

Gotha in Europe:

One thousand six hundred (1600) years of Christian Church on Ukraine - example of implementation of the Law Non-Destroy of an Intelligently - spiritual Labour in selfless activity
Metropoli's Gotey and Cafa of stand in Crimea and in Mariupol

"It is good to be able to define our purposes like CIC-WSC, as motor of a great movement in the sphere of the world intellectuality to convince of the GOOD WILL in ACTION in the World at international level and to influence positively in the MASSES of any Belief and political condition, and to carry out the constant diffusion of the act of SHARING. This approach is the one that I express."

Ernesto Garcia, First Vice-Chairman CIC

THE UNIFIED PEOPLE

On a history of Ukraine today is published so much contradictory "«near-archives" of the information, that in "«noise" of tactical "«men-know-Ukraine" and very different politologists founder the bits of the Truth, which one too are published and even are read, but while this information does not find a public resonance because of « of constant vanity bad-policy-workers», seek to preservation at any cost of undeserved social status, on which one while Real Chiefs in Eastern Europe do not pay is severe attentions (simply « arms(hand) do not reach »).

Therefore very not prime path of the TRUTH to hearts of the simple people in Ukraine, but the probably similar processes are characteristic not only for Ukraine. However, already that this path of INTELLIGENTLY - SPIRITUAL GROWTH(INCREASE) is possible(probable) - speaks about achievement of a new level of development of all modern civilization.

Though the whole seams of a history are ignored till now, which one, as aim us crafty to convince, is far from the inquiries of a modernity, but actually only its correct analysis gives moral and intellectual forces to all peoples of Eastern Europe, and probably will give these forces and all world community. Not by gift the third thinker in a history of mankind Peter Lavrovich Lavrov (1869) considered a HISTORY as the main humanitarian scientific discipline, which one today imbibes in herself last achievements of natural sciences. And in the near future on a desktop of the historian near to the computer and electronic addresses of libraries and archives of a world listings genetic codes and comparative tables of ethnic genotypes will appear. He will read indulgently monographies of the teachers, permanently marking detected by decryption DNC of mismatch, but with melancholy will think of our time, when still it was possible to put forward(extend) courageous hypotheses ground only of archive materials. Let's take advantage "of «transition period" in historical science.

* * *

In 1998 for all of us were revelation of the monography of Arkadia Joukovski, foreign member of a National Academy of sciences of Ukraine, Chairman scientific of Shevchenko's company in Western Europe and professor Srbone, which one he has handed over us with pleasure on October 29, 1998 in Paris. In particular, 965 pages of the monography «Bukovina: its Past and Present » (dr D. Kwitkowsky, Prof. T.Bryndzan, A. Zukovskij. - Copyright «Green Bukovyna», Paris - Philadelphia- Detroit, 1956) have made on all of us a very steep impression by truthfulness and encyclopaedic of presentation of a material. Still then there was a thought, that the description of a history Hettov, which one were operated By «Gods) (elective kings), much plexiform with history of Gotes on territory of Eastern

Europe, than we was thought earlier. But only supervision and actual analysis of an ethnographic material, and also actual situations, bound with a development of civil activity in the Rostov area in 2001-2002, Has allowed to see an actual picture of development of the socio-cultural processes in PriAzov in rather near for our educated contemporary past, when were built up a fundamentals by all socio-dinamics of modern Europe.

Yes, dr D. Kwitkowsky, Prof. T.Bryndzan and professor Srbone A Joukovski are true, that the memory about Zamolxis, which one and today is saved in villages on practically all modern territory of Ukraine (about him sing the girl in holidays), testifies to communication(connection) of the peoples inhabiting Ukraine with Hetty (p. 88). Them in 1956, as well as us today, imposes, that Hetty believed in immortality of the person (after mors – the deceased fell to Zamolxis), and the annals have kept the characteristics of the Hetty's Kings, as fair, valiant, retiring. It is interesting, that under the datas reduced dr D. Kwitkowsky, Prof. T.Bryndzan and professor Srbone A Joukovski all peoples on territory of Ukraine by the independence both from Alexander Makedonsky and from his father of Philip (399 up to AD), from Rome's men and from the Greeks (pp.79-88) are obliged to Hetty. It is interesting too, that Hetty's men, as «Most-Right of the people» characterize and Gerodot ("«History", book. 4, part 93; 484-425 Up to AD.) And Tukided ("«History", 11, 97,5-6; 460-396 Up to AD), Strabon (Ancient Greek geograph, 63 up to AD) and Gomer ("«Illiada", 13 odes; 9 centuries up to AD). Apparently, what exactly such moral qualities also will determine a role of this or that people in a history. And it is already really more fluidized and, on ours, judgement more truthful view on a history, than all of the "skiph's" version.

And an ethnic rod of Dakia were Hetty, in opinion of the professors of Europe (Paris). It is ground of Books of Gerodot, "«Geography" of Ptolemy and the opinion of more late contributors - E. Resler, K.Mulengoph, Cuno, G. Franke, A.Partickogo and other, the territory of Hetty had following boundaries: in a north and in west they reached up to Dnestr; from gulf of Dnestr the boundary went by sea up to the southern Balkan rivers, by which one reached the slopes of Danube about an Iron capstan(winch), and from there north-up – between the river Charny and apron plain Tisy. Capital late of the Dakia-Hetty's kings was Sarmizegethusa.

And the campaign per 513 up to AD King Dariya was not on skiffs (what is possible was substantial to take from the poor nomads?), and on Hetty's men, that becomes apparent from the books of Strabon, Justin and Jordanis. This judgement was divided with them by the historians Francium per 1956. By the way, the viceroy Alexander Macedonian - Zapirion, repeatedly has tried to attack on an Hetty's edge(boundarouse) per 327 up to AD and has perished together with (30 000) soldiers. It is interesting, that third macedonian king - Lizimah of the beginnings also with Hetty war per 301 up to AD, but in two campaigns has suffered a lesion, and his son, Ahatokl, was taken in a captivity. Therefore Lizimah has concluded peace with the King of Hetty Doriketom and has returned even one of the daughters for him in marriage. But per 292 up to AD Lizimah again has attacked on Hetty. However him lured in steppe Bessabia and he contain with 100 000 soldiers has got in a captivity. Here again there is that practically is not described in the annals, and probably in general is an exclusive scarcity - Doriket releases(lets off) all prisoners of war on will (!!). It is actual MORAL victory above ambitious, primitively obstinate devilry is captured on tablets of a world(global) history. Really, it is honour to be the descendants of such people, as the development in critical conditions(situation) of high moral qualities practically guarantees long historical life to all state derivations headed by representatives of the high-moral people. Therefore occurrence(appearance) Dakia's men in a north from Danube has not interrupted of a Hetty's history, and simply has set the stage new for the Dakia-Hetty's Kings, as the language they had general(common). About first of the Gakia-Hetty's King

Burvista (Boerebista) Strabon writes: «When Boerebista, from a kind Hetty, became the master of an edge(boundarouse), he has found the people exhausted, delicated by long wars. By the operations inuring to sobriety and a tight Labour he has shifted the people so, that after some years has based the powerful state and the plenty of the neighbours has accepted an authority Hetty. He even became terrible for Rome's men ... ». The historians of boundary of the Dakia-Hetty's State interestingly describe: in the south it rested on the Balkan mountains, in a north boundary there was Dnestr in Galichina, in east - a God (! Why there is no actual boundary?!), and in west Danube in Panonia. In 40-44 this state was included up to two millions by the persons (A. Particky), and it speaks both about a level of administration of government and about enough high level of spiritual values. Yes, what to speak; if per 86 the Dakia-Hetty's king Dekebal not only has made successful campaigns against Rome's men, but also, having conquered the Emperor Uliya, has caused the Rome's men to pay tribute by the way of annual gifts and dispatch in Dakia of the handicraftsmen. It kept till 98. Only Roman Emperor to Trajan managed on time to occupy Dakia, but is far from being all (Prof. A Jukovsky considers, that Bukovina never knew of Roman occupation). In national Ukrainian songs the name of Trajan is not incidentally mentioned (people has stored both conqueror and loss of ground, that practically more never repeated). As «very much in time» there are GOTHA and Avrelian per 271 together with the Roman population and with all troops go out from Dakia. Who after that will speak about GOTHA in attitude(relation) Dakia-Hetty's men, how about the conquerors?! And if no, that confirms also by large community of the language, then the tendency is understandable IS OFF-THE SHELF to distribute, christianity, adopted in 4 century, by the way arianisms (ecclesiast Ulphilas) to all territory of the moving, as a faith in immortality throttle was a spiritually - moral rod world out-look and for Hetty.

It is necessary to make only one step to comprehension of internal sources of self-development in PriAzov, and it is possible also of all locale between the Azov and Black seas and Carpathians. And the historians of Europe practically have come nearer to this idea in 1956r., when have mentioned, that the great movement(travel) of the peoples in 271 began (as the executed clause of a treaty - is legibly indicated year!), which one with interruptions kept about 9 centuries of our era. They also have underlined, that «by the first nomadic people, which one has arrived on territory of Ukraine, there were GOTHA», and « before the travel this German nation has occupied territory above the Baltic sea and (p.88) were engaged in cattle breeding». It is interesting, that in many tutorials is underlined, that the GOTHA, since 200, « ... have taken practically all territory of Ukraine bordering with Dakia» (!). And the professor Arkadiy Jukovsky also underlines, that «under onslaught of the Gotha's men Avrelian was compelled in 271 to withdraw a troops from Dakia». Whether is asked on the prompt of the Kings of Hetty-Dakia there came GOTHA?! You see of severe military conflicts between Hetty and GOTHA we in the annals shall not find. Word "of «Gotha" is translated - as "«GODS", and boundary for Hetty in East (that we mentioned above), as though specially for our comprehension of relationships of these related peoples, was - "«God" (!). By the way, the historian Alexander Macedonian Arrian in «Histories Alexander Great» characterized Hetty, as «very militant nation, which one trusts in immortality throttle and is engaged in agriculture » (such people quietly could accept only allies) is it is possible to say about the majority Ukrainian today.

But for the substantiation of our first position the following characteristic of GOTHA is matters given by the professor Sorbona Arkadiy Joukovski: «Having accepted christianity, they have begun to distribute this faith on our spaciousnesses » (!). By the way, in 6 century the Gotha's Bishop and the historian Iordanes recalls in the own book «a Beginning of a history of GOTHA» about beggining of travel of the slavs. And from here and first

conclusion, that not only the slavonic nations are an ethnic rod of the Ukrainian people, and probably and in general their role was in that time minor. As though confirms this assumption at that, that in the people was kept and prolongs to be saved contrasting Ukrainian in PriAzov, as well as in all Ukraine, "«Moscow's men" - ethnic Russians. It would be very simple all to write off on "«errors" and pressure of the Russian autocracy. And whether only this autocracy was Russian? It already other problem, which one we shall light in the following article.

We in this article shall try to answer a problem: « And whether there is any actual base to contrasting Ukrainian and Russians? ».

And the answer to it is not hidden in archives, and is seen even of their above-stated material. And main difference - in practice of realization and acceptance of christian values. And it is extremely severe also each think reader can see that principled difference, which one makes a rod of higher spiritual on territory of Ukraine saved by ours fathers. This rod gives us today basis with hope to look at Europe, planning(gliding) actual, instead of formal, integration in european community.

At once for "a «nomenclature" critic want to give to us the mark of Russia-fobia (conventional shortcut for all "«discordant"), but it is far from being and we hope, that the readers can in all disassemble.

DECISIVE ARGUMENTS

The impatient Russian will exclaim, so that, you want us to convince, what it is possible to consider a history of Christian Church in Ukraine, since 4-th centuries, i.e. after acceptance of christianity as GOTHA?! Well and what is it basically changes?

Yes, we want to convince, that one of the most severe ethnic rods of the Ukrainian people is a GOTHA'S unit, which one most of all has exhibited himself in COSSAKS - is first. And second - is extremely basic – humanity value for the Ukrainian people has the fact of acceptance of Christianity by GOTHA, realization and not tactical perception of his basic values (instead of political solution of Vladimir, when «baptized by a fire and sword») with simultaneous creation of GOTHA's Metropolitane stand in Crimea. With its basis also should count existence the Ukrainian Christian Church (the stand formed by Constantinople during unity of Christian Church). By the way, 24 metropolitans Gotey and Cafa, the Sacred Ignatius has died in 1783. on Metropolitans Gotey and Cafa stand in Mariupol (in Ukraine), as the locum tenen of a throne of the Ecumenical patriarch, having distributed the effect not only on all PriAzov and Crimea, but also on Zaporozhye (is captured in the Highest Decrees). And third - the revision of time actual, adequate(answering) to the historical truth, beginning of operation in Ukraine of Christian Church puts Ukraine in a number(series) of the states of Europe, which one by one of first have accepted Christianity, as, as state religion the Christianity was in the state GOTHA's "«Hermanariha". Its capital was of Kiev, and Ukrainian Cossacks-sociaty actually is the ideological and spiritual successor its sociaty, permanently aiming to independence. From here and such "«love" to the Cossacks and persistent scrambling of Empire with Cossacks-sociaty, which one did not cease neither in XY11 century, nor in XY111 and XIX centuries, and which one had came till 20 years XX of century exhibited in the most feral(natural) and bloody forms of "«break-cossacks" (about its on Ukraine practically is not known, since suffered affliction Kuban). And as always - the Cossacks answered by recalcitrance and sharp protest, partially having moved, as well as per past centuries, in Turkey.

COMPLEXITY And SIMPLICITY of the PROOFS

To prove ethnic affinity (proximity) Cossacks and GOTHAs, on the first view, it seems is very difficult (complex). Even today to us "by «whisper" tell, how the archeological monuments are deleted, which one testify to the Greek history in PriAzov and PriBleaksia. It happens «as naturally », but main - happens. See, what became with pipettings started in 1853 in Tanais and with monuments of Greek in world famous Olvia, and square on seaside quay in Taganrog, where before its creation by decades found drilling breakss Greek's cap of 6-th century up to AD, and today under « asphalt paths» it is possible only to guess finds - are all "«randomnesses"? About german effect and to speak it is not necessary, since practically all villages in PriAzov, where were of fundamental german construction, have declared in due course unpromising and practically all these houses today are destroyed. But there is a memory in metal and rock to delete much more easy, than in the people. And the people, actually, nothing has forgotten and will not forget, as though politically loyal historians tried. Whether and so difficultly to find the documentary proofs? It appears - no. Let's light the first fundamental issue. Whether there are basis to assert (approve), what the acceptance of Christianity should not wear sharply expressed political character, and first of all - to be accompanied by the tight internal work entering on this path of spiritual construction?

THE CONFESSOR CANNOT BE ADVANCED a software to the ORDER

History has put experiment and to our happiness the civilization the chance yet has not lost. All of us as miss from a field of vision the Armenian Church. And you see Armenia per 301 years became the first state accepting Christianity as state religion (!). How well be "«pioneer" each contributor well knows.

Therefore it was necessary to small Armenia in 312-313 to counter to Great Rome trying to urge again to worship to the pagan graven images. But the Emperor to a Maximin had to struggle for the first time with the christian people and he has receded (!). Doubtlessly, what is it for centuries has sped up acceptance by Roman Empire of christianity, which one per 325 (under the initiative of the Emperor Konstantin) has conducted 1-st Ecumenical council and on its «Article "of faith" was adopted. And already Emperor Pheodosiy 1 (379-95) has issued a decree about closing all pagan temples and the christianity finally has turn intoed state religion for all Empire. In the same time and the GOTHAs too christianose (!). As we see - backlogs (lag) in spiritual growth (increase) ours Fathers to ourselves did not allow. But all started with small Armenia and with sincere spiritual Labour of King Trdata, sacred Voskenianov and Sukiaseanov.

Has passed more than six hundred years - and Russia, the part of pagan slavonic nations come to an authority in the GOTHAs-hetty's State (is more valid), has accepted christianity (988), but Europe and Armenia is far from being as, and without delay, as very much the policy solution at the expense of strongest pressure of a state authority, when «Putiata baptized by a fire, and Dobrynia - sword». It is impressionable Armenian King together with all court yard Grigoriy Prosvetitel 66 days preached christianity, but only then - after executed large intelligently - spiritual Labour - baptized. The chiefs of the slavs have preferred the strong-willed, extreme accelerated solution, when who is not enough something realized (certainly, «the catechumen pagans» could not agree with such unscrupulousness and have estimated all happening as violence). On how much it all is severe better will tell theologians, the historians and psychologists, and we can only with a position of a system approach say, that any violence can not pass without consequences, which one at large scale will be felt by centuries.

The healing of King Trdata about the subsequent acceptance of christianity by all imperial court yard and declaration of christianity by state religion of Armenia is possible to estimate, as outcome of an intellectual Labour and sermons of apostle Phadey, apostle of Wartholomew, consequence having put of Spiritual exploit - martyrdom - sacred women-ripcemianok. To him the contemporaries the special value then, but also the World today very highly is evaluated by such Labour and untimely maintenance from life by each christian throttle (see WWW.CIC-WSC.org).

But, that is interesting - the Armenian Church was shaped and was plotted in Armenia as the independent, autocephalous christian Church, but with full observance(holding) of seven ordinances (baptism, miro-spread, repentance, partaking, wedding ceremony, ordaining, soborovania). Therefore for consecration(ordination) in Lord of the bishop St. Grigpriy Prosvetitel, healed Trdata, solemnly has departed to Cesarea Kappodakiyskaya, where was hand-put the Kappodakiyskaya's bishops led by Leontiy Cesariysky. In general everything, that is known to us about first steps of christianity in Armenia and construction of a Cathedral St. Echminadzina (303 «Has left Only-begotten»), the spiritual threads from which one connected and will connect together hearts of all Armenians settled on a world, urges with any special respect to fall into of that tradition of religion, which one was established in Armenia.

In the fundamentals of this tradition the Bible lies, and also solutions of the first three Ecumenical councils - Nicaean (325), Konstantinopol (381) and Effeskogo (431), i.e. those cathedrals on which one did not influence yet opposition of Rome and Constantinople (!). And you see in the same period GOTHA was acceptance of christianity, which one were learned to arianism till 381 by the bishop GOTHA's Ulphilas, erected in Lord in Constantinople per 341 (!). Last, in my judgement, is specially important. Such steep communication(connection) Gotey with ecumenical patriarchy has allowed through 1437 in September, 1778 - before allowed Crimean Hahn by a conclusion of the christians from Crimea - 24-my Metropolitan Gotey and Cafa, Ignatius to serve an action of thanksgiving to the centuries-old Patroness of the christians in Crimea - God's Mother, on which one were present also archimandrite of the Armenians Markos (!) and roman catholic pastor Yakov (!). Was not till 1054 and already for a long time no (after 1967r.) Even of formal inconsistencies between the christians, which one would not allow together to be asked to the one God. But in XV111 century it for the first time for many centuries was executed by 24 Metropolitan Gotey and Cafa. And this not random phenomenon, and principles of IKONOMIA, deeply acquired and lead up to practical implementation. A little prematurely to do such severe conclusion, but I shall state the supposition, what exactly therefore to Katalikos of all Armenians come also of Alexias II (bulwark of the Russian Orthodoxy), and Ioann Paul Second (bulwark of a catholicism)., therefore in city, where there was last Metropolitan stand - of 24 Metropolitan Gotey and Cafa, of the Sacred Ignatius - in Mariupol - the Civil International Committee on preparation of a public opinion for realization of the First World-wide Congress of a Spiritual Unification in New York in 2001 is generated and consequently since 2003 in Spain (Zaragoza) the electronic journal of Civil International Committee (see works. www.cic-wsc.org), which one permanently subjects to attacks of hackers (all of us realize why), but which one prolongs to bear light of the TRUTH to the intellectuals of a World. All this not random phenomena, and deeply interdependent developments of honest intelligently - spiritual Labour of indigenous population of PriAzov and all Ukraine, in lodes(veins) of which one the blood of the proud and spiritually of developed people flows, which one the historians of all world name as the GODS - GOTHA. What the steep sincerity of a faith and hope outgoes from St. Echminadzina and from Temples of PriAzov and Crimea. The believers in these locales do not want to listen

spiritually to reprobate people invoking for bribery and a computer terror (Conferences by 2003 and 2004 in Mariupol). They are much higher already today of flow of political gamble and nobody of the necessary scrambling for an authority (specially, when it is visible, that by an authority could not and can not use in concerns of the people to any more its seek). By the way, such ironic attitude to an authority exhibited and Hetty, which one quietly returned a visible authority that Skalotam in 5 century up to AD, Bastarnam per 185 etc. - there was no yet actual threat of loss of the ground. The wise people did not want to waste time on anybody the waste game of artificial ambitions, as well as today - present Ukrainian you will see in policy very little - uninteresting for them this occupation - it while reprobately, in their judgement.

And what happens on «the originally Russian grounds»? The constant military campaigns and, as outcome, regeneration in the Middle Ages of paganism, about which one very figuratively and sympathetically are written by the academician Boris Alexandrovich Rybakov (« Peter Borisovich: search of the writer «Words about a shelf Igor», 1991). But there can be this temporary departure, and all was farther only at a high level of spiritual culture? If - there is a very severe certificate Alexander Sergeevich Pushkin. In « Two fragments from other books» (Compositions A.S.Pushkin: the full convention in one Tom. // Publ. 6th , under edit. P.V.Smirnovskogo. - M., 1909) A.S.Pushkin results following words in 1725 on a bier of Peter First: « Exhorting has read above him a sacrament prayer: I believe, My God, and I profess, yako You esi and other. Peter has said: « I believe, My God: help me to my faithlessness» and it everything, that rather wondrously (is said in the manuscript of the witness) with affection, by a face to glad very could made, spoke; after has silenced ... ». If in 1725 the Emperor of the Russian Empire, with a name which one till now is linked by successes of Russia down to the first industrial revolution, asks the GOD to help to him in his faithlessness, all unimaginable difficulties of becoming of Christianity on all territory of Russia become clear. And it is more to stay on this problem there is no sense. It is possible only to mark, that absence of the deeply acquired moral principles and intellectual fundamentals in administrative a ethnic-social layer aimed always to indemnify mandatory total control and absolutely brutal control, even the most close members of monogynopaedium were attracted in which one. So, father of A.S.Pushkin the governor has attracted in this activity, having entrusted to keep track of by the son (and he has not dared to refuse!). About it with a deepest bitter taste writes A.S.Pushkin in the letters and it is possible to present spiritual unrests and feel no-exit, which one were gone through by this talented person. But even, despite of it, he did not aim at mors, as it would be desirable for some «workers of a secret political police». The Great Intellectual of a World up to the end struggled with dullness and obscurantism "of «Spectators", slowly and steadily deleting the own people (read the letters of the poet and you agree with us), providing yourselves full idleness and, certainly, sluggish and comfortable degradation. With what there «Article "of faith"! All degenerates in a formalism and profanation.

And about "«epoch" 30 years XX of century in Soviet Russia are written hundreds volumes of researches, novels and angry articles in all angles of a world. In this period of a power of the Sacred Ignatius from Church have thrown in a cellar of a local lore museum (but also that well, that have not deleted), and all Temples in Mariupol have destroyed, only in Taganrog have kept Russian Church, and Greek and Armenian too have destroyed. And such was watched on all territory of Ukraine. However ... Temples have revived at first in 1943г., and then is final in 80 years XX of century. And this process to not stop any more.

Really - the confessor cannot be advanced under the order, but it is impossible under the order and to delete!

THE PHENOMENON GOTHA

The historians, as by Eastern, and Western Europe exhibit infrequent unanimity in the description of this people, and main - in his definition: the Gods (Gote on the German God) and all. Any people on our planet has not kept in a history behind itself such of the take upon himself name. Probably, it would be desirable much, and the destiny has disposed only and not differently. Than special this people differed which one, in opinion of the historians Francium and Ukrainian diaspores, distributed christianity to territory of Ukraine, how are you think? Where was there a state of "«Hermanariha there »"?

Krager M.K. in the monography «Ancient Kiev. Essays on a history of material culture of ancient Russian city. (т.1. - Moscow - Leningrad; publishing house AS USSR, 1958) wrote: «The Dnepr's city some time was capital of GOTHA of a Kingdom ... In an ancient song about Attila ... there is a similar word - Danpar - «of a Dnepr's place a famous forest » ... the Explanation of a fitted verse "«Hamdismal" results that in this song - one of most ancient songs Eddy - goes speech about capital of GOTHA in any place of Eastern Europe, above "«Danpar", which one is naturally identified with ... by Dnieper ... Locating a place on a coast of Dnieper, which one could be by arena of operations of the heroes "«Hamdis-mal", Vigfusson considered, Danparstadir the ancient central city on Dnieper - unconditionally of Kiev ... Here in Kiev Vigfusson sees central point of GOTHA's Empire - capital Hermanariha» (pp. 65-69). With him it is difficult to disagree, taking into account that position, which one we saw with the German colonizers till 1917, and specially, those tendencies, which one have developed in an educational orb.

Therefore we want to give little part of own information in this system of the proofs. In 2002, we were in Russian-Ukrainian «joke of immigration» and considering in Taganrog a not so qualitative photocopy of a card of Fra Mauro (1459), we have made small discovery. At first, title of the neer-Black-sia's region between Dnieper and Danube legibly acts, which one is named Gothia, and locale for the first thresholds of Dnieper - Ruenia.

Secondly, the titles of cities are written or so shallowly, that they on the small format of a photocopy almost cannot be disassembled, or in general there are no titles. With ancient block constructions in region Tanais all is differently. It is doubtless, that the Tanais's locale on scales of that time densely enough was populated (some cities), and in region of a Таnа-horn its are two cities. Their general(common) title is specially given by large characters at the expense of the area, which one should take MEOTТЬ (Meotida - Azov sea). Also does not call doubt, that seven characters identified correctly, and eighth character, though resembles and "«o" and "«u", but is closer to "the «U" character. Therefore in a Latin record the title will look like the following - Hupache. It is approximately possible to give following translation Hupache - center of trade and packing (shopping center).

And if to use the old-Gotha's dictionaries, we, probably, shall receive more faithful representation about a title of the largest trade centre in PriAzov, which have many hundreds years. This Centre one simply stands on an is fundamental made system of the underground communications(services lines), in which one even during showers it is dry (the natural cooling works), as the local residents tell.

These constructions are "«younger" considerably, than ancient -Greek's port in this region (2700 to colonies Mileta in PriAzov; for 40 minutes the students in region of ancient port have found 7 pieces of the ancient-Greek caps!), since they already have a masonry arch of walls and very developed system of croppings in seams of rock not subjected to common movings(movements). And all this speaks that by us practically in a cabinet are retrieved « of a marine capstan» of GOTHA's "«Hermanariha" in PriAzov. It would be desirable to find more archeological confirmations of this hypothesis.

By the way, the hypothesis about existence in an antiquity Hupache - center of trade - is published by us in the article « a FORGOT CARD: Taganrog is much old than the official version » (A.Polansky, newspaper "«Almamater" TIM&E, № 4 (25), 2002. – p. 2) and in the Report № 9 Azov Department of AES&E (Taganrog - Mariupol, 2002).

* * *

The position Orbine Mavro is close to us, that Gotha « transmit under command of King Philimira in a Scythia named Ovin, then have stayed at the people Skallah. They wonned them and these, were divided Gotpha. One part of Gotpha has subdued to itself Egypt. Other, under command Amada of the King has gone to East. Other under board Valtovym have addressed to West » (Orbine Mavro. The book historiography begining name, glory, and extension of the people slavonic. Is collected from many books historical, through mister Marourbina of the Archimandrite Ragujsky. - Is transferred with italian to the Russian language and is printed out ... in the St.-Petersburg Printing house, 1722, August per 20 days).

However, destiny of this people in PriAzov and on spaciousnesses of Ukraine us most of all stirs. You see the historians uniquely indicate that the GOTHA's King Hermanarih was routed Hunny per 375 (but it has not stopped missionary activity of first metropolitan Gotha Ulphilas, which one kept 6 years bishopic ministering). But who stood for invasion Hunny? Whom it, first of all, was expedient? The problems not such insoluble, as it seem on the first view. Invasions it is in general simple so do not happen and « the movements(travel) of the peoples» have not only natural basis,(fundamentals,) independent of the people, (diverse natural cataclysms), but also political reasons. Apparently, what to whom that was expedient to lower a role of the Gotha's State, but whom? Probably, that people, which one planned to reach on of Gotha's ground. Whether the nomads Hunny in PriAzov and in Ukraine were long held, how are you think ?

Them is very fast and without the special battles the slavs have pushed aside, which one before is successful for itself interact with Bospor's Kingdom (not without reason Tanais was considered of the Greek-meot's trade centre), actively counteracting together with Rome to strengthening of Pont's King Mitridat. Prince of the slavs Tazavaza has come in a history by scrambling with by Pont's Kingdom. Certainly, the Greek political wisdom was acquired by a young ethnos and he in GOTHA has seen for himself much more large hazard, than in Rome and Greeks. Of course, the slavs also were by the successors of Gotha's territories, and having come in Kiev, they already from this geopolitical center of an ancient world have begun to dictate conditions of the agreements of Byzantium. This view supports M Korduba («an Illustrated history of Bucovyna», 1901), which one also considers, that the slavs came from east after departure of the German and Mongolian peoples. Certainly, this first slavonic state named Annty, is long not live (5-6 ct.), since actually GOTHA did not concede the run in grounds (it it is visible even from a card of Fra Mauro). Some names Annty's men - Mezamir, Ardahast, Pirohast today are known for us even, and prince Goz (is very similar on "«God"), as well as all his predecessors on these grounds - has become famous by campaigns on Byzantium. By the way, GOTHA describe them, as persevering and valiant people, which one liked public life. Therefore it is possible to make the appropriate supposition. It was practically first in a modern history (starting anno Domini) test of strength between GOTHA and slavs, which one saw, strangely enough, general purposes in achievement expedient to themselves interactions (trade, obtaining of tribute) with Byzantium.

The mutual respect, and is possible also complexity in many respects of general(common) geopolitical problems, has reached the apogee, probably, at kinging of Askold (856-882) in

Kiev, which one not only has accepted christianity, but also in his board in Kiev the first christian bishop of Kiev Michael (M.Taube " Rome et la Russie avant l'invasion des Tatars ", 1, Paris, 1947) worked. And it almost 100 years prior to official baptism (!). Any historian does not doubt of an ethnic fitting soldiers of Askold, as well as him to the variags-GOTHA. And temporary transfer of a military authority to the descendants of GOTHA from shores of the Baltic sea is beaten in an official history, as «the Scandinavian version of kinging». Askold also, as well as practically all his predecessors and GOTHA and slavs, traditionally was made by a campaign on Constantinople/King-city in 860. And per 874 between his principality and Byzantium was are concluded the trade and cultural agreements. After Askold some time was Dir. For this period the managers of the slavs has collected strength and could again leave on an independent level of control by enough large territory. You see that in Tmutorokan of ground originally went into Kiev Russia - it is a not ordinary fact. In these grounds it is necessary to search for sources of that political intrigue, which one has resulted from the slavonic state derivations have made of the powerful State in X century (the political Greek wisdom from Bospor's Kingdom was intensively acquired). Certainly, a GOTHA's unit aimed organically to enter in a structure of the first large slavonic state. But this was hindered by distribution GOTHA practically on all modern territory Germanium and Poland, where they created the independent states, keeping in touch with a spiritual native land - Christian GOTHA's Archdiocese in Crimea. To hinder officially this was difficultly, as were necessary the GOTHA's soldiers and the state's people. Russia was boosted, but has grown effect and independent of the GOTHA's States.

And at this time and Hazar's Kaganat (headed a follower of a judaism) has shown the forces, having united in a unified fist of the nomads (not only Greeks and slavs to use their services). Olga it was necessary, as with the most malicious enemies (if you read honor closely annals, you will be afraid) to do with the non-payers of excessive tribute (intended to Hazar's men) on recently affixed grounds. And nomadic peoples have begun everyone is more severe to declare the rights on signing on a civilization under the standard script (union to culture through war with more developed people). Certainly, Svatoslav Valiant (964-972) has refreshed information base of political experience of the slavs on organization of interaction with the nomadic peoples, when has destroyed of Hzar's city Itill, Sarkel and Semender (not all chiefs of Kaganat were deleted by prince), but the most refined and perspective political combination was still far at the front.

Probably, much till now would be represented to us not clear enough since 1200 for 1500, but we in 2002 have acquainted with the very tactical book "«EMPIRE" (Nosovsky G., Fomenko A.), published in 2000r. The writers render to all readers really «Bear's service» - when they the immorality making moral – it is untihumanity. However, number(series) of the facts which have been set up in it, the attentions merit. They, by the way, confirm all most courageous hypotheses of L.N.Gumilev. And the essence of these ideas is encompass byed following. On a large literary and archeological material is rotined, that the Powerful Mongolian Empire is than diverse, as Great "«Mongolian" Russia (p. 246). And further writers give the treatment of well-known events. So, for example, they consider, that:

« In 1223 « the Mongols » = great have routed polovecky (=польские?) and Russian (= prussia-gotha?) and a south-west-slavonic troops.

In 1230-1236 years "«Mongols" = great have intruded on Caucasus.

In 1236 have devastated Great Armenia. « The Mongols have fired almost all Armenian cities also have deleted capital of Great Armenia, city Any, which one could not recover after that rout » (After Marco Polo. Travels western travelers in countries of three Indiums. - M.: Science, 1968. – p. 161) ...

In 1238 "«Mongols" = great have trapped of Kiev.

In 1240 Poland was waste.

In 1241 "«Mongols" = great have routed army Henry Silezsky near Wroclav.

In 1241 have intruded Poland (= Polovecky's ground?), and then - in Hungary, Moravia and Silezia.

In 1242 the troops of khan Batyua = Cossack Batko has reached shores of the Adriatic sea.» (pp.146 -147).

It is not very interesting to us at all to attempt to patch all "«too courageous" hypotheses of the writers, but one - the truth, that REALLY GREAT TATARIA (on many «recently detected» cards captures territory of all countries of Eurasia with a planned economy!?) could not do without the help of one of the european peoples, which one had an appropriate intellectual level of development. Therefore, probably, Lev N. Gumilev was of the rights - there were allied attitudes of the slavs Russia with unions of nomadic tribes, which one name in a world(global) history "by «Mongols".

Certainly, « WESTERN EUROPE WAS In a PANIC, the PAVOR HAS ENVELOPED NOT ONLY to GERMANIUM, BUT And FRANCIUM, BURGUNDIA And SPAIN and has entailed full stagnation of trade of England with continent. The exception was made only by the emperor Fridrih II, which one conducted with Batyj correspondence obvious and secret» (Gumilev L.N. Ancient Russia and Great Steppe. - M.: Thought, 1992. – p. 512). It is being, especially it is impossible to overlook(forget), that in Europe at realization of act of war the knights aimed to keep a Papal Bulla about impermissibility to use supports under arbalets, that the accuracy of fire, and consequently also probability of assassination was not increased. But absolutely other principles were for the soldiers who have come from East, which one applied at a conduct of combat venenate booms, and in combination to an onion "«Sagaydak" (product of military art) to be salvaged practically it was impossible. Victory (if this beating name as a combat) should be practically absolute. When the christian precepts even were harmful to an invasion army.

The response of christian Europe was unequivocal, but not dispossessed critical thought: «Suppose, that these TARTARS, one mention which one very bad, happen from ten nations, which one have followed, having rejected the law of Moses, behind the golden bullocks and which one at first Alexander Macedonian attempted to grind among abrupt Caspian mountains by pitch rockss. When he has seen, what is it business it is from above of human forces, has invoked to the aid of the God of Israel, and refer tops of mountains one another and the place, unapproachable and no-go was derivated ...

However, as is written in « to a Scientific history », they will leave on an edge(boundarouse) of a world to bring to the people great disasters. There is nevertheless doubt, whether are them the nowadays issued tartars, wherefore they do not speak on the european language, do not know the law of Moses, do not use and are not operated(controlled) by legal institutions» (Rayt Dj. To Geographical performances in epoch of crusades. (Research of medieval science and traditions in western Europe.) - M.: Science, 1988. - pp. 240-241).

Really, invasion has exposed not only Europe, and famous «a Yellow campaign» on all territory of modern Iran and Iraq down to Damascus? Unless only against men of christianity there was act of war, how are You ? Make all this may the soldiers could only, which one practically did not profess any of world(global) religions, and main - their chiefs concepts of conscience and nonpredatory Labour were alien.

Us want to assure, that all this was coolly planned and is realized by the maximum dignitaries ancient Russia (!?). It up to what degree is necessary to not like the people, that to its have thinking, how are You ! And even with pleasure to quote, that «down to XY11 of century on Russia the flow went Western-European argentum ... Russia was literally choked with argentum and gold at full absence in that time of own argentine ore mines»

(G.Nosovsky and A.Fomenko with the link on Spasskogo I.G. «Russian efimky. Research and directory ». - Novosibirsk: Science, Sib. Board, 1988. – p.5). Certainly, smoke without a fire does not happen. Probably, also there was a unreasonable tribute on the Western-European states, but then becomes understandable all feral skews in the Russian censorship (not of Volter's thoughts was afraid Benkendorf). And the reasons of feral suffocating atmosphere for an imperial throne are clear to us today. Think, who feels himself - that worse who pays tribute or that who it receives? Certainly, last permanently feels himself by the THIEF. And this intellectual press rises within several centuries if to believe G.Nosovsky and A.Fomenko. What inhuman psychologic load on administrative frames, from which one and to evade it is impossible, and the monogynopaedium of the Emperor is compelled to bear as a lamb to the slaughter this cross practically up to the end. Difficultly have prayed a centuries-old crime against millions people - even in its not having repented, specially, when also faith is adopted from political reasons. But main - it is necessary all to hide from the own people, which one should provide permanently belligerent army (it is necessary to keep all to keep in awe) foodstuffs and soldiers, which have grown numb and expecting the best times. Will be whether there best times for loafer ?

The one who recommended such nonequivalent exchange between West and East is fine perceived - on what dooms the receivers of tribute. He perceived - what waves of hatred will mount against «of the collectors tallers». It was the artful and thin revenge for robbery and own degrading, and on the part of the slavs - plate of absence of comprehension of moral trues (you see the people all the same should for it pay). This was necessary (!) permanently to bring up Europe to such degraded pavor - «In January, 1567 the general(common) audition has passed, as if great prince Moscow is already completely to a new campaign on Lithuania and accumbent countries in following year. Yes the God will pay all this to best.

Owing to so numerous campaigns and famous particular acts the NAME MOSCOW's MAN BECAME a SUBJECT of GREAT PAVORS FOR ALL ADJACENT PEOPLES And EVEN In GERMAN GROUNDS, so that there is a fear, that the God on great our sins ... will subject us to gross tests from moscow's man, Turks or any other great monarches and strictly will punish us » (Gerbershteyn Sigizmund. A slip about MoscowLand.- M.: Edit. in MDU, 1988. – p. 78).

On how much severe there were payments of Europe it is possible to see from the will of Venetian Doj Tomazo Mochenigo (1414-1423), which one marked, that Venice mints annually 1,2 million. golden and 800 thousand argentine dukats, from which one 300 thousand dukats departs to SYRIA and EGYPT (see. G.Nosovsky and A.Fomenko). If after G.Nosovsky and A.Fomenko to suspect, that these means fell on Russia, the hatred of the Europeans to all financial managers of Russia of that time is clear. And them to search long it is not necessary. What world(global) center was not subjected to plunder "by «Mongols"? Correctly, therefore Doj of Venice E.Dandolo has resulted the crusaders in Constantinople and has plundered it (it was, on visible, is far from being his whim).

Very dearly the people of Russia has paid for such geopolitics - practically by century hibernation combined to full stagnation of all thought and civil life (of a consequence that all of us today is perceptive), and consequently also absence of actual intelligently - spiritual development. And at this time Europeans searched for escaping a financial bench vice and opened America; increased competitiveness of the goods, committing industrial revolutions. The peoples developed, instead of it is simple very bad life, permanently waring and threatening the neighbours! Simply surprised, as Russia has not turn intoed Turkey with its a Lekurg's system (all the same christian precepts the people has perceived).

But, most likely, at all apparent reasonableness and organization of maintenance of the european population is there was, probably, an enforced policy under effect «for itself wise»

of the advisers of following to passonarity rise(ascent) of a self-consciousness of the nomadic peoples of Asia. So, apparently, considered Lev Nikolaevich Gumilev and his point of view we divide.

But is simultaneous with such particular acts was solved the problem engagings to indispensable on Russia of activity and descendants of the GOTHA's population. And there was no other path, since whence was to take the capable people (own masters did not prepared, and "«destroy" in constant campaigns and wars).

As the descendants GOTHA have restored peaceful life on considerable territory of Ukraine (in the lower reaches of Dnieper) and in Crimea to X111 century. The robust, hardy, hardworking population of PriAzov allowed effectively to work even to the market of the slaves in Cafe (Feodosiya, Crimea) during centuries (was possible to trade only robust people). And they were by the main force in scrambling with by GREAT TATARIA in Europe, where by them the generated(set up) states desperately acted against the conquerors. We shall see it in figure from the book « The travels of Marco Polo. » (The complete Yole-Cordier edition. V.1.2. - NY: Dover Publications, 1992), on which one the figure of Tatar's man under legs Henrih II, prince Silezia, Krakow and Poland placed on a tomb in Breslay of this prince, killed in battle with the tartars is visible «at Liegnitz, April 9, 1241» (see. A Fig. 1).

Attempt to lean on this people in Russia implemented on many lines - and through link entrainments them in the Cossack detachments, which one alone and were based in the beginning from the descendants of GOTHA; and in attracting in Russia of the german handicraftsmen, military, peasants, scientific, trade people; and even in installation of dynasty rejects with german aristocracy. Always managers of the slavs aimed to take the most of this, on the present, special people, encouraging even learning of the german language practically on all modern territory of Ukraine.

But with them was very difficult of the Russian Emperors. They did not want to reconcile to extreme stagnant character of existence in Empire. Tens revolts Cossack – GOTHA is characterize this people, as extremely fissile and original. Yes the Cossacks because they had of the GOTHA's radicals did not give education, hoping, that of them will forget all, but a memory was leving, and the musical faculty «of All-Ukrainian University» worked on each farm - people was singing, dancing and have developed contrary to all "«wise men".

Therefore Nation remembered both Mazepa, and Pilip Orlik. The Nation remembered both Kalnyshevskogo, and Grigoriy Catholic. The people has stored the memory about both Stepan Razin, and Emeljyan Pugachev, and Peter First with the senators even is very good had remembered of the Bulavin's revolt. As far as and extreme the bad (uninteresting) life was in Empire best has shown A.S.Pushkin in «Histories of Pugachev's revolt», when both clergy of small cities and people, practically knowing of the future end of Pugachev, supported him at his throwing on Russian Land from Kuban up to the Murom forests and from Siberia up to Moscow, bringing bread salt, entering in squads and in general aiming even hour, but to live on FREEDOM! And it kept up to the end of 1775, is probable, and consequently it was possible 24 to Metropolitan Gotey and Cafa, Sacred Ignatius to remove the christians from Crimea in PriAzov on the Land of home grandparents. The Cossacks - Gotha have helped to GOTHA and christians of Crimea and Metropolitan of the archdiocese. Interestingly - has understood it A.S.Pushkin whether or not? Is probable, when wrote « the Kamchatka business», much began to clear up for the poet - historian. Specially, when described loss «Kamchatka's Ermak» - Atlasova and revival of Cossack-GOTHA traditions: «the Rioters have entered in Small City and, separated on a three, steel on three court-yard, till ten persons together. Main of them were Daniel Ancyforov and Ivan Kozyrsky. The rioters have plundered of the things of killed officers, have got CIRCLES, steel to bear a

banner, up to seventy five persons were multiplied, have selected by the ataman Ancyforov, Kozyrsky - esaulom; with Tigily have brought of the things of Atlasov ... on May 22 (1711) has sailed to one Small City set kamchadals and Kuril's men and have precipitated the Cossacks with cry and threats. May 23 Cossacks have served a prayer service (with them there was an archimandrite Martian ...), have sent half of people on a sally. The battle kept in the evening. The Cossacks have overcome, having lost three persons killed. The savages had killed so many that the Large river was full by their corpses. After the victories all men from Bolsherecky Small cities have subdued also steel yasak to pay on former. After that the rioters in Kuril Land caught and were behind a channel on the first to the Kuril's island and inhabitants have imposed for the first time of the yasak» (only very not simple people could commit such, prolonging democratic traditions of a Cossack-GOTHA's CIRCLE). And how much was of revolts of indigenous population of Siberia, which one Cossack-GOTHA's men was compelled to pacify! After the publication even such actual material the appearance of Baron Gekkerna and Dantes, on visible, is foregone. But whether the intellectual and spiritual and enlightenment-rebellious Labour of the Historian - Poet is estimated by his contemporaries, how are You think ? Probably, yes, since Prince V.P.Gorchakov, one of most respected by A.S.Pushkin of the friends, already aslope of years in the end of XIX century, creates not only Hague International Court, but also commits not less impudent visit to Kancler Bismark and the act of war does not start (!). The descendant of GOTHA also SLAV have understood one another! Really Non destroy the intelligently - spiritual Labour, of GOTHA, of their descendants, of Slavs (!).

But not only in Russia, and in many States of Europe aimed to lean on the hardworking germans (immediate heirs GOTHA). So, it is well-known, that the agriculture of USA is obliged to the development and competitiveness to the farmers from Germanium ("«Encyclopedia" of Rotshylda) etc. etc.

But, what such especial attracted in GOTHA and to their descendants attention of the chiefs, both East, and West? A problem extremely interesting.

WORLD(GLOBAL) ARISTOCRACY

The outstanding spanish philosopher Hose Ortega y Gasset has divided mankind into spiritual aristocracy and spiritual plebis. In epoch of revolt of the masses Hose Ortega y Gasset has opposed the people which are making great demands on - to the people of crowd. The best people bear and assert(approve) the best ideas. The person of elite is a person of energy. The nation - on Hose Ortega y Gasset is «a human mask(oil) organized and structured by minority of the selected individuals» («Revolt of the masses» // Ques. Philosoph. - 1989. - № 3-4).

Just, such leaders in the majority of national societies the descendants of GOTHA act (it does not mean, that only they, but they are more often). And why? On this problem it is possible to give only approximate answer.

We live in very interesting time, when is forecast so much of Great discoveries for the nearest decades (group of a Clarke), that the consciousness is failed to plot the forecasts of their possible(probable) consequences. The mankind substantially has left in space and already studies a Mercury, Mars and plans flights of astronauts for Mars. The person substantially starts to affect neighboring space and starts acutely to realize value of each lived day, special value of the existence. Industrially developed states have supplied(ensured) to the citizens a life time at a level 75-79 years (data of 1990). Actually for anybody the opposition of the conclusion will not call, that the high level of a civilization is more white

provides more continuous life of the population, that, certainly, is already consolidated and on a genetic's level.

And here we should say, that a feature of the GOTHA's population always was the actual life time more than 80 years for the women, despite of all complexities and difficulties. This fact can be explained by different hypotheses. But it uniquely selects representatives of this people from any masses.

Therefore very many today want to name themselves as the descendants of GOTHA (GODS) or even to say, that the Gotha are the descendants their more ancient ancestors. But from these imaginations nothing is received. The Gotha are the successors any very highly developed CIVILIZATION, the genetic code by which one prolongs to live in their descendants and today, specially, on a female line. By the way, it very well perceive in Germanium, considering(counting) parentage on the mother. And the ideologists in Germanium do not need to search of mythical Ariuses, since for actual «brilliant» of a nation for them have before eyes practically.

You see the GOTHA's population had really infrequent qualities, which one have found reflection not only in monuments of culture and art, but also in a genotype. It alone also explains effect of the long live of Cossacks on the boweries - farms, despite of extremely rough and not distinguished by observance(holding) of a mode «of a Labour and rest» life. Let's recollect, that Kalnyshevsky has died per 115 years, by staying 25 years on Solovky and not bending heads before the Russian Emperors. It is a lot of such facts the history knows, how are You think ?!

So, there were circumstances, that to us in arms(hand) the extremely interesting ethnographic material has got, which one characterizes this special for a modern civilization the people.

You is fine know, that by a main specification, which one speaks about physical and moral health of the people (about his ancient and GREAT history), is the life time of his representatives.

We offer you to see at a photo Pelageya Danilovna Polansky, Anna Grigoryevna Muller and Evdokiya Timofeyevna Cherniavskaya (Catholic). You can see likenesses between these women, and you see they come from miscellaneous locales of Ukraine (Gusiatin on boundary with Avstro-Hungary, Kiev and PriAzov; they all from GOTHA - «HERMANARIHA»). Apparently, that all of them are the descendants of the Great People. It is apparent for us, since all of them have lived very long life (on 20-25 of years more long-lived, than ambient the non-gotha population) and for them nobody created «hothouse» of conditions, and to the contrary. But main - the moral and physical health they have transmitted to children on a female line.

Anna Grigoryevna Muller herself has lived 94 years, and her daughters, Olga and Alexandra, have lived 86 and 79 years.

// Anna Grigoryevna knew german, and her daughters Olga and Alexandra studied german officially in medical schools. //

Pelageya Danilovna Polansky only because of nervous shocks has lived 71 years, but all her daughters have lived more than 80 years (Ekaterina - 84; Natalia - 81; Sofiy - 90). And it despite of hardest living conditions!

// Pelageya Danilovna knew german, as well as her husband Paul Antonovich, and her son and the daughters studied german in gymnasia. //

Evdokiya Timofeyevna Cherniavskaya has lived 85 years (was born on March 1, 1906, and has died on March 31, 1991), and her three daughters now more than 70 years and they live in Mariupol.

// The daughter of Evdokiya Timofeyevna - Olga studied german in the school. //

There can be a randomness, what all of them about large respect fell into to the German people, and the German administration paid to them by that, how are You think ? Certainly, no!

Evdokiya Timofeyevna Cherniavskaya put always to us as an example German punctuality and diligence, and the German administration has salvaged her and her children in 1943.

The daughter of Anna Grigoryevna Muller – Alexandra Andreyevna Melnic worked since 1941 for 1944 in Vinnitsa in bacteriological station. Therefore she had the full right together with the mother to live in Vinnitsa in downtown in a flat, which one was given them by German administration.

Pelageya Danilovna Polansky have blessed of the daughters on marriage with the German intellectuals (husband of Ekaterina in 1937 have shot), and also has approved of spoilage of the son with Olga, daughter Anna Grigoryevna Muller.

But most interesting, that at maintenance of freedom of choice children and the grandsons these of the GOTHA's women find one another and aim one another to support. It was with Alexander Pavlovich, son of Pelageya Danilovna, and Olga Andreyevnoy, daughter Anna Grigoryevna Muller. This was watched and with Valery Alexandrovich, son Olga Andreyevny, and Olga Vladimirovna, daughter Evdokiya Timofeyevna.

And why? That is why, that these people, as the white crows, differ in East Europe from the people, ambient them, first of all, moral qualities and diligence. Also it is a reality, which one it is necessary to note.

Valery Alexandrovich and Olga Vladimirovna have found one another in St.-Petersburg, by considering in each other related throttle(douche) (in such large city!). And Olga Vladimirovna has gone for Valery Alexandrovich in Dgambul's area and it actually has salvaged him.

// The son Olga Andreyevny - Valery Alexandrovich not only studied German at school, but also handed a candidate minimum in German in Donetsk University. //

But one moment is more interesting - morals and diligence are transmitted generically. An example can serve a series of the members of Civil International Committee (see www.cic-wsc.org). By the way, the emblem of Civil International Committee was drawn too by the representative of the GOTHA's population PriAzov, which one is worthy to relate to the honest and hardworking people.

For all «of the retiring aristocrats», the names which one are adduced above high beginnings the throttle(douche) (Reason and Bravery - on Platon - «golden» and «argentine») substantially predominate. Just, they - on Hose Ortega y Gasset - also are genuine carriers of spiritual values of company.

Who PROVIDES STABILITY of the PEACEFULED SOCIAL CIRCLES?

The known sociologist of America of Russian parentage Pitirim Alexandrovich Sorokin per 20 years cited datas of Suterland, that «the companies low «of the savages» consist on the average from 40 men, mean - from 150 men, maximum - from 360 men, company «of the barbarians» already more numerous; the average for «lowest barbarous» of companies equals 6500 members, mean - 220000 men., maximum - 442000 persons. The company «civilized» of the peoples ... Gives on the average digit 4200000 men (lowest), mean - 5500000 men, maximum - 24000000 men. At last, company «cultural» of the peoples, starting with 30000000 men, reached in times P.A.Sorokina up to 200000000 men». It is possible to add, that to company of the «cultural» peoples, as to independent community, it is possible to attribute EUROPEAN Union, which one in 1998 included 370000000 men. With enough high density of the population - 115 men./q.km, And today number of the EC exceeds 400 millions men.

Just, these datas have allowed the first professor of sociology of Russia and Outstanding sociologist of USA P.A.Sorokin to formulate the concept of peaceuled circles, the size which one grows with advance of a civilization. If we are converted to the fundamental monography modern Ukrainian Lomonosov – George Wasilevich Schokin (« Mankind and Faith », Kiev, 2002), the datas of Suterland gains more less rigid binding not only to historical time, but also to most it is intelligently - spiritual to achievements of mankind. So with community in 40 men it is possible to link discovery and usage of a fire; with company in 150 men - distribution(propagation) of the map the woman - Goddess; with company in 360 men – have tamed a dog; with company in 6500 men - production of pottery; with company in 220000 men - beginning of processing of metals and their distribution(propagation); with company in 442000 men - population explosion and development of trade; with company 550000 men - Production of a paper and parchment; with company 24000000 men - widespread occurrence of the legislation on principles of the natural death; with company 30000000 men - heyday of art and science (epoch of Renaissance); with company 200000000 men - first association of a world(global) economic system on principles of the distributed responsibility; with company in 370000000 men - creation of the economic international subject with the polyalternative registration of cultural features of all peoples, dwelling in them, and ethnoses.

By the way, the mathematical view of modern growth of peaceuled circles has a following view:

$$N_c = (D_{real} - 1800)^{1,15} ;$$

Where:

N_c - aggregate number the person in «a peaceuled circle », mln. men;

D_{real} – Date after Christmas Christly (year).

So here in creation last three most intellection fissile «of peaceuled circles » a role of the descendants GOTHA yields to the analysis and estimation. It we shall try to light in the following article.

* * *

In this short article we have tried to justify expediency of acceptance of updated date Christianaety of Ukraine, with which one officially Christian Church educates the believers 1663. Per 2006 we, I hope, we shall mark 1665 acceptance by Ukraine of Christianity. As important this as relevant and Great Event for the Ukrainian people still will write both historians and christian priests. Not many peoples of Europe can claim for such continuous history Christianity, which one is obvious to each unbiased reader, let alone the believer. The refinement of date of creation of the Christian Church in Ukraine has vast value for recovery of an actual pass of a faith to hearts Ukrainian, which one have perceived it not as the political - conjunctural solution, but as realization fundamental for reasonable mankind of trues; not as means of strife for material benefits, and as path to recovery of sight and PRESENT SAVING. Certainly, on our part it only first share to national discussion of such severe STEP in SPIRITUAL CONSTRUCTION. Hundreds of the publications and not one volume of the scientific proofs are required, that all Christian Churches and the communities of Ukraines entering Catholic Church, have accepted updated date of creation of the Christian Church in Ukraine. But the beginning is necessary also ROAD will master GOING!

At once there is a problem on actual date of creation of the Christian Church in Russia. Certainly, to perceive date of baptism of the slavs, since creation of GOTHA's Archdiocese, in Russia will not be wishing. It is necessary to perceive and to know the Russians, as Russia entered

GOTHAs and also of their descendants in the ethnos in some stages(phases) and practically always with large pressure(voltage, stress) of forces. It can not pass without consequences for a national self-consciousness, above which one is already invalid to commit experiments. But actually of any strained interpretations also it is not required, and it is necessary only to follow to the historical TRUTH.

We shall be set by a problem, and why «varyge» -Gotha's soldiers of Askold and Dir so easily has accepted slav Oleg (882-912). You see Askold was already christian and, certainly, all his soldiers was christian (bishop Michael could not nothing do). Really riddle if not to take into account, that all first slavonic kings came in Kiev not from the Murom forests, and from this PriAzov, as Gotha, only on the part of Kuban (where then placed the Tmutarokan's principality). They could reach an authority only «having civilized» interacting with Bospor's Kingdom. And this interaction could not eliminate Christianity. Most likely, almost all soldiers of the slavs was Christianity since to accept christianity soldier easier, than King, which one should receive weight «unpopular» (frequently contradicting to the precepts) solutions.

If not this spiritual unified for different ethnoses a rod, would be difficult(complex) «varyge» -Gotha's soldiers to be subject slavonic King, and they were subject. Therefore conclusions respected reader, do himself.

Only we shall add, that in archives of monasteries, probably, it is possible to find even lists of the slavs, catechuman in christianity, in Bospor's Kingdom in 4 century, and also names executed this activity among the slavs of the Bishops, which one also had blessed on this ministering in Constantinople. Not forgetting Georgian King Ioann Mtacmindely, received in the award for a valid service from the Byzantian Emperor an island Athos, in X century has based an internationally known today monastery. The archives of this monastery did not shine and were not deleted. And unless all archives of Rostov and Krasnodar are studied? In general Russia interesting country - in 2002 to me was possible to find in the library of Rostov of the book, which one were not in the State central Library (Moscow). It is necessary only to look ... Certainly, the path of the expressed idea to decision marking at a state level will take in Russia not one year. At first, will be full ignoring this idea. Only, when will publish archives, suddenly one of the statesmen officially will exclaim: « we always knew it and already have scheduled CELEBRATION 1600 (or 1670) acceptance of Christianity by Russian people!» As it would be desirable, that it was held as soon as possible. You see the Faith cannot be received as the tool of policy!

Such conjuncture will redeem by centuries!
