

IN THIS WORLD ONLY LOVE CREATES

Only incorrigible romantics love people like that * (for the birthday of the Honorary President of the International Civil Committee of Intellectual and Spiritual Unity, Outstanding Intellectual of Spain, Dr. Ernesto García)

Our acquaintance with this outstanding person came about through the publishing house "Who is Who" (USA) in 2001, when Valery Aleksandrovich Vasiliev and I sent our deepest condolences on the TRAGEDY of September 11 in New York on behalf of from the direction of the Azov Section of the Academy of Economic and Business Sciences to outstanding personalities found by the Who's Who publishing house and included in the "Who's Who in the World" of the year 2001.

This directory also contained our two biographies as economists, which was very new and unexpected for Eastern Europe (!!): The leaders of the state structures did not know how to react to this and waited.

And in our family a US Manual appeared thanks to Olga Vladimirovna Vasilyeva, who, seeing that many artificial obstacles arose in the work of her men, decided to support them morally. The money that he had been collecting for several years (400 US dollars was a large amount for Ukraine at that time - today it is not little) he transferred to Valery Aleksandrovich, so that he could pay for a copy of the world-famous Directory, through the Bank. It was necessary to see the faces of the colleagues at the University, to whom Valery Alexandrovich showed this publication... The leaders and all those close to them considered it the most dangerous and harmful book for Eastern Europe. After reading it, everyone would be forced to speak only English and follow the orders of the US president. It was a joke?! No, a reality that in 2020 is also a characteristic of almost the entire territory of Eastern Europe...

And the fact that several thousand names of Russian scientists and several hundred Ukrainians appeared in this directory of the year 2001, was due to qualified jobs in contacts with foreigners, not jobs in the country itself. And, of course, it was advisable to keep silent about this and, God forbid, but to be proud of this recognition... - it was the cause of losing his job.

The lack of transparency in the perception of the world was obvious, traditional and constantly renewed, based on a strictly controlled mass culture and tendentiously educated military structures and classes (sergeants and officers).

It has become fashionable to talk about the relapse of the 1930s, when we observed actions of absolute obscurantism and attempts to look at everyone and everything that "is not ours" through a crack, but that mentality has existed in Muscovy since its inception. Foundation. and the cruelty towards the

manifestations of elementary philanthropy towards what is not ours always overflowing.

The "Gorbachev thaw" was indeed something incomprehensible and inexplicable in Eastern Europe. Mikhail Sergeevich, of course, deserved the Nobel Peace Prize, given the deaf hatred that all the clumsiness of the March and the staff of all the "guard structures" professed for him. But the appearance of such a personality as Mikhail Sergeevich Gorbachev still today inspires some hope in the coronavirus era. Perhaps there is still a chance for the people of the East...

Valery Alexandrovich and I clearly went through the pages of the 2001 Directory letter by letter, beginning with "A", sending our deepest condolences to everyone who provided their email address for publication in the Directory.

Today we can say that our work at that time was reminiscent of sociological research on the conformity of the personalities listed in the Directory "Who's Who in the World" of 2001 with the demands of simple humanity and compassion. Already then and today we believe, that despite the ambiguity in the perception of world upheavals and artificial cataclysms, the professional world community passed the test of morality.

The fact that this TEST will fail - we were persistently and convincingly told to all graduates "out of obedience" (in Eastern Europe they know very well what contingent of scientists they are talking about). But when America, a truly honest and hard-working America, began sending not only letters of gratitude for compassion, but also poems... all this soulless dullness fell silent and began to silently hate those who showed them their failure moral.

And we continue to think about and discuss with colleagues who responded, actions that could reduce the terrorist threat in the world. And during the exchange of emails, somehow a simple but close idea emerged to hold a World Congress of Spiritual Unity. In fact, the chairman of the Academic Council of the Institute of Economic and Sociocultural Research (the legal successor of the DESMC of the Academy of Sciences of Ukraine and the DFC), was a member of the Ukrainian delegation to the First World Congress of Spiritual Harmony Studies in Alma-Ata in 1992, conducting a report there, which was later published as a pre-print at the Institute of Economic and Legal Studies of the National Academy of Sciences of Ukraine (Director, Academician of the National Academy of Sciences of Ukraine V.K. Mamutov, Deputy Director, Academician of the AES of Ukraine, Doctor of Economics V.V. Finagin) in 1993. After a trip to the Forums in Havana in 1997, the idea was born to hold the Second World Congress of Spiritual Harmony in Havana, which was supported by a scientific and practical conference - a meeting of the academic council of the Azov Section from the Academy of Economic and Business Sciences on December 18, 1999 in the village Volodarskoye (formerly Nikolskoye, the village of the Azov army) near Mariupol.

But then, due to the recognition by the UN Human Rights Committee of Cuba, Yugoslavia, Iraq and Iran as non-democratic states, the President of the Azov Section of the ENiPD Academy, Academician of the Academy of Economic Sciences of Ukraine, Academician of the New York Academy of Sciences, Doctor of Commerce, Ph. e.s., senior researcher, in 2000, Valery Aleksandrovich Vasiliev was forced to officially propose the capital of Brazil, the city of Brasilia, as the venue for the Second Congress World Spiritual Harmony, maintaining the American continent as the headquarters of such an important Forum.

The decision was communicated to several embassies in Ukraine and the United States of America. And so, after the fall of the Twin Towers in New York on September 11, 2001, and from our intense correspondence with prominent professionals included in the "Who's Who in the World 2001" Directory, the idea of holding the First World Congress of Spiritual Unity in New York naturally emerged. Of course, we informed about this to all those who responded to our sincere condolences and continued to express their condolences, offering to discuss this idea as well.

Precisely, Dr. Ernesto García also received such a letter with the idea of holding a World Congress (we have already reached the letter "Gö" on our mailing list). We liked his sincere and detailed answer, as did that of Prof. Miroslav Demisa from Serbia. (He proposed the idea of declaiming at the World Congress "The Great Innovation").

We had the idea to somehow fix this idea in some organizational form so that it would not "sink into oblivion."

Having already created more than one social structure, we understood that only the organizational form would keep the idea expressed and promising in the minds of the world community for a long time. And after some hesitation, we proposed to our foreign colleagues to create an International Committee of Citizens for the preparation of World Public Opinion for the First World Congress of Spiritual Unity in New York.

These hours were the most intense for us: we were waiting for answers. Will they believe in our sincerity or not? Have we correctly assessed, or not, the psychological atmosphere prevailing in the world? And most importantly: will the "IT watchdogs" in Eastern Europe miss the answers from their colleagues abroad?

A small MIRACLE (!) occurred and we received letters from prominent professionals, whose brief biographies were included in the 2001 "Who's Who in the World" Directory!! But the most important thing is that everyone supported the idea of creating an International Citizens Committee to prepare World Public Opinion for the First World Congress of Spiritual Unity in New York!!!

But to what extent were we naive? (!). Almost two decades have passed, and our naivety in 2001 to understand the complexity of processes in the international

arena continues to cause a smile in 2020 ... After all, we planned to hold this First World Congress in 2002 (!). It seemed to us that it was enough to familiarize the world community and the leaders of industrialized countries with the feat of the Saint Patriarchate, which professed the life-affirming and confrontation-reducing teachings of ECONOMY, so in a matter of weeks we will begin to discuss our initiative, and after three or four months preparations will begin for the First World Congress of Spiritual Unity in New York. We sincerely hastened to bring our proposal to hold the First World Congress of Spiritual Unity in New York to the scientific community of Europe, not only through the Internet, but also traditionally, at scientific and practical conferences.

For this purpose, we went to Warsaw for the international scientific and practical conference "Central and Eastern European States in East-West Relations" (October 19 and 20, 2001) and there they reported on the advisability of organizing and holding this World Congress . , which should precede the Forums, in which specific programs and actions that ensure a balanced socio-ecological development of our civilization will be discussed (in particular, in the Republic of South Africa in 2002).

We mentioned that the World Congress of Spiritual Harmony (Alma-Ata, 1992) took place after the Rio de Janeiro Forum, and this is incorrect from a methodological point of view. It is necessary to first discuss the issues of worldview, and then move on to the details and tools, and not the other way around... The scientists listened to us... but, as always, they did not take them seriously...

They also did not accept, like our proposal in 2000, sent to the USA to the New York Academy of Sciences and to the president of the USA, George W. Bush, on the convenience of making calculations for the economy world to a new level: The methodology of the United Nations expert group under the direction of Vasily Vasilyevich Leontiev, Nobel Prize winner in Economics in 1973 (developed in the 1970s).

We would begin to do this work (even in terms of preparation for the Second Congress of Spiritual Concord, but on the American continent) and, perhaps, the skyscrapers would not fall (so we said at the international conference in Warsaw last month of October). 20, 2001). Even if they just started seriously discussing the need to make global forecasts using the right tools for the world economy, like the boss. Department of the New York Academy of Sciences, former Senator Bill Green, who learned about our initiative and invited us to an information meeting in New York, held on April 11, 2001, (the letter was received in Warsaw during an internship) , then many things in the world would be different...

That's how we thought in 2001 and, probably, several leaders of the United States thought the same (this is the idea that came to us after reading a letter from

George W. Bush, written and sent from the White House in May 2001). , and received by us in Mariupol only at the end of 2002).

We have always understood that the ideas, and even more so the organizational ones, which aim to solve the problems of spiritual and intellectual progress, have a much greater importance than even their authors imagine.

For this reason, they sought (so that they would not be forgotten) to give the organization their preservation the maximum possible institutional base. And to this end, on November 12, 2001, a joint meeting of the Presidium of the Azov Section of the Academy of Economic and Business Sciences and the Directorate of the Institute for Economic and Socio-Cultural Research (successor of the DESMC of the Academy of Sciences) was held. of Ukraine and the DFC), in which it was officially decided to create an International Civil Committee to prepare world public opinion for the celebration of the First World Congress of Spiritual Unity in New York. The basis for this decision were the letters of leading professionals from around the world who agreed to participate in the work of our Committee. Even then, Dr. Ernesto Garcia and I established a good understanding, and we were fully aware that he, as a Spanish citizen, had much more experience working with international civil organizations than we did in Ukraine.

He introduced us to the references of the Lucis Trust organization (Geneva, London, Tokyo, New York, etc.; Doc. 14, 685, 686 www.cic-wsc.org), with whom we began an intense correspondence. And we received from her by mail a whole folder with her newsletters translated into Russian. This helped us evaluate the real role of non-governmental organizations in the UN and in creating a positive information field by promoting this or that organizational idea. And in fact, see from the outside, how to evaluate our initiative, and what exactly we can do to implement it. Of course, no one doubted that our project is absolutely altruistic and did not involve any type of commercialization. On the contrary, this would require a lot of work, which would not only have no financial stimulus, but also, most likely, no financial support. In this understanding, Dr. Ernesto García and I fully sympathize.

But we were not surprised so much by your initiative to create an electronic page of our International Committee of Citizens for the preparation of world public opinion for the First World Congress of Spiritual Unity in New York, but by the cost of maintaining this page in the amount of 600 euros a year, which Dr. Ernesto García calmly and without spectacular statements immediately began to implement.

Only ten years later we were able to follow her example and the funds received from the sale of the apartment (we call them "Anna Müller's sponsorship contribution") were placed in the Credit-Bank as "inviolable capital", the interest on which we paid a bonus to a talented young scientist from Kalush (Western

Ukraine), who received an international academic degree. Kumpan Award (Golik-Guli-Karimov-Vasiliev). We wanted to continue this practice with Bank PEKAO SA in Warsaw by opening a dollar deposit worth 5,100 dollars in 2012, but we ran into serious obstacles...and at the beginning of 2020 they partially restored the ÷inviolable capitalö (÷the contribution of patronage of Anna Müllerö) for the third level of the Kumpana Award (Golika-Guli-Karimov-Vasiliev).

When Olga Vladimirovna Vasilyeva (Yukhno-Katolik) learned about the amount that Dr. Ernesto García pays annually for the maintenance of our website, she inevitably burst out: ÷You're lucky! Your Spanish is an incorrigible ROMANTIC!" He said it with sincere and deep respect.

We are all very lucky. How many times did Dr. Ernesto García rescue us, warning us against obvious scammers on the World Wide Web, who found out our email address and bombarded us with offers, counting on our compassion or our ignorance of the realities of such? or which country!! But, really, the scale of the personality of this outstanding professional became evident to us only today, when in the Donbass we experienced what the people of Spain were going through, fighting against ETA (with bandits hiding behind the Basque problem) for decades. .

Unfortunately, our perception even of the history of our people suffers from a certain superficiality. We do not always feel the true tragedy of the overall situation, even when we know the tragic fate of our great-grandparents. Until a person survives the horror of the bombings and sees with his own eyes (crippled people, as we see in some photos published in an Internet postcast; destroyed houses and entire towns, etc.), what are the geopolitical tricks of people without education, but taking unlimited advantage of the power to which aspiring leaders lead? They consider tragedies in another region of the world as "information"; negative, but only deeply moving. By the way, we also perceive the history of our people with a certain distance and they say that none of this will happen anymore ... But when the fighters to maintain controllability are already throwing you into a whirlpool of frank and heartless criminality, forcing the structures of power to act out bloody scenarios, then an epiphany comes...

And we became close to the pain and tragedy experienced by the loss of our great-grandmother, who lost her husband, murdered on a business trip, but according to the documents "died of typhus."

We really began to deeply understand what people felt in the 20s of the 20th century, when all economic activity in a gigantic territory was artificially destroyed, which led to the reduction of even infrastructure and industries and turned the lives of millions into a fight for simple survival at any cost. Yes, it would be impossible to achieve this without the destruction of the churches... In this sense, today it seems that they have set a different goal: to create more different churches and houses of prayer, than people who really believe in the

existence of higher powers (as if it were another, more sophisticated form of lack of spirituality).

Until 2014 we had great respect for all the documents and all the information that Dr. Ernesto García about the fight that was being carried out in Spain against the declared terrorists of the ETA organization.

But somehow they didn't understand why there hasn't been any real progress in appeasing these irreconcilable daredevils for so long?! We had to go through the years 2014, 2015, 2016, 2017, 2018, 2019, 2020-2022 in the Donbass of Ukraine to understand the tragedy of the real situation in Spain back in 2001-2003. (!).

And when I ask myself: would I undertake the project of the International Citizens Committee for the Preparation of World Public Opinion to hold the First World Congress of Spiritual Unity in New York today, without all the work we have done over the years? , as they say, from scratch, I cannot answer affirmatively. Somehow, the tragedy and the atmosphere of hopelessness that has developed during these six years suppresses any global initiatives... there is no feeling of demand for these initiatives. And then there is the coronavirus...

This is how you should love people in your country in 2001-2003. and we hope to help people from other countries, so that with so much negative pressure (we already really feel what it really is like in Spain) we actively cooperate with professionals from other countries!! Olga Vladimirovna was right: "You are lucky!" Yes, we were very lucky when we found Dr. Ernesto García's email address in the Who's Who of the World 2001 and sent him our sincere condolences. But after all, this fate of ours was prepared by the professional work of the team of the "Who is Who" publishing house. And the gratitude to these professionals from America will remain with us forever, like all nineteen years of work with Dr. Ernesto García, because. Our common project has become a large and for us the most interesting, necessary for people and bright part of our personal life. In general it seems to me that such a sincere LOVE for people could only be born in a Spanish intellectual (!).

The entire complex and creative European history of this country is reflected in the personalities of outstanding Spaniards, one of whom is the Honorary President of the International Civil Committee of Intellectual and Spiritual Unity, Dr. Ernesto García. All this is not just beautiful words, but an objective conclusion that will be reached by anyone who reads only a part of the documents prepared and published on the website of the International Citizens Committee (and there are 788 of them!!). In this short information for the members of the Academic Council until August 23, we will focus only on some of the most important points, from our point of view

Every positive act has a deep and beautiful story.

While millions in the East wait stubbornly, spiritually developed individuals in Europe are trying to help those minor changes in the minds of a small, but still existing, group of professionals in the post-Soviet space. And make them understand the purpose of the existence of our common civilization and, most importantly, help them find themselves in the WORK to achieve this goal.

Among these European professionals is Dr. Ernesto García, born on August 23, 1946 in the family of Casto García Domínguez (his mother Josefa García de Rivas) in Cogolludo (Guadalajara province, in Spain). By the way, the most scientifically productive work of the International Civil Committee (the organization of the First and Second stages of the Forum-2005) took place during our teaching at the Odessa National University. I.I. Mechnikov and at the Odessa branch of the University "Ukraine".

And Khadzhibey liberated (later they called the city Odessa) and the first governor of the city was the Spanish aristocrat in the service of Russia, Joseph de Ribas, who signed "De Rivas" (!). It seems like a coincidence... but beautiful and binding...

Ernesto studied a lot and graduated from the Colegio de la Sagrada Familia in Sigüenza (Guadalajara-Spain) in 1963. And in the future everything was related to medicine: the degree from the Faculty of Medicine of Zaragoza in 1970; Diploma from the National School of Public Health in 1975; Doctor of Medicine from the Faculty of Zaragoza in 1991; He worked as an assistant doctor at the José Antonio Health City and in the Guadalajara Emergency Room, as well as at the Provincial Hospital. Later from 2004 to 2016 as head of the Physical Medicine and Rehabilitation Service at the Miguel Servet University Hospital in Zaragoza (Spain) until his retirement. But what a restless character this talented doctor has, who constantly participates in scientific congresses and meetings (!).

From 1991 to 1994 he served as head of the Rehabilitation Service of the ASPACE-ARAGÓN Cerebral Palsy Center, then from 2001 to 2004 he directed the Social Rehabilitation Center, and from January 2003 to 2005. He also coordinates teaching and quality of care of the Rehabilitation Service of the Miguel Servet University Hospital, etc. The most humane profession and the work of leading the coordination of medical care instilled in Dr. Ernesto García the desire to have a positive impact on the general situation in Spain, spreading positivism to the world as a whole.

Therefore, it begins to cooperate with non-governmental organizations in Geneva (World Goodwill, Lucis Trust, etc.). He wants to look with them for real ways to solve their country's problems and for cooperation between peoples (establishing

links with the Citizens of the World; with those who consider themselves such and have reasons to do so).

Therefore, it was no coincidence that the exchange of those sincere and profound letters between Dr. Ernesto García and Doctor of Commerce, Academician of the Academy of Economic Sciences of Ukraine Valeriy Alexandrovich Vasiliev, when Valeriy Alexandrovich, as president, suggested that Dr. Ernesto García is the first vice president of the International Citizens Committee, and the latter gratefully accepted.

As you can see, all these actions have a rather serious basis, the true depth of which we will not immediately know. And we often thank Fate that we found out. As happened with the current vice president of our Committee, the webmaster and sociologist Julio Atance. But we will talk about this page (and perhaps the most difficult chapters) of life a little later.

Spain - my love!

We constantly do not remember Benedict XVI's Great Encyclical on LOVE and its main methodological core: a feeling of integral and necessary LOVE for each person towards God, towards his Creator.

But without this LOVE, often deeply hidden in the depths of the soul, one cannot deeply love loved ones or one's own people ... And this is very correct: a person should have innate gratitude for the happiness of live, create. ...and even suffering... You have to be grateful for everything, then, as they say, life will not be lived in vain. Being a sincere CHRISTIAN is really a great happiness. This happiness was granted to Dr. Ernesto García.

Therefore, despite the apparent futility of efforts to resolve the conflict with ETA bandits in the near future, he is quietly and actively fighting for the peaceful resolution of this conflict, whose roots go back to the depths of the European history and threaten to spread to France and serve as the beginning of a new division of Europe's borders. Someone really needs this to keep Europe in suspense! But the Spaniards, like the civilian population of the Basque province, do not need it. People do not want a mythical fight for autonomy. They are tired of living in fear. Who, no matter how hardworking a doctor, understands the value of human life better than others?

And Dr. Ernesto García actively and discreetly fights Spain united and happy without the fight imposed by the mythical rights of this or that part of the country weakening the people and the State. Of course, we all sincerely support your efforts and we are glad that our position fully coincides with the position of the patriots of Spain contained in the "We Want to Know" Document. The position of democratic Spain is clearly exposed in the thesis: "We want to know -

Memory, Honor, Justice" (Forum for the Civil Investigation of the Attack of March 11, 2004 in Madrid Papers).

Until then it is not necessary to add anything. The position and tasks are clear. In fact, this is what the democratic forces of Spain are fighting for today (so that the event is not repeated tomorrow) and also all the members of the International Citizens Committee.

And Dr. Ernesto García cited figures that shocked us in 2006, but that after the events in Donbass in 2014-2015 are no longer surprising, because we began to feel the depth of the anti-Christian and anti-human intention of all the ideologues of ETA and of the DPR and the LPR. If the 1977 amnesty for bandits (supposedly nationalists) who killed even under General Franco, led to 800 murders in Spain, then the number of victims in eastern Ukraine is already approaching tens of thousands (everyone fears the exact figure) .

The Spaniards, or rather the patriots of Spain, understood everything well for a long time and conveyed to us their understanding of the situation in 2006: no negotiations can be entered into with the bandits, because it does not lead to peace, but to capitulation and to totalitarianism. And we, together with our already President (at the request of Valery Alexandrovich, in November 2006, Dr. Ernesto García accepted to be president of the International Civil Committee), we share with 67 civil movements and organizations the position of the Patriots of Spain, in against granting ETA bandits the status of negotiating party in Strasbourg.

We all supported the Spanish Popular Party (which brought together more than 40% of the electorate), which considered the Strasbourg negotiations a concession from the Spanish government to the ETA gang. All this was reflected in the documents posted on the website of the International Civil Committee. In general, Ukraine should listen to the wisdom acquired by the Spanish: not negotiate with bandits or make concessions to their ideologues...

The main documents prepared and published on www.cic-wsc.org on behalf of CIC-WSC.ORG by its president from 2006 to 2017, Dr. Ernesto García, we commented in Bulletin No. 37 of the International Citizens Committee, the Azov branch of the ENiPD Academy, the ESKI Institute "Democracy must be supported through the fulfillment of the Millennium Goals and the constant protection of human rights: For this, the Cambridge International Biographical Center, the American Biographical Institute and the International Citizens Committee.

We, like Dr. Ernesto García, pay special attention to the call made in the Plaza de Castilla "For Freedom. Let's defeat ETA together, not by negotiating" (see Document 329 at www.cic-wsc.org). In this sincere and profound call there are words that reach the heart of every European: "If they kill me, I do not want them to write on my epitaph that they died for peace, but that they died for freedom"

(Mario Onindia). It is difficult to better reflect the subtleties of the current phase of the fight against ETA!

Perhaps the most important thing for Eastern Europe, and for many States, is the absence of racial prejudices in Spain. In reality, there is no internal rejection of people of another race, i.e. The entire complex history of the formation of the people of Spain was not in vain, and the "geopolitical wise men" have not yet managed to sow racial hostility. This is very well demonstrated in a series of documents that show how the civil organization "Peones Negros" carried out activities with the "Association of Victims of Terrorism" (Doc. 461 www.cic-wsc.org). Unfortunately the terrorists do not calm down and Barcelona is a witness to this (Doc. 691 www.cic-wsc.org)

But the main thing is that we, together with Dr. Ernesto García, consider it necessary to look for solutions to all complex problems based on scientific approaches. For this reason, it publishes on its website an announcement about a scientific conference on February 18 in Zaragoza "Documents of national and regional parliaments in European affairs and in the control of the legislation of the European Union", as well as about a scientific seminar "The State of American Constitutionalism", which took place on February 15, 2007. Of course, only then can more or less acceptable solutions be found.

That is, such determined ascetic activity revived to a new level the desire of the Honorary President of the Committee, Dr. Ernesto García, for the most serious generalizations of the worldview. It was at this methodological level that our Committee took its first steps when it called for the reactivation of the principles of ECONOMY in relations between States.

He has been striving in recent years to familiarize the intellectuals of the world with the MESSAGES, in which the Future, proclaimed by the Scriptures of all times, has already arrived. There are multidimensional visible manifestations. If Humanity had Faith in the power of GOD and his CREATION, then it would think with confidence about its own direct influence on the EARTH... (CIC-WSC) These Messages are not only in the official languages of the UN, but also in Ukrainian, Dr. Ernesto published on the official website of the Committee in 209 documents. A very great and necessary work for all of us that was carried out by this talented intellectual from Spain!!

And I am of the firm conviction that if Who's Who Publishing (USA) were to introduce us and all the professionals in the world to Dr. Ernesto García, this alone would be enough to justify the work of the editorial team from 1899 to the present. present.

From the bottom of our hearts we wish the Honorary President of our International Committee of Citizens, Dr. Ernesto García, many years of Creative and HAPPY life!!!

Alexander Vasiljev Muller
