My circuit to You is caused by pursuit to render positive influence on the development of democracy and humanity (particularly economic) in the countries of Central Asia which else absolutely just recently were completely dependant, as in economic, so and in cultural development from the Empire's nomenclature of East Europe. Situation in Asia you know, apparent, far and away better me to and You, just like to me, to worry the fate of nations on great expanses which were studied by the scientists of Sweden and in fates nations which actively participated citizens Your country*.

That is why ask you to recommend The president of your Academy of science to view the nominee of the Dr of economic sciences and The president of Kazakhstan Nursultan Abishevicha Nazarbaev on The Prime of Memory Alfred Nobel as to economics 2018 yr. In 2017 yr. the Institute of economical and socio-cultural researchers (cessionary DESMC The academy of science of Ukraine and DFC) offered your Academy of science to view the nominee of the Dr of economic sciences Nursultan Abishevicha Nazarbaev on The Prime of Memory Alfred Nobel as to economics "for developing global civilization the concept of The community of Universal labor and the commencements of its disposal in national state"**.

It is however, as member of The department of The advisers of American Biographic Institute consider it to specify definition having done her more replying economical and political regalia the first quarter of XXI century, name, to view the nominee of the Dr of economic sciences and The president of Kazakhstan Nursultan Abishevicha Nazarbaev on The Prime of Memory Alfred Nobel as to economics 2018 yr. «for developing for the young national democracies of the concept of The community of Universal labor and the commencements of its disposal in Kazakhstane»***.

Are convinced, what even inclusion of scientist from Kazakhstan in numeral nominees on The Prime of Memory Alfred Nobel as to the economics 2018 year will be estimated the scientists of young centre-Asia's state with many 1000 years history as actual and significant success of all science and the cultures of Republic Kazakhstan on international arena.

* The troops of Sweden unmuch did not have time in Kondrat Bulavin, Ataman of Don's Troops.

War for Independence 1707-1708 yryr. The most fair Nation of Europe&Asia –COSSACKS (of offsprings Norman's men) for the revival of state CALMOUCS (Kalmius) - founding with nation KALKA Norman-Mongol Worldwide Great Empire in XIII century which lifted Europe by commodity investments from China (!).

** For directorship and the scientist of the council of The institute of economical and socio-cultural researchers (cessionary DESMC and The academy of science of Ukraine and DFC) backing of scientists and the culture of Republic Kazakhstan is not only disposal the traditionally of deep-rooted liaisons of nations Pri-Azov Land and Asia of but also moral liabilities and the deep gratitude of the scientists of Mariupol to the scientific workshop of Ekibastuz and Kazakh Academy of science which in 1985-1986 yr. helped the economists of Mariupol not by only finance by but also the authority of The academy of science of Kazakhstan having agreed the package plan of advanced research. And on Donets basin about it always will with thanks remember and to bolster science and the culture of Kazakhstan (<http://kumpan-muller.ucoz.de/publ/exhibishin/4-1-0-142>).

*** We think - for East Europe concept will also затребована intellectual elite, as «Philosophy Letters» (P.YA.CHAADAEV) and as «Historical Letters» (P.L.LAVROV), not only scientists and administrators but also all ищущей its way in living young population. But only, for the countries of East Europe!

How real to build WORLD on the shoulders of intellectual-spiritual Titans' Humanity? The hundreds of sociologists, politics and economists searched and search replying to this question. And it is impossible to say that their search is of no effect. But only nobody does not try to actualize their elite and in many Vanguard-Rare model. Do not captivate people their overburdened by the subjectivism of the scheme of social interaction, and "dissert on philosophical topics" apropos of and without motive only repulses life-size politicians of and the organizers of manufacturing from acquaintance with the achievements of humanists.

By unattainable ideal was presented banding in one person of insisting scientist of humanist and real politics. But life lend gift to us such unique case and promulgation for the nation of Kazakhstan suddenly became the document of global general-culture significance, and virtual, by theoretical-methodological and designly-instrumental basement for the real alteration of the socio-social relations of young countries (http://kumpan-muller.ucoz.de/blog/twenty_steps_to_society_general_labour_n_a_nazarbaeva/2013-04-23-128).
