god-child. But what great force in prayer, because willow were disbanded before icon which gave to Wasilii Konstantinovich Multykh his god-child. They then in 1999 yr. established to the highest award of the Azov's Department of The academy of economic sciences and business activity Names Medal «Metropolitan Gothas and

Kafy, Holy Ignatius». Few Medals manufactured in Russia upon request Wasiliya Konstantinovicha Multykha, and He of them transmitted Valery Alexandrovichu. Olga Wladimirovna considered this work self significant in all extracurricular activity of the Azov's Department of The academy of economic sciences and business activity, of and then and Civil International Committee Intellectual and Spiritual Unity.

These Names Medals was noted The director of The center of Researches in The East Europe of Warsaw University, professor, Dr. eon. hab. Michael

Dobrochinski, Founder and The President International benevolent Fund V. Khlystiuk, President Crimea Academy of Science, professor, Dr. biol. V.RUSYAEV, Vice-chairman of Civil International Committee Intellectual and Spiritual Unity, Dr Ernesto Garcia, Writer-pilot USA Clayton Devis, the professor of Pri-Azov's State Technical University, The honorable member of the scientist of the advice of The Academy of

economic sciences and business activity in Ukraine, cand. techn. scies. Nikolai Alexandrovich Dinchenko which Diploma was signed already Chairman of Civil

International Committee Intellectual and Spiritual Unity, Dr Ernesto Garcia in 2009 yr. and many other produced people who sincerely boast of and value this, real, particular prize. She really helps people whom is given, with honor to pass through all tests. Also Olga Wladimirovne managed to convince of Valery Alexandrovicha married per annum 50-летия their wedding. Father Nikolai, as general, carried out ceremony on such high level soil in October 2004 yr., what Olga Wladimirovna was deeply and sincerely him is grateful. Would thered seem that grand-grandmother noble Ataman og Zaporozhskoi-Sadunajskoi Sechi and officer Azov's Troops M.G.KATOLIKA completely was dissolved in «its men» and in everything parts their opinion. But wisdom and spiritual fortitude - this not make-beleive romans. She manifests in all-in-one and proud people, especial, in people who genetically are connected with the most honest and proud nation of Europe - with Cossacks-Gothas which saved Europe in 1223 year having provided possibility to agree on common «Instructional» actions to all Christian World - from Atlantic ocean till Pacific ocean in 13 century. This very bright was manifested in the elective companies 2000 years, when Olga Wladimirovna basically and not one time balloted for Viktora Fedorovicha Yanukovicha, and Valery Alexandrovich - for V.A. Iushchenko. Olga Vladimirovna understood that convinced husband her do not manage and simply spoke - «he nothing in this not understand ...».

And this balloting was sincere and principled, rather than no-serious ... As see today by everywhere and row for any blessings. Did not reckon Olga Wladimirovna on any blessings, because very seriously related to democratic procedures in its Ukraine. Marina Gennadijevna told that must was to see, as two «loved each other elders» go together on elective district, carefully each other maintaining, and ballot everybody for her candidate and also together maintaining each other, go home. This position in Ukraine not everything will appreciate of and understood ... With this end in view understanding, real, is necessary WISDOM.

##### 5. The basis of the success of all pragmatic initiatives

In one of last films about the researches of the historic roots of Ukrainians already with the help of studies DNK by leading authorities in the world showed that women in Ukraine carry in itself DNK very pristine folk and this DNK no at the men of Ukrainians. Actually science acknowledged life's

wisdom which even simple the representative of the wonderful sex of more wisdom self gifted man. This truth, like, was fair always. It is at least, Olga Wladimirovna always understood any a matter of practically «quickly», but gave advices and interfered only in critical situations. Recalling those moments, when were accepted in family «GREAT» and important decisions, becomes evident, what last say was almost always for Olga Wladimirovnoi, but only asounded these decisions Valery Alexandrovich. Here is only where touched absolutely special questions «big economic science» she as-that complied right to make mistakes «her men». And they these mistakes made on complete force, have made to cause storm on empty place. But it is impossible to say that in this not very reasonably good life in country of «permanent advices» and permanent «very difficult» everyday problems it is possible was to find the really ideally rational style of behavior which after a while thered seem optimal.

No, it is impossible to live far and away better, than lets environment, and when this environment constantly specially aggravate that result is evident. It is that is why, all modern travel on «Maldives Islands» or else in something similar «world's poor land» already please away off not all.

It is like, not in change for impressions is necessary to search possibility to receive something new and important, and in that prosecution of which to us bequeathed all great culture of East Europe «Silver Century». That is why Olga Wladimirovna so aimed to buy but just published good books and to convince all to read to not only classic but also modern good literature. Not that literature which today replaces chewing-gum, and insisting good prose. This and works Simonova, and novels Chivilikhina, IU.V. Davydova, I. Tynyanova. Her very liked prose Ivana Sergeevicha Turgeneva, Nikolaya Vasilevicha Gogolya, Ivana Alexeevicha Bunina (finding first noble prize winner). Journal «Foreign literature» collected as to years of and it filing till now compose biggest as to volume Heritage for granddaughters. This and Tomas Mann, and Balzak, and Zhorzh Sand, and Prosper Marime, and Alfons Dode, and Stendal, and Moris Driuon, of and Agate Kristi and many miscel.

Particular place borrowed books «Great Mouravi» Anny Antonovskoi and P.I.MELNIKOVA (Andreya Pecherskogo). And certainly works Goncharova and Bulgakova, and historic novels of E.TARLE were reread as to several times. Their from soft submitting Olga Wladimirovny «by own desire» son epitomized - so simple, for itself. Already we do not speak of Lermontov, Lve Tolstoj and Alexej Tolstoj, A. Pushkin, S.Esenine, Paustovskom, Nikolae Gumileve. Passes time and becomes evident, what without this unceased «Literary evening» nothing valuable «her men» did not write. And truth, what connection between novels, tales and poetry and statistic correlation equations, founder forms and wooden, by plastic and aluminium models ... will not understand today very many (will say that this everything «intellectual men fantasy»). In the period of «Mass-scale purchase» various diplomas and academic estates, authorships and co-authorships under scientific monographs and clauses, as-that odd to admonish of the quality of spelling of scientific output, about necessity to think - about real practical value qualified publications. But in 70 and 80 years XX st. without all this very broad humanitarian information would not be wanted «her men», as to-insisting, to improve models, to search correlations and dependences. Everything became for them flatly and arid. It is correctly it is said, what creative people without necessary to do without can, but without spare - never.

Only this spare should be carefully selected and on such level, as wrote letters to the son of Graf Chesterfild and its «Small Prince» Antuan de Sept Ekziuperi. It is name, on such level and with such sincere wish result, as this made Olga Wladimirovna.

**6. «It is taking into account large contribution in the revival of the historic MEMORY of Ukrainian nation about glorious pages Azov's Cossack's Troops (the specification of the title of picture A.I.Kuindzy «Ukrainian night/on farm Catholic», the factor of dramatic activity in Nikolskom, of the peculiarities of denomination and others), as well as real CONTRIBUTION in publishing activity of Academy ES&E and Institute ESCR and in the creation of Civil International Committee to affirm BY THE HONORABLE MEMBER of the scientist of the advice of Azov's the Department of Academy ES&E, of Participated-women Great Domestic War Olga Wladimirovnu Wasilievoj» (The decree of Presidium AD AES&E from 15 September 2004 yr.)**

It is name, such deciding Valery Alexandrovich wanted to accept all seven years old (beginning with 18 December 1999 year) after arranging of the augmented Sitting OF

THE CONFERENCE of the scientist of the advice of Azov's Department of Academy of ES&E, of Berdyansk's Pedagogical Institute, of Mariupol's

histories of region museum, of The institute of economical and socio-culture researches, of The Donetsk's University of artificial intelligence along with Ukrainian Cossacks and Volodarskoj district Gov-administration arranged to 145-years heroic defense PriAzov's Land under leadership Atamans Troops Azov and dedicated to Memory The First Getman Ukrainian Cossacks Vyacheslava Maximovicha Chernovola. About this conference was much written in The bulletins of Azov's Department of The Academy of economic sciences and business activity (NN 3, 4, 5, 6), but practically was not mentioned about exclusively perspective information which was told, name, on this forum. And appeared this information toing thank Olga Wladimirovne and was needed more ten years old, in order her as to merit to appreciate with accounting of that large creative the work of actor and art director Russian Theater Nikolaya Nikolaevicha Arkasa in Khuste (till 1938 yr.). He transferred high- artistic dramatic tradition put by father (creating distinguished opera «Kateryna» for Poem of T.G. Shevchenko, 1890yr.), from Cossack's Kherson to Russians in Zakarpate Land. Under the impression of the appearances of the artistic Ukrainian teams of Berdyansk's Pedagogical Institute and Mariupol, in which, as general, was disclosed all beauty of popular song, Olga Wladimirovna to our general large fun recalled (18/12/1999yr.), what Evdokiya Timofeevna Uukhno (Chernyavskaya) told that her frequently asked - «Dusia, and as at you so well is gained to drop in losing consciousness? » - and she replied - «That is this no nothing peculiar. Simply I fold knees». On our question :«And why to drop in losing consciousness?». Olga Wladimirovna replied: «They playing of the Shows on the farm Catholic». You realize that in those years, when there even as to census was all a few man, hosts of farm arranged formulation the shows (!). It is evident, what all youth engaged in dramatic formulations. They all tried itself in Actor's skill. And as see, at many well was gained, audience remembered. It is real, was interesting life in the depth of Ukrainian steppes on the Farm of nobleman Ataman Cossacks-Gothas of Zaporozhsk-Zadunaj's Sechi and its unequivocally created saturated and creative (!). But because same shows and in village Zakharevka, and into all stances Troops' Azov. Pastly almost century and in 1997 yr., when Marina Gennadievna with husband were in Havana, its daughter Olga, granddaughter Olga Wladimirovny, arranged with sister Natashej small dramatic formulation. Olga was by the author of formulation and by art director, and played many of the actor's roles (of 80% all roles of narrative). AND Olga Wladimirovna after representation 21.06.1997 yr. told had returned from Cuba to parents which at granddaughters everything very well was received. It is certain, exaggerated, cannot grandmother to granddaughters be objective, but parents long preserved scenery of little show. What is this, if not genetics memory? We then this line of activity Atamans of Zaporozhskoj Sechi called « constant by acting faculty Ukrainian National University» comparing him with Karlov's University in Prague, where music was considered one of the principal sides of university background. And if practically impossible was behave from Cosack's-Gothas' Lands in the Universities of Sent-Petersbourg and Moscow, then art managed to preserve and to move by Great steps forward state of the art of the offsprings of the Great Nation of Europe.

Today fairly as to the ancestries of surnames to trace of fate Zadunaisko-Zaporozsk's Gothas-Cossacks, in order else time be argue into outstanding offsprings ancient, of proud and exclusively industrious self East Rytsarskij Orden of Europe. It is by the way, about it else Skalkovskij wrote,

had saw Cossack-Gothas of Zadunaiskoj Sechi on highway in Odessa's Departments going of ad rem its settlement already in Russian Empire. Yes, this opening of artistical traditions great deal will lend to us for understanding of the modern processes of the revival of culture and spiritual on «very eternal own Lands» (from Universala of Bogdana Khmelnitski 1655 yr.) Kalmiuskoj

(Calmoucs) Palanki of Zaporozhskoj Sechi.

And what Olga Wladimirovne its cousin Alexander Kuzmich Chernyavskij signed papers on the reception of the certificate of Participant Great Domestic War, as working during war on Lands of Volodarsk (village Nikolskoj), indeed Symbols.

It is by the way, Olga Wladimirovna aimed to make far and away more, than was in its forces and helped all, who loves and does not abandon Priazove. Characteristic case, when she asked Alexandra Kuzmicha to help with privileges Elze Abramovne which did not want to ride in Israel, though her actively called and her was come very heavy at the time in Mariupol. Alexandr Kuzmich with humor replied : «Lelia, where you see in East Europe Hebrews have worked in collective farms?». But nevertheless after a while Elze Abramovne helped to decide all questions ... Activity and position Olga Wladimirovny «have made its work» - to man became easier to live in Ukraine. And not only that, for which asked Olga Wladimirovna, but also its daughter ...

*Here is so and necessary about people to think ...*, rather than be screened by stereotypes founded, on «savage adversarial installations» with reference to that or other ethnic.

**7. «For MEMORY on many years about The honorary fellow of the scientist of the advice of Academy ES&E in Ukraine, grand-grand-granddaughter Officer Azov's Troops - Descendant Ataman of Zaporozhskoi Sechi Moiseya Grigorevicha Catholic, Olga Wladimirovne Wasilievoj studying for many years in Institute - TO APPROPRIATE its name to Institute ESCR which with 26.07.2005 yr. will be nominated of «Institute of economical and socio-cultural researches named Olga Wasilieva-Catholic» (The order of director IESCR from 26.07.2005 yr.).**

Recent years were connected with active teaching at Valery Alexandrovicha and he with sad spoke: «Is carried out any general Simplification ... and its does not manage to stop. We stop to study children». It is real, may be something actively make, but do not see of payoff. If on German language Olga Wladimirovna and in 70 years old with humor uttered a few of phrases depending on the topic of conversation, because studied him in Technical Training Establishment, those today students do not remember even school «Began», because estimate of their knowledge as to tests at school so, what to comment no sense ... We all that all, to deep regret know and nothing change ...

In all «be captivated» higher education in all countries of East Europe, as-that in practice more are valued specialists with primarily good technical background, and then receiving that university degree. Yes and heads from graduates Technical Training Establishment were more trained to all complexities lives in capitals. They, by the way, and remembered its of the student's years far and away of better graduates of institutes. And valued student's friendship. Many times Olga Wladimirovna with your heart's content went on the meetings of graduates.

It is name, the graduate of her Technical Training Establishment helped to decide practically «Unsolvable question» the commissionings of Valery Alexandrovichem candidate minimum, when that began to sustain to teachers position which «Idea material and Lenin is mistaken». And today 80% humanists in East Europe part this position Great Lider, what then to speak of 70 years of XX st. And despite «such inadmissible think», Valery Alexandrovich nevertheless received positive assessment, truth will it was necessary him «help» everything to understanding heads. But because helped, because already knew far and away more simple and constantly «greatly be insured» philosophers. And someone speaks that Donetsk's basin at the time lagged behind in intellectual plan and this backlog was retained. No respected, could not such powerful industrial center of Europe and World lag behind from agricultural areas. This even from methodological point of view absurd. In Donetsk's basin, in particular in Mariupol, even Technical Training Establishment gave such achievement level, what today give no many Universities, and only work on visibility and «close eyes».

That is why Olga Wladimirovna sincerely maintained all our efforts as to social attestation on the doctoral estates of Academy ES&E the Russia of Mariupol's heads. But especial, her liked Main scientist the secretary of Academy ES&E Russia Gennadii Mikhailovich Denisov from Ural which recent years worked in Moscow. She about him spoke to sincere arrangement, because made acquaintance with wife and was sorry for that due to next «Hajmovich's men» (I.V.ZH...; L.L.V... and others) he stopped to come in Pri-Azov's Land. And dissertation (thesis) at Gennadiya Mikhailovicha was interesting and seriously connected with Innovations. Sorry, what so everything ... was inhibited ...

Correctly today it is said, what else unmuch and «We have to will bring high-skill workers from Europe» (P.M.TALANCHUK, 2006). Maybe exist sense restored on modern level prestige Technical Training Establishment having complemented their program by balanced humanitarian bloc. Because not everything can «given volumes humanitarian acquaintances», as this made independently and all life Olga Wladimirovna.

It is however, qualitative understanding post-war programs of technical instruction based on text-books V.A.DOBROVOLSKOGO, E.O.PATONA and B.E.PATONA, let her always with merit to speak that she is graduate of Mariupol's (Zhdanovsk's) of metallurgical Technical

Training Establishment of The ministry of Ship-building industry USSR.

It is as well, what fate lent Valery Alexandrovichu time (despite his sincere regret which personal «Business trip certificate» did not was not over along with «Business trip» of wife) and He had time not on to issue Order from 26.07.2005 yr., of but else one and a half year actively have working in the Universities of Mariupol, of Odessa and Khusta (Zakarpatskij region).

This pupil prof., Dr nechn. scies. Viktora Afanasevicha Dobrovolskogo and prof., Dr econ. scies Valery Ivanovicha Tereshchenko tried to do all possible, in order active knowing of and deeply patriot «**engineer the department of welding of Izhorsk's Factory of Order Lenina**» and one of the founders of Civil International Committee Intellectual and Spiritual Unity (Spain, Canada, India, Serbia, Ukraine, Australia) recalled in her native Pri-Azov's Land and in its metallurgical Technical Training Establishment, because Institute ESCR (assignee DESMC of The Academy of science of Ukraine) with 26.07.2005 yr. already named «Institute economical and socio-cultural researches by named Olga Wasilievoj-Catholic» (<http://iescr-catholic.ucoz.de/blog>).

But all this possibly only quotient close, and if to see objectively and on the part of, then level of our assessment too high? There's seem that question has no unambiguous answer ... However, shall apply to well revised criteria which for everybody Christiana do not cause of objections. It is name, to such «to accidental coincidence», as birth of the granddaughter of Olga per day the birth Olga Wladimirovny (16 September 1986 yr.). And all following 18 years old both Olga celebrated its Birthday together in one DAY (!). If to take into account capabilities Olga Alexandrovny and all those hopes which validly connected with granddaughter Olga Wladimirovna – that is gift - insisting GIFT of fate – evident (!). Larger for Insisting Man on Earth to make impossible (ask any of Christian clergyman and he this will acknowledge). That is why all our «earth's» estimations absolutely not very high.

Instead concluding - «This was very proud flower ...» (Antuan De Sent-Ekzupery, «Small prince» - 31 July 1944 yr. his airplane did not return on basis which Devis Clayton searched all life ...)

It is certain, Ukrainian women carry in her genetics memory about Great Nation which existed milleniums ago. And we meanwhile only concerned topic about modern Produced women who by its love and labor created and preserve our Civilization.

*Necessary and can be written else not one such bulletin, but ... That is why request you in these several lines Antuana de Sent Ekziuperi to see all what we wanted, but else did not write ...«- All for nothing I of her listened, - unsuspecting said to he to me once. - **Never must listen that***

**it is said flowers. Must simply look at them and to breathe their by fragrance.** My flower to give to drink by nice odour all wash planet, and I did not was not able him gladding. These conversations about clutches and tigers ... They must me touch, and I exasperate ...

And else it confessed:

-Nothing I then did not understand! Must was to judge not as to words, and as to matters. She to presented me its fragrance, elucidate my life. I should not was to run. For these wretched tricks and dodges I should be divined tenderness. Flowers are so inconsistent! But I was too Youth, I else did not was not able to love.

As I understood, he decided to travel with flight birds. In last morning he better usual removed its planet. He carefully blew through acting volcanoes. At Him was two acting of volcanoes. On them very suitably as to by morning warming breakfast. It is besides, at He was else one extinct volcano. But, said to he, little whether what can happen! That is why he blew through and extinct volcano too. When volcanoes neatly cleaned, they burn evenly and quiet, without all manner of eruptions. The eruption of volcano - this all the same what fire in Furnace Pipe, when there is browned carbon black. It is certain, we, people on Earth, too small and cannot blow through our volcanoes. That's why they carry to us of much nuisances. Subsequently Small Prince not without sorrow have tired the last burgeons of baobabs. He

thought that never will return. But in that morning habitual work carried him uncommon your heart's content. And when it in last time watered wonderful flower and collected to cover it by cap, him even was wanted to cry.

-Excuse, - said to he.

Beauty did not reply.

-Excuse, - repeated Small Prince.

She coughed. But not from chill.

-I was foolish, - said to she final. - Excuse me. And try to be happy.

And neither the words of reproach. Small Prince was very astonished. He congealed, embarrassed and confused, with glass cap in hands. From where is this tenderness?

-Yes, yes, I love you, - heard he - My wine which you of this did not know. Yes this is and not important. But you was same foolish, just like I. Try to be happy ... Leave cap it to me no longer necessary.

-But wind ...

-Not so really I chilled ... Night coolness will go to me on usefulness. Because I - flower.

-But beasts, insects ...

-Must I of endure two-three caterpillars, if want to make acquaintance with butterflies. They, should be charming. And that who will become me to visit? You because will away off. And larger beasts I do not fear. At my place too exist clutches.

And she in simplicity soil showed of its four calk. Subsequently said:

-Yes not haul, this intolerable! Decided to go away - so go out.

She did not want, in order Small Prince saw her crying. **This was very proud flower ...»**

Не хотела Ольга Владимировна  
уходить от нас в больнице и  
настояла, чтобы её привезли  
ДОМОЙ, и последние её мысли  
*и слова были о муже – «ПАПА меня ЛЮБИТ ...»*
